State Auditor

The State Auditor is a constitutional officer elected for a four year term by the general electorate. The Auditor is the chief fiscal officer of the State. The Auditor is charged with the responsibility of paying State obligations, paying employees salaries and maintaining the official accounting records of the State. He is responsible for demonstrating accountability to the public by preparing the Comprehensive Annual Financial Report.

The Auditor serves as a member of the State Land Commission, the State Loan and Investment Board, the State Building Commission and the State Canvassing Board.

Max Maxfield grew up in Wisconsin where he graduated from Janesville High School in 1963. He attended the University of Wisconsin, Steven's Point and Whitewater. His career in public service has spanned nonprofit, public and private sectors. Max was a YMCA director for twenty years, former director of the Wyoming Recreation Commission, and the first appointed director of the Wyoming Department of Commerce, a position he held for five years. More recently, Max served as the Executive Director of Wyoming's Make-A-Wish Foundation and as financial consultant for various nonprofit agencies across the county.

Max and his wife Gayla, make community and church an important part of their daily lives. Max is a certified Lay Speaker, past president of the Staff Parish Board and a Stephen Minister of the First United Methodist Church. He has served a wide range of other organizations including United Way of Laramie County, Wyoming Children's Society, Crimestoppers, Wyoming Alzheimer's Association, and Special Olympics of Wyoming. Max is a Rotarian and a Paul Harris fellow. Max and Gayla are the proud parents of four grown children.

This report's divider pages focus on Images of the American Indian and the American Cowboy as they relate to Wyoming's Historical past.

TO THE CITIZENS, GOVERNOR AND MEMBERS OF THE LEGISLATURE OF THE STATE OF WYOMING:

State law (W.S. 9-1-403(a)(v)) requires that the State Auditor provide annual financial statements prepared in conformance with generally accepted accounting principles (GAAP) by December 15 every year. Therefore in accordance with state statute I am pleased to present this Comprehensive Annual Financial Report of the State of Wyoming for the fiscal year ended June 30, 2004.

This report consists of management's representations concerning the finances of the State of Wyoming. Consequently, the State Auditors Office assumes full responsibility for the completeness and reliability of all of the information presented in this report. To provide a reasonable basis for making these representations, the State of Wyoming has established a comprehensive internal control framework that is designed both to protect the State's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the State of Wyoming's financial statements in conformity with GAAP. The financial statements have been prepared primarily from accounts and records maintained by the State Auditor. Because the cost of internal controls should not outweigh their benefits, the State of Wyoming's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. I assert that, to the best of my knowledge and belief this financial report is complete and reliable in all material respects.

McGee, Hearne & Paiz, LLP, a firm of licensed certified public accountants have audited the financial statements in this report. McGee, Hearne & Paiz, LLP did not audit the financial statements of the Wyoming Community Development Authority nor the Wyoming Department of Transportation which are shown as discretely presented component units. Also, McGee, Hearne & Paiz, LLP did not audit the University of Wyoming Foundation which is blended into the University of Wyoming, is a discretely presented component unit. Other auditors whose opinion was relied on by McGee, Hearne & Paiz, LLP to base its opinion on those entities, examined the financial statements for those component units. The goal of the independent audit was to provide reasonable assurance that the financial statements of the State of Wyoming for the fiscal year ended June 30, 2004 are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial presentation. The independent auditor concluded based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the State of Wyoming's financial statements for the fiscal year ended June 30, 2004 are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

The independent audit of the financial statements of the State of Wyoming was part of a broader, federally mandated "Single Audit" designed to meet the special needs of federal grantor agencies. The standards governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with legal requirements involving the administration of federal awards. These reports are available in the State of Wyoming's separately issued Single Audit Report.

GAAP require that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The State of Wyoming's MD&A can be found immediately following the report of the independent auditors.

Profile of the Government

The State of Wyoming was admitted to statehood July 10, 1890. Located in the Rocky Mountain section of the western United States, it is bounded on the north by Montana, on the east by South Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah, Idaho and Montana. It is the ninth largest state in the United States containing 97,914 square miles. The 2000 Census put Wyoming's population at 493,782. Wyoming is home to two of the country's foremost national parks, Yellowstone National Park and Grand Teton National Park, as well as, the first designated national monument Devils Tower.

The executive branch of Wyoming state government is comprised of a Governor, Secretary of State, State Auditor, State Treasurer, and the Superintendent of Public Instruction, all of whom are elected by statewide vote every four years. The legislative branch of government is comprised of 30 State Senators and 60 State Representatives. The term of office for the Senators is four years, 15 of the members being elected at a general election at which a President of the United States is elected, the balance at the next general election. The entire body of the House of Representatives is elected every two years to serve a two-year term.

The State of Wyoming provides a full range of services. Under the Governor are fourteen Cabinet level departments: Administration and Information, Agriculture, Attorney General, Audit, Corrections, Employment, Engineer, Environmental Quality, Family Services, Game and Fish, Health, Revenue, State Parks and Cultural Resources, Transportation and Workforce Services. There are also 19 separate operating agencies and 13 licensing boards and commissions

Among the 19 separate operating agencies are five entities which are legally separate but considered as component units of the State of Wyoming as the state has significant operational and/or financial relationships with them. Four of the component unit's financial data are reported in columns separate from the financial data of the primary government (the State). Those organizations are the University of Wyoming, Department of Transportation, Wyoming Community Development Authority, and Wyoming Business Council. The Wyoming Building Corporation is a blended component unit; its financial data is blended into the primary government financial data. Additional information on all five of these legally separate entities can be found in Note 1A in the notes to the financial statements.

Budgetary Process:

The biennial budget serves as the foundation for the State of Wyoming's financial planning and control. Wyoming statutes require the Governor to prepare and submit a biennial budget to the legislature each odd numbered year, prior to the beginning of the legislative session. Budgets are prepared for a biennial period and are augmented, if necessary, with supplemental appropriations during the odd-numbered year's legislative sessions. Budgets are adopted at the agency level. Each agency may then allot its budget to line items as it likes unless the legislature has provided specific funding for a certain item or program in the departmental budget. The Legislature may add, change, or delete any budget items proposed by the Governor. The budget session convenes in February of even numbered years. The Governor may authorize changes and revisions to approved budgets during the budget term including increasing appropriations in the event of federal revenue above the initial budget approved by the legislature. Budget-to-actual comparisons are provided in this report for each individual governmental fund for which an appropriated biennial budget has been adopted. For the general fund, the foundation program fund, and the budget reserve fund, this comparison is presented as part of the required supplementary information. For governmental funds other than the major funds, this comparison is presented in the supplementary information section of this report.

Factors Affecting Financial Condition

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which the State of Wyoming operates.

State economy. Wyoming's economic well being revolves around three industries – the extraction of minerals, tourism and agriculture. Mineral extraction is by far the largest industry. Wyoming is first in the country in coal, and trona production. It is seventh in the nation in crude oil production and fifth in natural

gas production. More than six million persons visit Wyoming each year to enjoy its national parks and natural scenery. For Fiscal Year 2004 Agriculture lagged minerals and tourism. Agriculture's decline may be attributable to two major negative factors, the discovery of brucellosis in Wyoming affecting the Beef Industry and the continuing drought that has affected most of the Midwest and Western states.

Wyoming's economy remained steady in the past fiscal year. Wyoming was well below the national unemployment rate of 5.6% with an unemployment rate at June 30, 2004 of 3.6%.

Each year the Division of Economic Analysis (EA) of the Department of Administration and Information forecasts economic conditions in Wyoming for a ten-year period. According to EA, the following industries are the principal economic drivers: 1) mining and 2) services/retail trade.

Additional economic and demographic information about our State can be found on the Division of Economic Analysis website: <http://eadiv.state.wy.us>.

The State's general fund derives much of its income from the mineral severance tax (a tax levied on the extraction of minerals), sales and use tax, and investment earnings. There is no state income tax in Wyoming. Sales and use taxes make up forty-two percent of general fund revenues. Federal Mineral royalties provide significant income to the School Foundation and Highway Fund. Wyoming ranks 15th in per capita personal income, yet it is among the lowest in the nation in household tax burden to its population due to mineral severance tax contributions to state revenue.

Long term financial planning In light of Wyoming's limited available revenues to meet ever increasing demand for State services and rising costs, the State continues to examine issues which will contribute to better, more affordable and efficient government. The State is not immune to national economic downturns with its dependence on mining and sales tax revenues.

The State Auditor's office began the process of upgrading the Financial and Payroll Systems in 2003 and will continue the process in 2004 to provide new capabilities focusing on our interaction with customers and constituents. This will offer a new and better way to create and share value with our customers while creating a viable by-product, better reporting of information and access to that information. Our focus is on the production of useful information, not simply gathering and processing data.

Currently, the State is in the enviable position of having financial surpluses. The State's elected officials continue to debate the best uses of these resources; placing excess funds in a 'rainy day' account, or funding 'one time' expenditures in the areas of new capital construction and deferred maintenance, while recognizing the State's surpluses will not go on indefinitely.

Cash Management. Cash temporarily idle during the year and balances held in trust were invested in bank deposits, U.S. Treasury Securities, repurchase agreements and other investment instruments. The interest on these investments and deposits is credited to each fund based on the fund's participation in the cash and investment pool. Many funds are not allowed by law to receive interest, so the interest earned on these funds is credited to the general fund. The general fund was credited \$100.4 million in Interest from the Permanent Wyoming Mineral Trust Fund (PWMTF), during fiscal year 2004.

Risk Management. The State of Wyoming maintains two self-insurance plans: the State Self-Insurance and the State Group Insurance. Both plans are reported as internal service funds. In addition, the State administers three public entity risk pools: Subsidence, Wyoming Health, and Worker's Compensation. The subsidence pool addresses the impact of past mining on capital structures in the State. These are reported in enterprise funds, as required by GASB Statement No. 10. Additional information on Wyoming's risk management activity can be found in Note 13 of the notes to the financial statements.

Pension and other post employment benefits. Under the authority of the State Legislature, the Wyoming Retirement System (WRS) administers seven-pension plans open to state employees and employees of other political subdivisions that have elected to participate in the plans. All required contributions by employers have been made. Though the Wyoming Retirement System is legally separate from the State, the State appoints a voting majority of the WRS board, sets the contribution requirements and has fiduciary responsibility for WRS assets. The retirement plans are reported as fiduciary funds. Additional information on Wyoming's pension arrangements can be found in Note 12 in the notes to the financial statements.

Awards and Acknowledgments

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Wyoming for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2003. This was the sixth consecutive year that the government has received this prestigious award. In order to be awarded a Certificate of Achievement, the government published an easily readable and efficiently organized CAFR. This report satisfied both GAAP and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility of another certificate.

This report continues my commitment to clarify and improve financial reporting for the citizens of Wyoming, in order that they may have an accurate picture of the financial condition of their government. Great strides have been made in the past few years to improve our State's accounting and financial reporting: implementation of GAAP, preparation of the CAFR, an independent audit of our financial statements, and implementation of various GASB standards. All have contributed to better financial management. My appreciation goes out to the Legislature and our Staff for making these improvements possible.

The preparation of this report could not have been accomplished without the cooperation of all State agencies. I continue to be impressed with the capable assistance received from the departments and agencies. I am especially appreciative of the staff in the State Auditor's Office, whose commitment to serve the citizens of Wyoming continues to be demonstrated. We would like to thank the Division of Economic Analysis and the CREG Committee for information used in this letter. We also thank the State Parks and Cultural Resources, Archives and Technical Services, for the use of their photographs and narratives that showcase some of Wyoming's historical sites.

Thank you!
Best regards,

Max Maxfield

INDEPENDENT AUDITOR'S REPORT

Honorable Governor, Members of the Legislature
State of Wyoming
Cheyenne, Wyoming

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wyoming (the "State") as of and for the year ended June 30, 2004, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Wyoming Community Development Authority or the Department of Transportation which are shown as discretely presented component units. In addition, we did not audit the financial statements of the University of Wyoming Foundation (Foundation), a component unit of the University of Wyoming, which is included in the balances for the University of Wyoming (University), a discretely presented component unit of the State. The Foundation represents approximately 21% of total assets and 7% of total receivables of the University. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the Wyoming Community Development Authority, the Department of Transportation, and the Foundation portion of the University component units, is based on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wyoming as of June 30, 2004, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis, pages 5 through 16, and the budgetary comparison information and infrastructure modified approach information, pages 64 through 70, are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We and the other auditors have applied certain limited procedures, which consisted principally of inquires of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Wyoming's basic financial statements. The introductory section i through viii, supplementary information pages 72 through 151, and the statistical section, pages 154 through 180, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

MANAGEMENT'S DISCUSSION AND ANALYSIS

As the management of the State of Wyoming, we offer readers of the State of Wyoming's financial statements this narrative overview and analysis of the financial activities of the State of Wyoming for the fiscal year ended June 30, 2004. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found on pages i - iv of this report.

Financial Highlights

Government-Wide:

- The assets of the State of Wyoming exceeded its liabilities as of June 30, 2004 by \$5,640,746,880 (reported as net assets). Of this amount, \$323,226,671 is unrestricted net assets that may be used to meet the government's ongoing obligations. Component units reported net assets of \$5,896,587,218.

Fund Level:

- As of June 30, 2004, the State of Wyoming's governmental funds reported combined ending fund balances of \$5,391,059,861, an increase of \$630,870,166.
- At the end of the fiscal year, unreserved fund balance for the general fund was \$9,978,907.
- The enterprise funds reported net assets at year-end of \$50,351,384.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the State of Wyoming's basic financial statements. Financial reporting is intended to provide external parties that read financial statements with information that will help them to make decisions or draw conclusions about an entity. These parties do not always have the same specific objectives. In order to address the needs of as many parties as reasonably possible, the State's annual report consists of three major sections in accordance with required reporting standards: Management's Discussion and Analysis (MD&A), the basic financial statements, and required supplemental information. The State of Wyoming's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements.

Government-wide financial statements. The *government-wide financial statements* are designed to provide readers with a broad overview of the State of Wyoming's finances, in a manner similar to a private-sector business. The State's government-wide financial statements include the *statement of net assets* and *statement of activities*. These statements include all non-fiduciary assets and liabilities using the accrual basis of accounting.

- The purpose of the *statement of net assets* is to report all of the assets held and liabilities owed by the State. The State reports all of its assets when it acquires ownership over the assets and reports all of its liabilities when they are incurred. The difference between the State's total assets and total liabilities is titled *net assets* and this difference is similar to the owner's equity presented by a private-sector business.

The government-wide statement of net assets can be found on page 19 of this report.

- The purpose of the *statement of activities* is to present all the revenues and expenses of the State of Wyoming. Again, the items presented on the statement of activities are measured in a manner similar to the approach used by a private-sector business in that revenues are recognized when earned or established criteria are satisfied and expenses are reported when incurred by the State. Revenues are recorded when earned regardless of when the cash will be received and expenses are recorded even though they may not have been paid during the current period (e.g., uncollected taxes and earned but unused vacation leave).

The government-wide statement of activities can be found on pages 20 - 21 of this report.

Both statements report three activities:

- *Governmental Activities* – Most of the State's basic services are reported under this category. Taxes and intergovernmental revenues generally fund these services. The Legislature, the Judiciary, and the general operations of the Executive departments fall within the governmental activities.
- *Business-type Activities* – The State charges fees to customers to help it cover all or most of the cost of certain services it provides. Workers' compensation and the State's unemployment compensation services are examples of business-type activities.
- *Component Units* – Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. The State has 3 authorities and 1 university that are reported as discretely presented component units of the State. The State blends 1 component unit into the internal service funds.

Fund financial statements. The fund financial statements begin on page 22 and provide more detailed information about the State's most significant funds – not the State of Wyoming as a whole. Funds are accounting devices that the State uses to keep track of specific sources of funding and spending. Except for the general fund, a specific fund is established to satisfy legal requirements established by external parties or governmental statutes or regulations. The State of Wyoming establishes other funds to control and manage money for particular purposes or to show that it is properly using certain resources. All of the funds of the State of Wyoming can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

- **Governmental funds.** Most of the State's basic services are reported in the governmental funds, which focus on how money flows into and out of those funds and the balances left at year-end that are available for future spending.

Governmental fund financial statements consist of a balance sheet and statement of revenues, expenditures, and change in fund balances. The Statements are prepared on an accounting basis that is significantly different from that used to prepare the government-wide financial statements. All of the State's programs are included in the governmental funds, which focus on how cash and other financial assets that can readily be converted to cash flow in and out in a short period of time. For example, amounts reported on the balance sheet include items such as cash and receivables collectable within a short period of time, but do not include capital assets such as land and buildings. Fund liabilities include amounts that are to be paid in a short period after the end of the fiscal year. The difference between a fund's total assets and liabilities is labeled as the fund balance. The unreserved-undesignated portion of fund balance generally indicates the amount that can be used to finance next year's activities.

The operating statement for governmental funds reports only those revenues and expenditures that were collected in cash or paid in cash, respectively, during the current period or very shortly after the end of the year. Consequently, the governmental funds statements provide a short-term view that helps determine if there are more or fewer financial resources to finance the State's programs. Because this information does not encompass the long-term focus of the government-wide statements, we provide an analysis reconciling the total fund balances to the amount of net assets reported in the statement of net assets.

Also, there is an analysis following the statement of revenues, expenditures, and changes in fund balances that reconciles the change in net assets of the governmental activities presented in the government-wide statement of activities to the change in fund balance presented in the statement of revenue expenditures and changes in fund balance. These two reconciliation schedules (pages 23 and 25) provide an analysis of transitioning from modified accrual accounting (Fund Basis) to full accrual accounting (Government Wide Basis). The following summarizes the impact of transitioning from modified accrual to accrual accounting:

- Capital assets used in governmental activities are not reported on governmental fund statements.
- Internal service funds are reported as governmental activities, but reported as proprietary funds in the fund financial statements.
- Unless due and payable, long-term liabilities, such as capital lease obligations, compensated absences, bonds payable, and others only appear as liabilities in the government-wide statements.
- Certain other outflows represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental fund statements.

- **Proprietary funds.** When the State charges customers for the services it provides, whether to outside customers or to other state agencies within the State, these services are generally reported in proprietary funds. Proprietary funds (enterprise and internal service) utilize accrual accounting: the same method used by private sector businesses. Enterprises funds report activities that provide supplies and services to the general public. An example is the State Workers' Compensation. Internal service funds report activities that provide supplies and services for the State's other programs and activities-such as the State's Information Technology Division. Internal service funds are reported as governmental activities on the government-wide statements since their primary purpose is to support those activities.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The enterprise funds are broken out between major and non-major. Conversely, internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds is provided in the form of combining statements in the supplementary information section of this report.

The basic proprietary fund financial statements can be found on pages 26 - 28 of this report.

- **Fiduciary funds.** The State acts as a trustee or fiduciary for its employee pension plan. It is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. The State's fiduciary activities are reported in separate Statements of Fiduciary Net Assets and Changes in Fiduciary Net Assets. These statements include pension, investment trust, private purpose, and agency funds, which use accrual accounting. The government-wide statements exclude fiduciary fund activities and balances because these assets are restricted in purpose and do not represent discretionary assets of the State to finance its operations.

The basic fiduciary fund financial statements can be found on pages 29 - 30 of this report.

Notes to the Basic Financial Statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the basic financial statements can be found on pages 32 - 62 of this report.

Required Supplementary Information is presented that further explains and supports the information in the financial statements. The Required Supplementary Information includes budgetary comparisons schedules primarily prepared on a biennial basis. Also included is a discussion of the Wyoming Department of Transportation (DOT) and how they account for infrastructure assets using the modified approach.

Required supplementary information can be found on pages 64 - 70 of this report.

Other Supplementary Information includes combining statements referred to earlier in connection with non-major governmental, enterprise, internal service and fiduciary funds that are presented immediately following the required supplementary information.

Other supplementary information can be found on pages 72 - 151 of this report.

Government-Wide Financial Analysis

As noted earlier, net assets may serve over time as a useful indicator of a State's financial position. In the case of the State of Wyoming, assets exceeded liabilities by \$5.6 billion at the close of fiscal year 2004. This was an increase of \$592.6 million or (11.7) percent. This increase in net assets was due to a continued improved market for minerals, as reflected in the State's mineral severance tax and federal mineral royalties, major revenue sources for the State.

The following condensed financial information was derived from the government-wide Statement of Net Assets:

The investments in capital assets (e.g., land, buildings, machinery, and equipment), less any related debt used to acquire those assets that is still outstanding, is \$194 million. The State of Wyoming uses these capital assets to provide services to the citizens; consequently, these assets are not available for future spending. Although the State of Wyoming's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the State of Wyoming's net assets, \$5.124 billion, represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net assets is \$323 million.

The majority of the current and other non-current assets of \$9.499 billion, consist of various cash and pooled investments of \$8.308 billion, and accounts and loan receivables (including interest receivable) of \$862 million. The remaining amount is comprised of other assets such as inventory and prepaid expenses.

The current liabilities of \$3.057 billion, a \$2.483 billion increase over 2003, are comprised of various items. \$2.822 billion is related to liabilities under security lending, \$128 million is related to claims and benefits payable, \$65 million is related to various accounts payable. The remaining amount of \$42 million is made up of compensated absences, early retirement, interest payable, deferred revenue, and various other liabilities. This increase was principally due to a \$2.5 billion increase in the amount of security lending.

The majority of the long-term liabilities of \$801 million, an increase of \$72 million over 2003, is comprised of claims and benefits payable of \$645 million and bonds payable of \$115 million. The remaining amount is made up of compensated absences, deferred revenue, and various other liabilities. This increase was mostly attributable to a growth in Workers' Compensation claims (\$67 million increase).

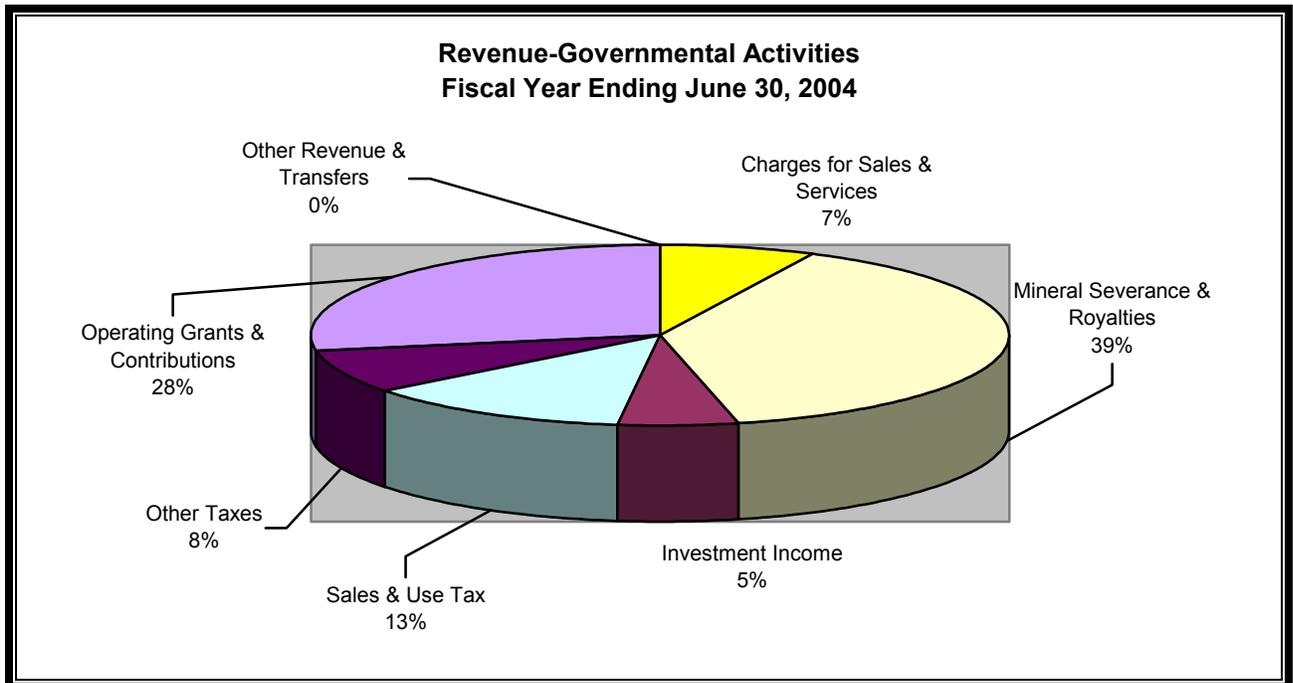

As of June 30, 2004, the State of Wyoming is able to report positive balances in all three categories of net assets for the government as a whole. The same situation held true for the prior fiscal year.

The following condensed financial information was derived from the government-wide Statement of Activities and reflects how the State's net assets changed during the fiscal year:

The increase in net assets related to governmental activities for the State of Wyoming was \$612 million during the current fiscal year. \$500 million of this increase is attributable to increases in the State's tax revenues (\$353 million), rate increases for charges for sales and services (\$95 million), and in operating grants (federal revenue) (\$52 million).

The chart below represents revenues of the governmental activities for the fiscal year:

The following chart represents expenses of the governmental activities for the fiscal year:

Business-type activities. The net assets of the business type activities decreased by \$30 million during the fiscal year. The major factor contributing to this was an increase in unemployment insurance claims.

Financial Analysis of the State of Wyoming's Funds

As noted earlier, the State of Wyoming uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the State of Wyoming's *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable* resources, as stated earlier. Such information is useful in assessing the State of Wyoming's financing requirements. In particular, *unreserved fund balance* may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of June 30, 2004, the State of Wyoming's governmental funds reported combined ending fund balances of \$5.391 billion, an increase of \$631 million, in comparison with the prior year. Over half of the fund balance, \$3.411 billion, is reserved within the permanent funds as nonexpendable. In addition, a portion of the fund balance is *reserved* to indicate that it is not available for new spending because it has already been committed 1) to liquidate contracts and purchase orders of the prior period, \$211 million, 2) for loans receivable, \$289 million or 3) for inventory, \$3 million.

General Fund. The general fund is the chief operating fund of the State of Wyoming. At the end of the current fiscal year, unreserved fund balance of the general fund was \$10 million, while total fund balance reached \$62 million. The general fund balance of the State of Wyoming decreased by \$112 million during the current fiscal year. The major factor in this decrease was the establishment of a Due to the Budget Reserve Fund of \$305 million. This was done to comply with the Legislative directive that the unreserved fund balance of the General Fund be no more than \$10 million as of June 30, 2004. A more detailed comparative analysis of the activity for the General Fund can be found on pages 12-13, of this MD&A.

Foundation Program Fund. Fund balance at June 30, 2004 totaled \$56 million, a decrease of \$29 million from the prior year as a result of increased expenditures in funding provided to local school districts.

Budget Reserve Fund. Fund balance at June 30, 2004, increased to \$816 million, from \$261 million the previous year as a result of the general increase in state mineral severance taxes and federal mineral royalties totaling \$419 million for an increase of \$148 million over Fiscal Year 2003 and transfers in from the General Fund of \$322 million.

Common School Land Fund. As of June 30, 2004, the fund balance totaled \$1.175 billion, an increase of \$55 million from the prior fiscal year as a result of investment earnings of \$40 million, revenue from use of property of \$83 million, this was offset by transfers out of \$67 million.

Permanent Mineral Trust Fund. Fund balance at June 30, 2004, totaled \$2,276 billion, an increase of \$185 million as a result of a general increase in mineral severance taxes and investment earnings as well as a \$50 million transfer in from the Budget Reserve Fund.

Proprietary funds. The State of Wyoming's proprietary funds provided the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted/(deficit) net assets of the enterprise funds as of June 30, 2004, amounted to (\$165) million. The major factor attributing to this (deficit) is the unrestricted deficit of the Worker's Compensation Fund of (\$177.6) million.

General Fund Budgetary Highlights

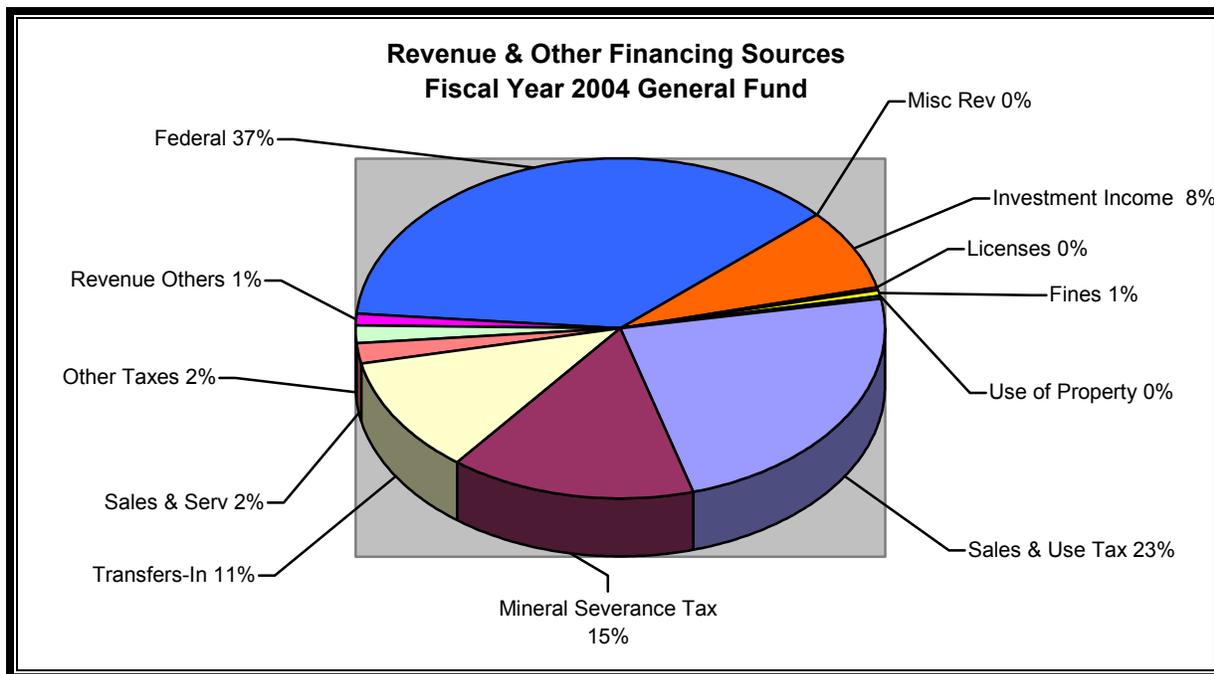

The differences between the original biennial budget of \$2,173 billion (as of July 1, 2002) and the final amended biennial budget \$2,524 billion (as of June 30, 2004) was a \$351 million increase in appropriations.

The major increases are briefly summarized below:

- \$200 million in additional federal funds;
- \$58 million increase for improvement programs in the Department of Education;
- \$36 million for emergency management programs in the Adjutant General's Office; and
- \$48 million for an increase in the Health Services Program—Medicaid.

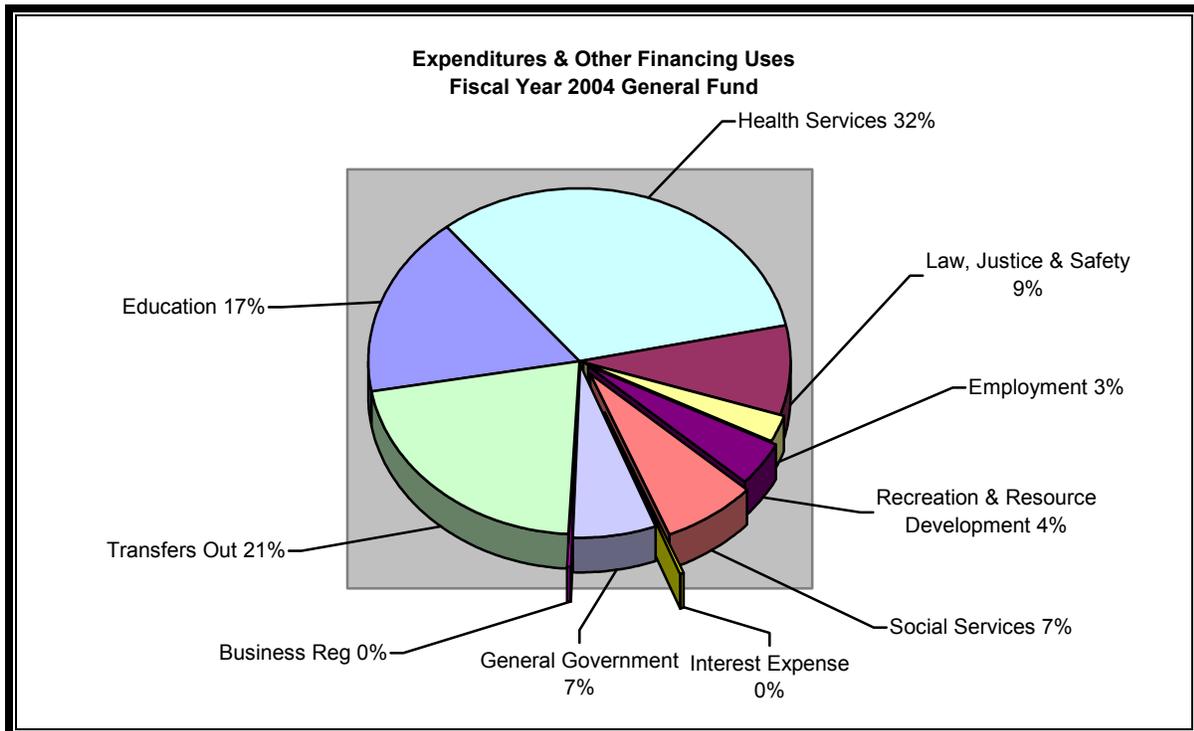

During the budgetary period, revenues were more than budgetary estimates, while expenditures were less than budgetary estimates.

The total general fund revenues are presented in a pie chart below to display how sources relate to total revenue. The table on the following page shows the change in 2003 and 2004 revenue sources. On page 13 and 14, General Fund expenditures are similarly presented, depicting functions as they relate to total expenditures.

As shown in the table following, total Revenue and Other Financing Sources increased 11% or \$146 million in fiscal year 2004. The General Fund portion of the Sales and Use Tax increased slightly with a 7 percent increase in total dollars collected. The \$70 million increase in Mineral Severance was due to the strong market for natural gas and other minerals. During fiscal year 2004, Investment Income increased 6% or \$7 million. Interest from the Permanent Trust fund directed to the General Fund increased by \$40 million as a result of the State Treasurer beginning to switch from fixed income investments to more equity investments. A decrease in the fair market value of investments between 2003 and 2004 of \$31 million was offset by a better result for investment income.

As shown in the table following, overall Expenditures and Other Financing Uses increased by 25% or \$318.2 million in fiscal year 2004. Transfers-out shows an increase of 534% or \$284 million due to a legislative transfer of \$305 million from the General Fund to the Budget Reserve Fund as of June 30, 2004. In 2004, the General Fund did not transfer any funds to the Permanent Mineral Fund, but did transfer \$312 million to the Budget Reserve Fund. General Government increased its expenditures by \$24 million, while Health Services increased by \$29 million due to an increase in federal programs and an increase in costs of existing programs.

Capital Asset and Debt Administration

Capital Assets. The State of Wyoming's investment in capital assets, net of related debt, for its governmental and business type activities as of June 30, 2004, amounts to \$193 million (net of accumulated depreciation). This investment in capital assets includes land, buildings and system, improvements, machinery and equipment, and park facilities.

Major capital asset events during the current fiscal year included the following:

- Construction was almost completed on the Law Enforcement Academy building and the Women's Center security system; \$3.8 million had been spent with a remaining encumbrance of \$752,964 at year end.
- A variety of construction projects were underway or began at the Wyoming State Hospital Individual Living apartments and Residential Facilities; construction in progress as of the close of the fiscal year had reached \$656,110.

More detailed information about the State's incomplete construction in progress is presented in Note 14 to the basic financial statements, on pages 59 – 66.

At the end of the fiscal year 2004, the State had invested \$315 million, net of accumulated depreciation, in a broad range of capital assets (see the table below). The accumulated depreciation as of June 30, 2004, totaled 305 million.

Additional information on the State of Wyoming's capital assets can be found in Note 5 on pages 45 - 47 of this report.

The State's Department of Transportation (DOT), a component unit of the State, is responsible for the majority of the infrastructure (consisting of roadways and bridges). As allowed by GASB Statement No. 34, DOT has adopted an alternative process for recording depreciation expense on selected infrastructure assets. Under this alternative method, referred to as the modified approach, DOT expenses certain maintenance and preservation costs and does not report depreciation expense. More detailed information about the DOT capital assets and the reporting criteria are available in the Wyoming Department of Transportation Component Unit Financial and Compliance Report as of September 30, 2003 and on page 69 - 70 of this report. DOT's policy is to maintain 83% of its national highway system bridges and 80% of its non-national highway system bridges in adequate or above condition. In 2003, 92% of all bridges were rated adequate or above. DOT's policy is to maintain its national highway system streets at an average rating of 3.25 and its non-national highway system streets at 3.0. In 2003, the National Highway System streets rated 3.48 and the non-national highway system rated 3.14.

Bonded debt. At the end of the current fiscal year, the State of Wyoming had total bonded debt outstanding of \$120 million. Of this amount, \$55 million represents bonds secured solely by specified revenue sources (i.e., revenue bonds). The remaining \$66 million is comprised of debt backed by the Wyoming Building Corporation, which is secured by a leased prison facility. The prison bonds were paid in full in September 2004.

The State of Wyoming's total bonded debt decreased by \$4 million during the current fiscal year due to bond principal payments.

The State of Wyoming maintained a "SP1+" rating from Standard & Poor's Corporation and a "FA+" rating from Fitch IBCA, Inc. for its tax and revenue anticipation notes. For the revenue refunding bonds the State received a "AA-" from Standard and Poor's Corporation.

The State of Wyoming has a debt limitation for revenue bonds relating to capital construction in the amount of \$105 million, which is significantly in excess of the outstanding revenue bond debt.

Additional information on the State of Wyoming's long-term debt can be found in Note 9 on pages 49 - 53 of this report.

Economic Outlook and Condition

According to the Economic Analysis Division's *Ten Year Outlook Wyoming Economic Forecast: 2003-2012*—for most economic indicators, Wyoming's economy does not mirror the national economy. Wyoming's state economy is one of the least diversified in the nation. This report further illustrates the importance of how the Mining Sector continues to be one of the most important sectors in Wyoming's economy. For example, data for the latest year cited 2000 showed that mining contributed 24 percent to the State's Gross State Product (GSP), while nationwide, this sector's contribution to the gross domestic product was 1.4 percent. Another report of the Economic Analysis Division, *Wyoming Gross State Product by industry (NAICS)*, for the year 2002 shows the mining sector contributing 43 percent to the State's Gross Product.

The other area, which this report cites as reflecting the magnitude of Wyoming's dependence on the mining industry, is the State's finances. Mineral Severance Taxes, Interest from the Permanent Mineral Trust Fund, mining related sales and use tax collections, a gross products tax levied on mineral production and Federal Mineral Royalties provide major sources of revenue for the State's General Fund, for primary and secondary education including school capital construction, and for cities, towns and counties of Wyoming. These sources combined are the primary reason Wyoming has no state personal or corporate tax and a comparatively low residential property tax.

This report's near-term outlook is for average growth supported by increased natural gas mining. Outside of the mining industry, however, the state's future prospects will be somewhat limited by a job market that fails to attract high-growth job opportunities. Although migration has recently reversed to a positive trend, many younger workers will be tempted to move to other states with more versatile job opportunities as their economies recover.

- As of June 2004, Wyoming's unemployment rate had decreased to 3.6 percent well below the rate for the same time the year before. This compares favorably with the 5.6% rate for the United States in June of 2004.

Reconciliation of the Balance Sheet to the Statement of Net Assets

June 30, 2004

Fund equity—total governmental funds \$ 5,391,059,861

Amounts reported for *governmental activities* in the statement of net assets are different because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds. 236,127,688

Other assets are not available to pay for current-period expenditures and therefore are deferred in the funds. 15,939,276

Internal service funds are used by management to charge the costs of certain activities, such as insurance telecommunications, technology and transportation to individual funds. The assets and liabilities of certain internal service funds are included in governmental activities in the statement of net assets. 45,063,817

Some liabilities are not due and payable in the current period and therefore are not reported in the fund.

These liabilities include:

Bonds Payable	(54,598,418)
Compensated Absenses	(35,742,591)
Retirement Obligations	(323,952)
Capital leases	(669,272)
Benefits Payable	(6,460,913)

Reconciliation of the Statement of Revenues, Expenditures & Changes in the Fund Balance to the Statement of Activities

For the Year Ended June 30, 2004

Net change in fund balances—total governmental funds \$ 620,271,420

Amounts reported for *governmental activities* in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays (\$19,213,268) exceeded loss on disposal of fixed assets (\$574,749) and depreciation (\$22,955,643) in the current period. (4,317,124)

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds. (17,446,845)

Repayment of bond principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. 1,700,000

Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds. 587,675

Internal service funds are used by management to charge the costs of certain activities, such as insurance, telecommunications, technology and transportation to individual funds. The net revenue (expense) of certain internal service funds is reported with governmental activities. 11,373,607

Change in net assets of governmental activities \$ 612,168,733

Notes to the Basic Financial Statements

For the Year Ended June 30, 2004

NOTE 1 Summary of Significant Accounting Policies

A. Reporting entity

An elected Senate and House of Representatives governs the State. As required by accounting principles generally accepted in the United States, these financial statements present the State and its component units. The component units discussed below are included in the State's reporting entity because of the significance of their operational or financial relationships to the State.

In accordance with Governmental Accounting Standards Board (GASB) Statement No. 14, *The Financial Reporting Entity*, entities over which the State has significant operational or financial relationships such as boards, commissions and authorities are considered component units. Component units are either discretely presented or blended. Discrete presentation entails reporting component unit financial data in columns separate from the financial data of the primary government (the State). Blending requires the component unit's balances and transactions be reported with the balances and transactions of the State.

The following organization is the State's blended component unit:

The Wyoming Building Corporation is an independent authority that finances, owns and operates real and personal property used by the State. The Bldg. Corp. is blended as an internal service fund in this report because it provides services almost entirely to the State. The State approves the appointment of the directors and The Bldg. Corp. is fiscally dependent on the State as the sole lessee of Bldg. Corp. assets. The Building Corporation issues a stand-alone financial report. Copies may be obtained by writing to Wyoming Building Corporation, 6101 North Yellowstone Avenue, Cheyenne, Wyoming, 82009.

The following organizations comprise the State's discretely presented component units:

The Wyoming Department of Transportation administers the State's construction and maintenance programs for roads and bridges and is legally separate from the State. The Governor appoints a voting majority of the DOT's Commission and is able to remove appointed board members at will. The financial information included for DOT relates to its fiscal year ended September 30, 2003.

The Wyoming Community Development Authority is an independent authority that provides low interest financing for Wyoming homebuyers. WCDA issues negotiable notes and bonds to fulfill its purpose. Neither the faith and credit nor taxing power of the State may be pledged for the amounts so issued. The State appoints a majority of WCDA board members and the State authorizes WCDA bond issuances; thereby, WCDA is financially accountable to the State.

The Wyoming Business Council is an independent authority that provides economic development and growth for the State. The State appoints all of the directors and provides a material subsidy to WBC.

The University of Wyoming is a public land grant research university serving as a statewide resource of higher education. The University of Wyoming is governed by a board made up of twelve members appointed by the Governor with the consent of the Senate.

B. Basis of Presentation

The accompanying financial statements of the State of Wyoming, (the State), have been prepared in conformity with generally accepted accounting principles (GAAP) applicable to governmental organizations in the United States.

The financial statements have been prepared primarily from accounts and records maintained by the State Auditor. Financial data for the Wyoming Retirement System (WRS), Wyoming Department of Transportation (DOT), University of Wyoming (University) including its component unit, the University of Wyoming Foundation (Foundation), Wyoming Community Development Authority (WCDA), Wyoming Building Corporation (Bldg. Corp.) and the Wyoming Business Council (WBC) have been derived from reports prepared by those organizations, based on independent accounting systems maintained by them.

C. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of inter-fund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The **Statement of Net Assets** presents the reporting entities' non-fiduciary assets and liabilities, with the difference reported as net assets. Net assets are reported in four categories:

- **Invested in capital assets**, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes, and other debt that are attributed to the acquisition, construction, or improvement of those assets.
- **Restricted net assets – expendable** include resources in which the State is legally or contractually obligated to spend resources in accordance with restrictions imposed by external third parties.
- **Restricted net assets – nonexpendable** consist of endowment and similar type funds in which donors or other outside sources have stipulated, as a condition of the gift instrument, that the principal is to be maintained inviolate and in perpetuity, and invested for the purpose of producing present and future income, which may either be expended or added to principal.
- **Unrestricted net assets** consist of net assets that do not meet the definition of the three preceding categories. Unrestricted net assets often are designated, to indicate that management does not consider them to be available for general operations. Unrestricted net assets often have constraints on resources that are imposed by management, but can be removed or modified.

The **Statement of Activities** demonstrates the degree, to which the direct expenses, of a given function, or segment, are offset by program revenues. *Direct expenses* are those that are clearly identifiable within a specific function or segment.

The cost allocation by internal service is included in the direct expenses. *Program revenues* include 1) charges to customers or applicants who purchase, use or directly benefit from goods services, or privileges provided by a given function and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements, with non-major funds being combined into a single column.

D. Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Revenues are classified by program and general revenues. Program revenues include 1) charges to customers or applicants for goods and services 2) operating grants and contributions, and 3) capital grants and contributions. General revenues consist of all revenues not considered program revenue. All taxes are considered general revenues. Certain indirect costs have been allocated to functional activities.

As permitted by GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Funds that use Proprietary Fund Accounting*, the State has elected not to adopt Financial Accounting Standards Board (FASB) statements issued after November 30, 1989, unless the GASB specifically adopts such FASB statements.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60-75 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt services expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

During the year the State changed its' accounting for game licenses. Previously, the State recognized game licenses from its June Drawings in the fiscal year containing the hunting season. As the majority of fees are received in the fiscal year preceding the hunting season, these receipts were reflected as deferred revenue in the year end financial statements. The State is now recognizing fees for game licenses in the fiscal year they are received for fund level statements and at the time the draws are conducted for the entity-wide statements.

Sales and Use tax, Mineral Severance tax, Federal Mineral Royalty tax, and interest associated with the current fiscal period are all considered to be susceptible to accrual and have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the State.

Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of operations.

The State uses funds and component units to report its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain functions or activities.

Governmental Funds:

The State reports the following **major governmental funds**:

- a. General Fund as the primary operating fund of the State, accounts for all financial resources except those required to be accounted for in another fund.
- b. Foundation Program Fund accounts for federal mineral royalties, mineral severance tax and other revenue sources, which are restricted for payments to school districts.
- c. Budget Reserve Fund accounts for mineral severance tax and other revenue sources, which are restricted for specific appropriation by the legislature.
- d. Common School Land Fund accounts for land donated to the State and income derived from those lands. The revenue earned by this fund is restricted for the purpose of establishing, maintaining, and supporting school facilities.
- e. Permanent Mineral Trust Fund accounts for a portion of severance tax. The interest earned by this fund is restricted for distribution to specific funds.

Enterprise Funds account for operations (a) that are financed and operated in a manner similar to private enterprise- where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the State has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

Revenue and expenses are classified as operating and non-operating. Operating revenues and expenses generally result from providing goods and services. All other revenues and expenses are reported as non-operating.

The State reports the following **major enterprise fund**:

- a. Workers' Compensation Insurance Fund accounts for activities of the Wyoming Workers' Compensation Insurance fund that provides workers' compensation insurance to government and private businesses.

Internal Service Funds account for the financing of goods or services provided by one department or agency to other departments or agencies of the State, or to other governmental units, on a cost-reimbursement basis. The Internal Service Funds include the Computer Technology Fund, Motor Vehicle Fund, Central Duplicating Fund, Telecommunications Fund, Group Insurance Fund, Wyoming Surplus Property Fund, Personnel/Training Fund, State Self Insurance Fund, and the Wyoming Building Corporation.

Fiduciary Funds:

- a. Pension Trust Funds account for the assets held by WRS, as trustee, for seven retirement systems. The financial information included for WRS relates to its fiscal year ended December 31, 2002. WRS is legally separate from the State. However, the State appoints a voting majority of the WRS board, sets the contribution requirements and has a fiduciary responsibility for WRS assets.
- b. Private-Purpose Trust Funds account for resources of all other trust arrangements in which principle and income benefit individuals, private organizations, or other governments (i.e., Unclaimed Property/Escheat property, and College Savings).
- c. Investment Trust Fund accounts for the assets belonging to Wyoming municipalities invested by the State Treasurer (i.e., WYO-Star).
- d. Agency Funds account for assets that the State holds on behalf of others as their agent.

Component Units account for the activities of legally separate organizations for which the elected officials of the State are financially accountable.

E. Assets, liabilities, and net assets or equity

1. **Deposits and investments.** Current statutes require all cash and investments of State agencies other than those of the University and the WRS to be pooled and invested by the State Treasurer's Office. The State Treasurer maintains different cash and investment pools for the Common School, Permanent Mineral, Worker's Compensation, Tobacco Settlement, and Water funds and one cash and investment pool for the remainder of the fund types. Earnings from the cash and investment pools are credited monthly, utilizing a formula based on the average daily balance, to the applicable accounts and funds. The majority of the funds maintained by the State are not legally allowed to earn interest. The interest earned by these funds is credited directly to the general fund. The State reports all investments at fair value, except for investments in participating interest-earning investment contracts having a remaining maturity at time of purchase of one-year or less. Participating interest earning investment contracts having a remaining maturity at time of purchase of one-year or less are recorded at amortized cost. For the purpose of the statement of cash flows, the State considers all assets held in the cash and investment pool to be cash equivalents because the investments are not identifiable to specific funds and the assets can be withdrawn at any time, similar to a demand deposit account.
2. **Receivables and Payables.**
 - a. **Due to Due From.** During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "Due from Other Funds" or "Due to Other Funds" in the balance sheet. See Note 6.
 - b. **Property Taxes.** The counties in the State levy property taxes in the first half of August and submit a portion of the tax levy to the State. The tax levy is divided into two billings: the first billing is mailed in the first half of September, generally September 1; the second billing is generally mailed on March 1. The billings are considered due upon receipt by the taxpayer. The taxpayer has the option of paying the full amount on December 31. In accordance with State statute, the lien date is between August and September of the following year.
 - c. **Advances to other funds and component units.** Inter-fund loans receivable are reported as advances and are offset equally by a fund balance reserve account that indicates they do not constitute expendable available financial resources and therefore, are not available for appropriation.
3. **Inventories.** Inventories are reported in the proprietary funds using the lower of average cost or market. In the governmental fund types, inventories are accounted for at cost or average cost on a first-in, first-out basis. Inventory items are considered expenditures when purchased. However, as inventories on hand at June 30, 2004, are significant, they have been recorded as assets in the governmental funds. Inventories are reported by the University at the lower of cost (first-in, first-out) or market except for livestock inventory that is reported at net realizable value. The Department of Transportation's inventories are valued at average cost, less an allowance for obsolete items and charged to expenditures when consumed.
4. **Securities lending collateral.** Securities on loan for cash collateral are reported in the Statement of Net Assets. Liabilities resulting from the security lending transactions are also reported. Additional disclosures describing security-lending transactions are provided in Note 3.
5. **Capital assets.** Capital assets, which include property, plant and equipment, and infrastructure assets are reported in the governmental or business-type activities columns in the government-wide financial statements (Statement of Net Assets). Capital assets are stated at cost where historical records are available and at an estimated historical cost where no historical records exist. Donated capital assets are stated at their estimated fair market value on the date received. The State currently does not capitalize interest costs incurred during construction, except on business-type activities. Capital assets of the business-type activities are capitalized in the fund in which they are utilized. The State's capital assets are depreciated over their useful lives using the straight-line basis.

- a. **Property, plant and equipment.** The State capitalizes all buildings, land and other capital assets that have a value or cost of \$500 or more at the date of acquisition and have an expected useful life of one year or more. Estimated useful lives for capital assets are all being depreciated on a straight line basis as follows:

Class	Estimated Life
Buildings & Bldg. Improvements	40 years
Vehicles	3 - 7 years
Equipment	3 - 17 years

- b. **Infrastructure.** Infrastructure assets can include roads, bridges, lighting systems, drainage systems and flood control systems, and rest areas. The primary government will have infrastructure in the State Parks and Cultural Resources division and the Department of Game and Fish. Department of Transportation (DOT) reports most of the infrastructure assets for the State. DOT's capitalization level for infrastructure is \$250,000. In accordance with the alternative approach to depreciating infrastructure assets permitted by GASB Statement No. 34, DOT has elected to expense all infrastructure related expenditures, except for those expenditures related to improvement of infrastructure assets, in lieu of depreciating infrastructure assets. In order to utilize the alternative system, DOT must maintain an asset management system that will assess asset condition and must maintain infrastructure assets at the condition level DOT established.
- c. **Art and the Wyoming State Museum Collection.** The State has not capitalized works of art, historical treasures and artifacts contained in the collections of the Wyoming State Museum. The collection is held for public exhibition, education, or research in furtherance of public service, protected, kept unencumbered, cared for, preserved, and subject to an organizational policy that requires the proceeds from sales of collection items to be used to maintain the existing collection.
6. **Compensated absences.** Employees of the different State agencies earn vacation leave, based on their number of years of service, and sick leave of one day per month. Employees are vested and allowed to accumulate up to 480 hours of vacation leave. In addition, employees are paid for one half of accumulated sick leave upon termination of employment with a maximum payment for one half (½) of 960 hours. The amount of vested accumulated leave that is expected to be liquidated with expendable available financial resources is reported as an expenditure and a liability of the governmental funds in the government fund financial statements. Amounts of vested accumulated leave not expected to be liquidated with expendable available financial resources is not reported by the governmental funds in the government fund financial statements. All vested accumulated leave is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements.
7. **Deferred Revenue.** The State reports deferred revenue on its government-wide statements and its fund financial statements. Deferred revenue arises when resources are received by the State before it has legal claim to them, as when grant funds are received prior to the occurrence of qualified expenditures. In subsequent periods, when both revenue recognition criteria are met, or when the State has a legal claim to the resources, the liability for deferred revenue is removed and the revenue is recognized.
8. **Long-term obligations.** In the government-wide statements and proprietary fund financial statements, long-term liabilities are reported as liabilities. Long-term debt is recognized as a liability of a governmental fund when due, or when resources have been accumulated in the debt service fund for payment early in the following year. For other long-term obligations, only that portion, expected to be financed, from expendable available financial resources is reported as a fund liability of a governmental fund. Long-term liabilities expected to be financed from proprietary fund operations are accounted for in those funds.
9. **Fund equity.** Portions of fund equity are reported in the fund financial statements as "reserved" to indicate (1) amounts not available for expenditure, such as equity represented by inventory and prepaid items; and (2) amounts legally segregated for a specific future use, such as those pledged for debt service, or legally binding contractual agreements. Designated fund balance represents tentative plans for future use of financial resources. As of June 30, 2004, Workers' Compensation, an enterprise fund, reported an accumulated deficit of \$173 million. The State is in the process of developing a plan to fully fund workers' compensation liabilities by 2008 through premium rate adjustments. As of June 30, 2004, The Bldg. Corp., an internal service fund, reported an accumulated deficit of \$558,436. The negative net assets will be funded through future lease payments.
10. **Inter-fund Transactions.** Inter-fund services provided and used are accounted for as revenue, expenditures or expenses. Transactions that constitute reimbursements to a fund for expenditures/expenses initially made from it that are properly applicable to another fund, are recorded as expenditures/expenses in the reimbursing fund and as a reduction of expenditures/expenses in the fund that is reimbursed. All other inter-fund transactions are reported as transfers. As a general rule, the effect of inter-fund activity has been eliminated from the government-wide statements. Inter-fund receivables and payables have been eliminated from the Statement of Net Assets, except for the residual amounts due between governmental and business-type activities. See further information in Note 7.

NOTE 3 Deposits and Investments

Accounting principles generally accepted in the United States require all deposits and investments of a governmental entity to be categorized according to the level of risk associated with the deposits and investments. In addition, GASB Statement 14 requires separate deposit and investment risk information to be provided for each of the State's component units. This note includes separate deposit and investment disclosure for the University, WRS, DOT, Bldg. Corp., WBC, and WCDA. However the cash and investments for these entities, which are held in the State cash and investment pool at June 30, 2004 are included only in the risk disclosure for the State as a whole. The deposit risk categories and the investment risk categories used in this note are as follows:

Deposit risk categories

- *Category 1*) Deposits that are federally insured or collateralized with securities held by the State (component unit) or by its agent in the State's (component unit's) name.
- *Category 2*) Deposits that are uninsured but fully collateralized with securities held by the pledging financial institution's trust department or agent in the State's (component unit's) name.
- *Category 3*) Deposits that are collateralized with securities held by the pledging financial institution or by its agent but not in the State's (component unit's) name and non-collateralized deposits.

Investment Risk categories

- *Category 1* Investments that are insured or registered, or securities held by the State (component unit), or its agent in the State's (component unit's) name.
- *Category 2* Uninsured and unregistered investments for which the securities are held by the counter party's trust department or agent in the State's (component unit's) name.
- *Category 3* Investments that are uninsured and unregistered, with securities held by the counter party, or by its trust department or agent but not in the State's (component unit's) name.

These investments, in general, are exposed to various risks, such as interest rate, credit, foreign currency and overall market volatility risk. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the basic financial statements.

State of Wyoming

The following table presents the deposits held by the State at June 30, 2004 categorized to give an indication of the level of risk assumed by the State. The categories used are defined above.

	Deposit Risk Category			Bank Balance	Carried At
	1	2	3		
Bank Deposits	\$ 200,000	\$ 5,658,818	\$ 0	\$ 5,858,818	**
Time Deposits	500,000	8,700,000	0	9,200,000	9,200,000
	\$ 700,000	\$ 14,358,818	\$ 0	\$ 15,058,818	

** As part of its cash management procedure, the State transfers funds to deposit accounts daily as warrants are presented.

Additionally, the State holds funds not required to be collateralized on behalf of others. At year end, \$5,219,199 was held in demand and savings bank accounts and \$14,322,979 was held in bank certificates of deposit. These funds are reported in the agency funds.

University of Wyoming

At June 30, 2004, the University had \$30,001,905 on deposit with the State Treasurer. The carrying amount of the University's deposits, other than the amount on deposit with the State Treasurer and \$62,789 of cash with the University of Wyoming Foundation (Foundation) less \$404,739 of University cash eliminated because it is also included in Foundation investments, was \$13,784,920 and the bank balance was \$16,762,175, which is categorized below to give an indication of the level of credit risk assumed by the University. The difference between the carrying amount and the bank balance is a result of transactions in transit.

	Deposit Risk Category			Bank Balance
	1	2	3	
Bank Deposits	\$ 300,000	\$ 14,062,175	\$ 0	\$ 11,384,920

Wyoming Retirement System, Department of Transportation

Deposits for WRS, as of December 31, 2003, and DOT, as of September 30, 2003 amounting to \$4,391,667 and \$41,833,436 respectively are in the pooled cash account managed by the Wyoming State Treasurer. Deposits as of June 30, 2003 for WRS and DOT are included in the State's deposit and investment disclosure risk table.

Wyoming Community Development Authority

At June 30, 2004, WCDA had \$3,503,085 on deposit with a Trustee. The carrying amount of WCDA bank deposits, other than the amount on deposit with the State Treasurer, was \$3,339,074 and the bank balance was \$3,890,986. The difference between the carrying amount and the bank balance is a result of transactions in transit. All bank deposits at June 30, 2004, were covered by insurance or collateral held in joint custody with the financial institution.

Investment Authority

State statutes authorize the State to invest in securities issued or guaranteed by the U.S. Treasury or agencies of the United States government; bonds issued by Wyoming agencies or political subdivisions; corporate notes, bonds, and debentures; commercial paper; banker's acceptances; loans specifically identified by statutes; and other securities specifically authorized by the legislature.

During the 2000 session, legislators authorized monies in the permanent fund to be invested in common stock of United States Corporations not to exceed fifty-five percent (55%) of the State's cash balance. The State invests in mortgage-backed securities in part to maximize yields and in part to hedge against a rise in interest rates. These securities are based on cash flows from interest payments on underlying mortgages. Therefore, they are sensitive to pre-payments by mortgagees, which may result from a decline in interest rates. For example, if interest rates decline and homeowners refinance mortgages, thereby prepaying the mortgages

underlying these securities, the cash flows from interest payments are reduced and the value of these securities declines. Likewise, if homeowners pay on mortgages longer than anticipated, the cash flows are greater and the return on the initial investment would be higher than anticipated.

State of Wyoming

The following table presents the investments held by the State at June 30, 2004 categorized to give an indication of the level of risk assumed by the State. The risk categories used were previously defined.

	Investment Risk Category			Cost	Fair Value

Total				\$ 8,641,867,114	\$ 8,566,146,432

Investments in certain loans and other investments held by the State Treasurer cannot be categorized because securities are not used as evidence of the investment. In addition, the State holds \$2,114,307 of WCDA mortgage bonds, which are categorized as the mortgage purchase program in the disclosure of custodial credit risk above.

Investments which are reported in category three are securities lent out which are collateralized by cash and securities which are subsequently used to purchase investments held by the State's agent, in the agent's name.

Securities Lending Transactions. State Statutes permit the State Treasurer to lend its securities, through the use of an agent, to broker-dealers and other entities with simultaneous agreement to return the collateral for the same securities in the future. The State's agent lends securities, of the type on loan at year-end, for collateral in the form of cash or other securities at 102 percent of value. The State, through its agent, measures the fair value of the securities loaned against the fair value of the collateral on a daily basis. Additional collateral is obtained as necessary to ensure such transactions are adequately collateralized. Securities lent for securities collateral are classified according to the category for the collateral. At year-end, the State has no credit risk exposure to borrowers because the amounts the State owes the borrowers exceed the amounts the borrowers owe the State. The contract with the State's agent requires it to indemnify the State if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or fail to pay the State for income distributions by the securities' issuers while the securities are on loan.

The following represents the balances relating to the securities lending transactions at the financial statement date:

Securities Lent	Fair Value of Underlying	
	Securities	Collateral Received
Lent for Cash Collateral		
U.S. Government & Agencies Securities	\$ 2,578,253,104	\$ 2,652,626,679
Mortgage Backed Bonds	87,852,382	88,490,218
Corporate Securities	100,758,551	95,077,250
Equities	54,138,717	63,317,193
Lent for Securities Collateral		
U.S. Government & Agencies Securities	253,947,194	262,573,988
	\$ 3,074,949,948	\$ 3,162,085,328

Either the agent or the borrowers can terminate all securities loans on demand, although the average term of the loan is eleven days. Cash collateral is invested in the lending agent's short-term investment pool, which at year-end has a weighted-average maturity of 209 days. The relationship between the maturities of the investment pool and the State's loans is affected by the maturities of securities loans made by other entities that use the agent's pool, which the State cannot determine. The State cannot pledge or sell collateral securities received unless the borrower defaults. At June 30, 2004, the cash collateral of \$2,899,511,340 was recorded as cash and investments with trustee and as a liability under security lending.

Unemployment Compensation Fund. At June 30, 2004, the State had Amounts on Deposit with the U.S. Treasury of \$166,776,152, which are held in trust for unemployment benefits and administration of those benefits.

University of Wyoming

For endowment funds, the University has authority to invest in equity or non-equity investments. State statutes authorize agencies of the State to invest public funds in United States treasury bills, notes, bonds, or other obligations that are unconditionally guaranteed or insured by the United States Government or an agency thereof. At June 30, 2004, these investments are categorized below to give an indication of the level of credit risk assumed by the University.

Wyoming Retirement System

Investment Authority

State statutes authorize the WRS to invest exercising the judgment and care that a prudent investor would in light of the purposes, terms, distribution requirements and all other circumstances surrounding the monies in the retirement account, including risk and return objectives established by the board which are reasonably suitable to the purpose of the Wyoming retirement account.

The purchase of mortgage backed securities that are defined as high risk is prohibited. High-risk mortgage backed securities are those that are rated V-6 or higher by Fitch Investors Services. The bank balance and the carrying amount of WRS deposits, other than those with the State Treasurer, at December 31, 2003 were as follows:

Wyoming Community Development Authority

The WCDA trust indentures and State statutes authorize the types of investments in which WCDA invests. Among these authorized investments are certificates of deposit, obligations of the U.S. Treasury, agencies and instrumentalities of the U.S. Government, and repurchase agreements with banks with the underlying securities being obligations of the U.S. Treasury, or agencies and instrumentalities of the U.S. Government. The investments are carried at fair value except for certificate of deposits that are carried at cost.

Investments, including the underlying securities for repurchase agreements, are held by the Authority's Trustees in the Authority's name. Guarantee investment contracts which have a maturity beyond 18 months are generally guaranteed by AAA rated institutions or collateralized. The components of the Authority's investment portfolio are as follows:

	2004
Investments:	
Certificates of deposit	\$ 376,547
U.S. Government and agency securities	208,921,593
Guaranteed investment contracts	19,885,000

WYOMING BUILDING CORPORATION

The Bldg. Corp. deposits consist of non-classified money market funds of \$2,882,673 at June 30, 2004, invested in U.S. Government Securities.

WYOMING BUSINESS COUNCIL

Deposits for WBC are primarily invested in the pooled cash account of \$23,035,194 managed by the State and included in the State's deposit and risk disclosure above. WBC also has funds deposited in a bank money market account and certificate of deposit that are fully insured by the Federal Deposit Insurance Corporation (FDIC). At June 30, 2004, the amounts deposited in these bank accounts totaled \$54,625.

WYO-Star

The Wyoming State Treasurer's Asset Reserve fund (WYO-Star) has been established, in accordance with Wyoming statute 9-1-416 to invest funds upon request of any county, municipality, school district or any other local governmental entity. The State Land and Investment Board oversees the WYO-Star program and there is no involuntary participation in WYO-Star. In accordance with GAAP, the external portion of WYO-Star is reported as an investment trust fund in the Fiduciary Funds, using the economic resources measurement focus and accrual basis of accounting, due to the State's fiduciary responsibility. The internal portion of the pool is reported in the Deferred Compensation Fund of the Wyoming Retirement System and the University of Wyoming. The investments of WYO-Star are carried at their fair value as determined at June 30th each year. A ratio based on the participants share to the total share invested in WYO-Star is used to determine each participant's share. The State has not provided or obtained any legally binding guarantees during fiscal year 2004 to support the value of the shares.

The CMO/REMIC investments have stated interest rates that range from 3.1% to 5.5% and corresponding maturity dates from September 2022 to May 2032. The discounted notes have no stated interest rates with maturities ranging from July 2004 to May 2005. The Mortgage Backed Bonds have stated rates that range from 4% to 10% with corresponding maturity dates from March 2005 to April 2034. The government/mortgage backed bonds have stated interest rates that range from 1.5% to 4.1% with corresponding maturities from October 2004 to August 2008.

The following table presents the investments held by the State at June 30, 2004 categorized to give an indication of the level of risk assumed by the State. The categories used are defined above.

NOTE 6 Receivables and Payables

On the Statement of Net Assets the "Due to Primary Government" and the "Due from Component Unit" does not balance by \$1,074,231. The "Due to Component Unit" and the "Due from Primary Government" does not balance by \$32,756,629. These differences are due primarily to the Department of Transportation's September 30 fiscal year end.

To the extent that certain transactions between funds had not been paid or received as of June 30, 2004, balances of inter-fund amounts receivable or payable have been recorded as presented below. Amounts due to internal service funds are generally for services performed by those funds. The amount due to the Budget Reserve Fund reflects the amount due for a transfer from the General Fund in compliance with a legislative directive. The principle amounts of the balances within the Non-Major Governmental Funds represent advances between funds.

Payable Fund	Receivable Fund						Total
	General Fund	Budget Reserve Fund	Workers' Compensation Fund	Non-Major Governmental Funds	Non-Major Enterprise Funds	Internal Service Fund	
Major Funds:

The \$470,574 and the \$1,086,396 from the preceding table do not balance to the Balance Sheet for governmental funds by \$401 and \$3,238, respectively. The differences result from the Wyoming Retirement System, which has a different fiscal year, not being presented in the above schedule.

NOTE 7 Inter-fund Transfers

Transfers are used to 1) move revenues from the fund that statute requires to collect them to the fund that statute requires to expend them; 2) use unrestricted revenues collected in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations; and 3) move profits from the Liquor Commission Fund (\$6.8 million) as required by law.

In the fiscal year ended June 30, 2004, the significant transfers include transfers to the General Fund from the Non-Major Governmental Funds representing excess revenues not needed in those funds (\$2.5 million), the movement of revenues received from the Federal Jobs & Growth Tax Relief Act (\$50 million). The significant transfers to the General Fund from the Budget Reserve Fund are made for Medicaid costs due to additional caseloads (\$6.8 million), and the cost of housing out-of-state inmates (\$1.6 million). Transfers from the Common School Land Fund for (\$66.7 million) are the investment income that is distributed to the Foundation Program Fund for the expenditures in that fund. These transfers were made in accordance with statutory authority granted by the Legislature. The Legislature also subsidized capital construction in school districts throughout the state by a \$16,483,677 transfer to the Foundation Program Fund from the General Fund. The General Fund transferred approximately \$305 million of funds representing unreserved fund balance in excess of \$10 million to the Budget Reserve Fund in compliance with a legislative directive.

NOTE 8 Short-Term Debt

The State issues tax and revenue anticipation notes. These notes were necessary to cover temporary cash shortages in the School Foundation Fund due to the timing of revenue collection.

A. Capital Leases

The State has entered into various leases, and lease purchase agreements for buildings and equipment that have been accounted for as capital leases in accordance with generally accepted accounting principles. Lease contracts are required by law to contain a fiscal funding clause indicating continuation of the lease is subject to funding by the legislature.

Future minimum lease payments under capital lease, for the State's governmental activities and the University as of June 30, 2004, are as follows:

Wyoming Building Corporation

The Building Corporation issued \$50,390,000 of revenue bonds in 1998, \$13,045,000 in 2000, and \$9,130,000 in 2001. The bonds are limited obligations of the Corporation and do not constitute an obligation or guarantee of the State or of its agencies or political subdivisions. The bonds are secured with the newly constructed prison and repayments will be made through lease payments by the State for the use of the prison. Lease revenue of \$6,663,994 for the year ended June 30, 2004 was pledged as security for the bonds. Interest on the bonds payable range from 3.70% to 6.0% and is payable semi-annually. The bonds require semi-annual principal payments through October 2022.

Aggregate maturities including interest of \$33,631,644 required on the bonds at June 30, 2004 are as follows:

Year Ending June 30th	Principal	Interest	Total
2005	\$ 2,560,000	\$ 3,311,991	\$ 5,871,991

Wyoming Community Development Authority

WCDA bonds are generally payable in scheduled annual and semiannual installments and are subject to mandatory sinking fund requirements in scheduled amounts. Redemption is optional after various dates at prices ranging from 100 to 103 per 100. Capital Appreciation Bonds ("CABs") are reported at accreted value. The bonds of the 1978, 1992, 1994 and 1999 Indentures are special obligations of the WCDA, payable solely from the income and receipts of these indentures. The bonds of the 1982 Trust Indenture are general obligations of the WCDA payable from any of its revenues, income and receipts. Mortgage loans and other assets of the respective indentures secure all of the bonds. Interest on all outstanding bonds is payable semi-annually, except 2001 Series A Bonds, 2002 Series A Bonds, 2001 Series 7 Bonds, 2002 Series 8 Bonds, 2003 Series 4 Bonds, 2004 Series 3 Bonds, 2003 Series B Bonds, CABs, Draw Down Bonds Series 2001 Bonds and Wyoming Homeownership Bonds Series I.

The WCDA entered into a line of credit agreement with a financial institution, secured by specific investments. The agreement allows the Authority to borrow approximately 80% of the value of the investment collateral. As of June 30, 2004, the Authority had investments worth approximately \$11,500,000 on deposit with this financial institution: however, no amounts were outstanding on this line of credit.

C. Prior Year Defeasance of Debt

State of Wyoming

In prior years, the State defeased certain revenue bonds by placing the proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the State's financial statements. As of June 30, 2004, \$4.5 million of 1991 Capital Facilities bonds outstanding are considered defeased.

D. Early Retirement Plan

In Fiscal Year 1995, Wyoming Session Law 207 provided for an early retirement incentive program. This allowed employees with at least 15 years of service and a minimum of age 55 to retire early. Under the plan, qualifying employees of less than 61 years of age at retirement receive 20 percent of their regular salary in monthly payments to age 62 and a \$215 monthly medical insurance contribution to age 65. Those age 61 and older receive a lump sum payment of three months regular salary and the \$215 monthly medical insurance contribution to age 65. The early retirement plan is funded on a pay-as-you-go basis where payments to early retirees are funded from the fund from which the electing employee's salary had been paid prior to retirement. The number of people participating in the plan is as follows: University, 5; DOT, 10; and all other State agencies, 73. The amount of post employment benefit expenditures during fiscal year 2004 for the University, DOT and all other State agencies were \$119,938, \$487,096 and \$319,930, respectively. The liabilities for the early retirement plans as of June 30, 2004 are as follows:

	University of Wyoming		Department of Transportation		All Other State Agencies	
1995 Early Retirement	\$	119,251	\$	613,358	\$	377,274

The University and DOT have discounted their liabilities for early retirement. UW 8%, DOT 4%, while the State used no discounting.

NOTE 11 Lease Revenue

Lease revenue

The State possesses significant amounts of land of which the majority was received from the federal government when the Wyoming Territory was incorporated as a state. Such land is leased to third parties under leases accounted for as operating leases. Future minimum rents receivable under these lease agreements as of June 30, 2004 are as follows:

Year Ending June 30th	Governmental Funds

NOTE 12 Pensions

State employees are eligible to participate in one of five different pension plans, depending on their current employment position. These plans are administered by the Wyoming Retirement System (WRS). WRS is the administrator of seven multiple-employer cost-sharing public employee retirement systems (PERS) and the Wyoming Deferred Compensation (457) Plan as authorized by the State legislature. The responsibility for the administration and operation of six of the retirement plans and the Deferred Compensation Program is vested in the Wyoming Retirement Board.

The Board is composed of ten members appointed by the Governor plus the State Treasurer, an elected official. A board of volunteer firemen appointed by the Governor supervises the seventh plan. The system consists of: Wyoming Retirement System Fund; Wyoming State Highway Patrol and Game and Fish Warden, Division of Criminal Investigators and Capital Police Retirement Fund; Volunteer Firemen's Pension Fund; Paid Firemen's Pension Fund-Plan A; Paid Firemen's Pension Fund-Plan B; Wyoming Judicial Retirement Fund, Wyoming Law Enforcement Retirement Plan, and the Section 457 Plan. Over 500 counties, municipalities, school districts and other units of government participate in the Wyoming Retirement System. The Wyoming Retirement System was established in 1943 as a teachers' pension plan and amended in 1949 to incorporate State employees.

The State reports all the plans administered by the Wyoming Retirement System as Pension Trust Funds. The Pension Trust Funds are presented on the accrual basis of accounting with investments valued at fair value determined, primarily, by the latest bid price or the closing exchange price at the balance sheet date. WRS issues a stand-alone financial report. It can be obtained by writing to the Wyoming Retirement System, 1st floor East - Herschler Bldg., Cheyenne, WY, 82002, or by calling 307-777-7149. The WRS fiscal year end statements are as of December 31, which the State uses for its June 30th report.

The State administers the Wyoming Judges Retirement Plan, which is a non-funded single-employer defined-benefit pension plan. No report is issued for this plan.

Defined Contribution Plan

The State legislature authorizes, in W.S. 21-19-101 through 106, eligible University employees to have the option of participating in either WRS or Teachers Insurance and Annuity Association - College Retirement Equities Fund (TIAA-CREF). The governing body of the University establishes and administers TIAA-CREF, a defined contribution plan, for the employees. The same required percentages apply to TIAA-CREF as for WRS, which is 11.25%. The University's contribution is funded as it accrues and, along with that of the employees, as determined, is immediately and fully vested. The University pays 100% of the required contribution. The contributions for the years ended June 30, 2002, 2003, and 2004 were \$6,989,770, \$8,210,546, and \$8,600,589 respectively which equals the required contribution for the years then ended.

Plan Descriptions

Wyoming Retirement System:

The Wyoming Retirement System is a defined benefit, contributory retirement plan as authorized by W.S. 9-3-401 through 432. It covers substantially all employees of the State and of the public school systems of Wyoming. The plan also covers employees of those political subdivisions that have elected to participate in the plan. The plan allows for normal retirement after four years of service and attainment of age sixty. Early retirement is allowed provided the employee has completed four years of service and attained age fifty, but will result in a reduction of benefits based on the length of time remaining to normal retirement age. The plan provides retirement, disability and death benefits according to pre-determined formulas and allows retirees to select one of seven options for receiving benefits. Employees terminating prior to normal retirement can elect to withdraw all employee contributions plus accumulated interest through the date of termination or if they are vested, they may elect to remain in the plan and be eligible for retirement benefits at age fifty.

Wyoming State Highway Patrol and Game and Fish Warden, Division of Criminal Investigators and Capital Police Retirement Fund:

The Wyoming State Highway Patrol, Game and Fish Warden, Division of Criminal Investigators and Capital Police Retirement Fund is a defined-benefit, contributory plan, established by W.S. 9-3-601 through 620. It covers sworn officers of the Wyoming State Highway Patrol and law enforcement officers employed by the Wyoming State Game and Fish Department who are not covered under the Wyoming Retirement System, sworn peace officers of the Division of Criminal Investigation and Capitol Police Officers. The plan allows for normal retirement at age fifty. The plan provides retirement, disability and death benefits according to pre-determined formulas. Terminating employees are entitled to a refund of employee contributions plus accumulated interest. The maximum service pension is 75% of the highest average salary. The minimum years of service required for monthly pension benefits is 6 years.

Volunteer Firemen's Pension Fund:

The Volunteer Firemen's Pension Fund is a defined-benefit, contributory retirement plan, authorized by W.S. 35-9-601 through 615. It covers volunteer firemen who elect to participate in the plan. The plan provides retirement, and death benefits according to pre-determined amounts primarily determined by age and years of service of the participant. Participants may withdraw from the plan at any time and receive refunds of participant contributions plus accumulated interest.

Paid Firemen's Pension Fund, Plans A and B:

The Paid Firemen's Pension Funds are defined-benefit, contributory retirement plans, as authorized by W.S. 15-5-201 through 422. They cover paid firemen who elect to participate. The plans provide retirement, disability and death benefits according to pre-determined amounts primarily determined by years of service and average salaries. Participants may withdraw from the plans at any time and receive refunds of participant contributions without interest.

Wyoming Judicial Retirement Fund:

The Wyoming Judicial Retirement Fund is a defined-benefit, contributory retirement plan, as authorized by W.S. 9-3-701 through 713. It covers any justice of the Supreme Court, district judge or county court judge appointed to any of these offices on or after July 1, 1999. The plan provides retirement and death benefits according to predetermined amounts primarily determined by age and years of service. Participants may withdraw from the plan at any time and receive refunds of participant contributions plus accumulated interest.

Wyoming Law Enforcement Plan:

The Wyoming Law Enforcement Retirement Plan is a defined benefit, contributory plan covering any county sheriff, deputy county sheriff, municipal police officer, Wyoming correctional officer, Wyoming law enforcement academy instructor, University of Wyoming campus police officer, detention officer or dispatcher for law enforcement agencies and certain investigators of the Wyoming Livestock Board. Established July 1, 2002, it consolidated six first class cities police pension funds and allowed for other law enforcement officers to participate. The Plan statutorily provides retirement, disability and death benefits according to predetermined amounts primarily determined by salary, age and years of service of the participant.

The Section 457 Plan

The Section 457 Plan administered by the Wyoming Retirement System is a defined contribution plan. This Plan is available as a supplemental plan to the basic retirement benefits of the Retirement System for employees of public employers who have adopted

the 457 Plan. The Plan may receive contributions made (subject to Plan and Internal Revenue Code limitations) by employees of participating employers sponsoring the Plan. Employer contributions may be made into the Plan at rates determined by the employers. There are 9,854 participants in the 457 Plan.

Upon qualifying for distributions, benefits are paid out in lump sums, or as periodic benefit payments, at the option of the participant based on individual account balances and plan provisions. The 457 Plan account balances are fully vested to the participants at the time of deposit.

Investments in the 457 Plan are individually directed by plan participants who direct the investment of their funds among Board approved investment options of varying degrees of risk and earnings potential. Participants may transfer their funds between these options daily. Investments of the Plan are reported at fair value.

In addition to accepting employee deferrals, this plan also accepts employer contributions on behalf of their employees, provided such contribution when added to the employees' contribution deferred does not exceed the maximum deferral permitted by the Plan. The State contributes \$20 a month per employee participating in the 457 plan no matter the amount of the employee's contribution. The State contributed \$1,230,300 on behalf of its employees during the year ended December 31, 2003.

Funding Policy

The Wyoming Retirement System statutorily requires 11.25% of the participant's covered salary to be contributed to the plan, paid by the participant and the employer in a manner as determined by the employer. Law enforcement members by statute receive an additional 3.73% contribution (100% of which is paid by the State). The Wyoming State Highway Patrol, Game and Fish Warden, Division of Criminal Investigators and Capital Police Retirement Fund statutorily requires participants to contribute 11.02% of their salary and the State is required to contribute 11.33% of each participants salary. Participants of the Volunteer Firemen's Pension Fund contribute \$12.50 monthly to the plan, although such contributions may be fully or partially paid by political subdivisions on behalf of participants if approved by the governing board. The State pays 50% of the gross annual tax collected on fire insurance premiums to the plan.

The Paid Firemen's Pension Plans requires participants to contribute 8% (Plan A) or 6% (Plan B) and employers to contribute 21% (Plan A) or 12% (Plan B) of the participant's salaries depending which plan option is selected.

The Wyoming Judicial Retirement Fund statutorily requires participants to contribute 9.22% of their salary to the Plan and the employer is required to contribute 5.68% of each participant's salary.

The Wyoming Law Enforcement Plan requires participants to contribute 8.6% of their salary and the employer is required to contribute 8.6% of each participant's salary. Contribution requirements of plan members and their employers may be amended by the Wyoming State Legislature, as proposed by each plan's administrator.

The State's contributions as employer are as follows:

NOTE 13 Risk Management

Self insurance funds

The State maintains two self insurance plans; the State self insurance program and the State employee medical, life, and dental insurance programs. Each of these plans is reported in internal service funds. The University administers its own risk management program and reports a liability in the University funds. A brief description of each of the plans is provided below:

- A. State Self Insurance** - Wyoming statute 1-41-103 created the State Self Insurance Fund to handle liability insurance claims brought against the State. The range of losses financed includes general liability, automobile liability, police liability, medical malpractice liability and civil rights. In addition, this plan covers Peace Officers liability for the Political subdivisions within Wyoming. The State generally does not maintain reserves; losses are covered by a combination of appropriations from the State's general fund, Department of Transportation, Game & Fish Commission, and by assessing other State agencies a deductible of up to \$2,500 per claim when the agency is determined to be liable for the loss. The estimated liability for claims against the State including incurred but not reported claims is approximately \$7.8 million as of June 30, 2004. The estimate is based on past experience, a review of pending claims, an actuarial evaluation and other social and economic factors. The above estimate is not discounted and there is no outstanding amount of claims for which annuity contracts have been purchased in the claimant's name as of June 30, 2004.
- B. State Group Insurance** - The State co-administers employee medical and dental insurance with a third party administrator. The State self-insures medical costs and assumes all the risk for claims incurred by plan participants. Insurance providers solely administer the life insurance plan. The State does not retain any risk of loss for these plans as the insurance providers assume all the risk for claims incurred by the participants.

During the year ended June 30, 2004, the State contributed up to 85% a month for insurance premiums for each covered participant towards these plans. Participants are responsible for paying premium charges in excess of this amount. As of June 30, 2004, the medical claims liability including incurred but not reported claims is \$8,957,606. A liability is recorded in the accompanying financial statements for the estimated claims liability. The claims liability is based on past experience, a review of pending claims and other social and economic factors. The above estimate is not discounted and there is no outstanding amount of claims for which annuity contracts have been purchased in the claimant's name as of June 30, 2004. No significant reductions in insurance coverage were made in the last fiscal year.

- C. University Risk Management**
The University is exposed to various risks of loss including torts, theft of, damage to, or destruction of assets, and teacher's liability. The University has purchased commercial insurance for these risks that include insurance for property and liability. The uninsured risk retention per occurrence/aggregate is \$100,000/\$200,000 for property and ranges from \$100,000 to \$1,000,000 for various liability risks. A liability for a claim is established if information indicates that it is probable that a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. Settlements have not exceeded insurance coverage's in any of the past three fiscal years.

The following is a reconciliation of the unpaid claims liability:

	State Self Insurance		State Group Insurance		University of Wyoming	
	2003	2004	2003	2004	2003	2004

The University included their unpaid claims liability under the caption of "Accounts Payable".

Insurance enterprise and public entity risk pools

The State administers three insurance enterprises: workers' compensation insurance, the Wyoming health insurance pool, and the mine subsidence insurance which are reported in enterprise funds. None of these funds have acquisition costs, therefore, no cost is amortized for the period. Unpaid claims and claim adjustment expenses are estimated based on the ultimate cost of settling the claim including the effects of inflation and other social and economic factors. These funds use the accrual basis of accounting. The insurance enterprises do not consider anticipated investment income in determining if a premium deficiency exists. A brief description of the insurance enterprises and the pool are provided below:

- A. Workers' Compensation** - Wyoming statute 27-14 created the Wyoming Workers' Compensation Act (Act). This Act requires all employers engaged in extra hazardous employment to obtain liability coverage for the payment of benefits to employees for job related injuries and diseases through the Workers' Compensation Fund. Eligible employers complying with the provisions of the Act are generally protected from suit by employees. Employers not required by the Act to participate in this program may elect to do so at their option. As of June 30, 2004, there were 18,778 employers insured under this Act.

The fund is used to account for the State's Workers' Compensation program that provides time-loss, medical, and disability payments to qualifying individuals sustaining work-related injuries, or death benefits to dependent families if the worker were to die from such injuries. To fund these benefits, the State charges employers monthly premiums based on rates it establishes for each employment classification, the employer's experience rating, and the total payroll for covered employees in each particular classification. The Act requires that rates be established at a level to maintain an actuarially sound insurance program. The State is in the processes of developing a plan to fully fund workers' compensation liabilities by 2008.

An actuarial study has estimated the liabilities and the ultimate cost of settling claims that have been reported but not settled and of claims that have been incurred but not reported. Because actual claims costs depend on such complex factors as inflation, changes in doctrines of legal liabilities, claims adjudication, and judgments, the process used in computing claims liabilities does not necessarily result in an exact amount. Claims liabilities are re-computed periodically using a variety of actuarial and statistical techniques to produce current estimates that reflect recent settlements, claim frequency, and other economic, legal and social factors.

A provision for inflation in the calculation of estimated future claims costs is implicit in the calculation because reliance is placed both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience. The Department of Employment uses an undiscounted Workers' Compensation Fund balance when determining Industry Base Rates for employer premiums. For consistency between the Department of Employment's Workers' Compensation Fund balance used for rate setting purposes and Workers' Compensation Fund balances shown in the CAFR, the Workers' Compensation Fund balance is shown at an undiscounted value. At June 30, 2004, \$701 million of claims and adjustment expenses have been accrued. The State does not use reinsurance agreements, therefore the State retains full liability as the direct insurer.

- B. Wyoming Health Insurance Pool** - Wyoming statute 26-43 created the Wyoming Health Insurance Pool (Pool) for the purpose of providing health insurance for State residents. Qualifying State residents who are denied insurance by private carriers or leave coverage because of excessively high premiums or restrictive coverage may join the Pool. The Pool began providing health insurance coverage to participants on January 1, 1991. The statute creating the Pool contains a sunset provision that calls for the Pool to be terminated on June 30, 2005, unless authorization is continued. The State co-administers the Pool along with a third party insurance provider, Blue Cross Blue Shield of Wyoming; however, the Pool retains all risk of loss for claims filed by Pool participants. As of June 30, 2004, 638 residents were covered under the Pool. A copy of the Pool's financial report may be obtained by contacting Blue Cross Blue Shield of Wyoming in writing at, 4000 House Avenue, Cheyenne, Wyoming 82001.

The Pool's liability exposure per participant is a maximum lifetime benefit of \$350,000 for the Brown Plan and \$600,000 for the Gold Plan. Premiums are collected from Pool participants to pay Pool expenses; however, if such premiums are insufficient to meet expenditures, the State has the authority to assess all carriers who write health insurance policies in the State to cover Pool deficits.

The estimated liability for unpaid claims and loss adjustment expense is based on data developed by the Pool's third-party administrator. Since the Pool has limited historical experience of its own, industry experience is also considered in determining the estimated liability. The liability includes estimates of the costs to settle individual claims that have been reported, plus a provision for losses incurred but not yet reported. The undiscounted liability for unpaid claims and claim adjustment expenses is \$850,000 at June 30, 2004.

- C. Subsidence Insurance** - Wyoming statute 35-11-13 requires the Department of Environmental Quality (DEQ) to administer an insurance program to cover mine subsidence loss to specified structures in the State. The Wyoming mine subsidence insurance program provides insurance to any individual whose home or business exists over or near any underground mine in the State. On October 29, 1986 the DEQ received a funding grant from the Federal Department of Interior's Office of Surface Mining to assist with administrative and claim costs. A grouting program was initiated in Rock Springs in 1986. A cement type of material is used to fill those abandoned mines subject to the greatest risk of subsidence. As of June 30, 2004, there were 260 policyholders with in-force premiums. The insured value of these policies is \$19,878,725. There were no unresolved or pending claims as of June 30, 2004. This program had an actuarial valuation performed in 1999 that is used to determine that premiums charged to participants are sufficient to meet anticipated claim expense.

The following table summarizes current period activity for the State insurance enterprise funds:

Note 14 Commitments and Contingencies

Federal Grants

Grant monies received and disbursed by the State are for specific purposes and are subject to audit by the grantor agency. Such audits may result in requests for reimbursement due to disallowed expenditures. Based upon prior experience and current knowledge, the State does not believe that such disallowances, if any, would have a material effect on the financial position or results of operations of the State.

School Capital Construction Commitments

As of June 30, 2004, the State has signed agreements totaling approximately \$115,000,000 with school districts throughout the state that commit the State to provide funding for school district capital construction projects. As of June 30, 2004, approximately \$46,000,000 was unexpended under these agreements.

Investment Commitments

The State is a limited partner in a private equity partnership, and has committed to provide funding to the partnership as called for by the general partner-Cheyenne Capital Fund. The State's total commitment over the ten-year term of the partnership is \$257,950,000. This includes \$225,000,000 in capital for investment and \$32,950,000 for management fees, to be paid over the term of the partnership. The State had invested \$13,467,248 in this partnership at June 30, 2004.

Construction commitments

As of June 30, 2004, there were 18 uncompleted construction projects as follows:

The University has contracted and/or appropriated funds for the planning and/or construction or maintenance of several facilities with an aggregate cost of \$53,459,000. As of June 30, 2004, the remaining commitment to complete these projects totaled approximately \$27,705,000. These completion costs are financed by a combination of State appropriations, private gifts and grants, and student fees.

The Department of Transportation had outstanding contract commitments for highway construction, and maintenance and aeronautics projects at September 30, 2003 of approximately \$145,000,000. A substantial portion of these commitments will be funded by Federal financial assistance as expenses are incurred.

Operating leases

The State is committed under various leases that are considered operating leases. The operating lease expenditures/expenses are recognized as incurred or paid.

Governmental funds rental expenditures under operating leases for the year ended June 30, 2004 were \$8,396,102. Future rental commitments for operating leases are as follows:

Year Ending June 30th	Governmental Fund Types
2005	\$ 7,935,006

Wyoming Statute 35-11-1414, *Water Pollution from Underground Storage Tanks Corrective Action Act of 1990*, requires that the State establish a corrective action and financial responsibility account which is funded by mineral severance taxes as well as certain registration fees. In addition, this statute requires the Department of Environmental Quality to establish a prioritized list of sites contaminated by tanks and to take corrective action. As of June 30, 2004, 1,534 contaminated sites have been identified and 634 have been resolved. The State remediates contaminated sites as funding allows, and the statute limits the State's liability for clean-up costs to amounts available in the corrective action accounts. This liability totals \$9,967,558 at June 30, 2004. Management believes that the ultimate costs to remediate the known contaminated sites will exceed the amounts available in the corrective action accounts. However, given the statutory limitation on the State's responsibility for remediation, liabilities beyond the amounts held in the corrective action accounts have not been recorded. The State intends to conduct a program review and actuarial study to determine the potential clean-up costs associated with sites encompassed by the statute. Until such studies have been completed, the ultimate cost of remediation of contaminated sites cannot be determined.

The Legislature has committed to funding the un-funded actuarial liability of the Wyoming Law Enforcement Retirement Plan established in 2002. The unfunded value of the state obligation as of January 1, 2004, was \$25,565,980. The liability is scheduled to be paid in \$5,500,000 increments each biennium, beginning July 2004 through July 2018.

The State is also a party to various legal proceedings arising in the normal course of business. The State believes that the outcome of these matters will not have a material adverse impact on the State's financial position or results of operations.

The DOT has been named as a party to various legal actions relative to right-of-way, damage claim, and other matters arising in the normal course of operations. There are cases currently pending that if settled in favor of the plaintiff, would not have a material effect on the financial statements of the DOT.

At June 30, 2004 WCDA, was committed to purchase single-family mortgages aggregating approximately \$66.1 million. In addition, at June 30, 2004, WCDA had committed approximately \$12.2 million for other project mortgages to be funded through federal programs or housing trust funds.

The WCDA has variable rate bonds outstanding in the 1978 Indenture of \$52,545,000 and in the 1994 Indenture of \$32,900,000. These bonds are subject to tender at par for repurchase by WCDA at the option of the bondholders; however, WCDA may remarket these bonds if they are tendered by the bondholders. As of June 30, 2004, \$6,000,000 of the variable rate debt is subject to repurchase directly by WCDA, and \$69,445,000 of the repurchase commitment has been assumed by Westdeutsche Landesbank Girozentrale (the Bank) through a standby bond purchase agreement. Under this agreement, the Bank will purchase any bonds tendered by bondholders and will adjust the interest rate associated with any unremarketed bonds to a Bank rate.

On June 18, 2004, WCDA instructed its trustee to call on August 1, 2004, bonds in the amount of \$700,000 from the 1978 Indenture. On June 25, 2004, WCDA instructed its trustee to call on August 1, 2004, bonds in the amount of \$9,735,000 from the 1999 Indenture. On June 21, 2004, WCDA instructed its trustee to call on August 1, 2004, bonds in the amount of \$1,455,000 from the 1992 Indenture. On July 21, 2004, WCDA instructed its trustee to call on August 15, 2004, bonds in the amount of \$13,000,000 from the 1994 Indenture.

Note 15 Subsequent Events

On July 1, 2004, the State issued Education Fund Tax and Revenue Anticipation Notes, Series 2004A in the aggregate principal amount of \$220,000,000 to cover temporary cash shortages in the Foundation Program Fund. The Series 2004A Notes will mature on June 24, 2005.

Wyoming Community Development Authority

On July 28, 2004, the Authority issued \$40,000,000 of bonds under the 1994 Indenture.

Wyoming Business Council

The Council has entered into various agreements with vendors primarily for marketing, public relations and promotion services to the Council during the period July 1, 2004 through December 31, 2006. These agreements are valued at up to but no more than \$16,652,936. These agreements will be funded by a combination of State appropriations and Federal revenues.

Wyoming Building Corporation

On September 15, 2004 the State exercised its option through the Wyoming Building Corporation for the redemption of the bonds in full for \$65,935,000 without an early call premium as provided for in the bond agreement.

Note 16 New Pronouncements

In March 2003, the Governmental Accounting Standards Board (GASB) issued Statement No. 40 Deposit and Investment Risk Disclosures (Statement No. 40). Statement No. 40 establishes and modifies disclosure requirements related to investment risks: credit risk (including custodial credit risk and concentrations of credit risk), interest rate risk, and foreign currency risk. Statement No. 40 also establishes and modifies disclosure requirements for deposit risks: custodial credit risk and foreign currency risk. The objective of Statement No. 40 is to update the custodial credit risk disclosures requirement established in previous statements, and to establish more comprehensive disclosure requirements addressing other common risks of deposits and investments of state and local governments. The State will be required to apply Statement No. 40 for its June 30, 2005 year-end. An Assessment of the effect of adopting Statement No. 40 is not yet complete.

Budgets

The Legislature appropriates substantially cash basis budgets for a majority of the funds at the program level (administration, revenue division, investigations, etc.) within an agency. The State budget office maintains budgets for budgeted funds at the series level (personnel services, support services, etc.) within a program. Agency budget analysts are allowed to transfer appropriations from one series to another series within an agency's program but the Governor must approve all changes in appropriations at the program level. The State's legal level of budgetary control is at the program level.

Encumbrance accounting, under which purchase orders, contracts and other commitments for the expenditure of funds are recorded to reserve that portion of the applicable appropriation, is employed for governmental fund types. Encumbrances outstanding at June 30, 2004, for which the goods or services have not been received, are shown as a reservation of fund balance.

Supplemental appropriations and additional appropriations approved by the Governor are included in the column titled "B11's & Supplemental Budget". In the budget and actual statements, encumbrance accounting, under which purchase orders, contracts, and other commitments are recorded as expenditures and liabilities in order to reserve that portion of the applicable appropriation, is employed for budgetary control purposes. Some unencumbered appropriations lapse at the end of each biennium. Encumbrances are reported as a reservation of fund balance and carried forward for use in future years. Revenue budgets are not legislatively established but are determined by individual agencies or the Consensus Revenue Estimating Group.

Wyoming Department of Transportation Infrastructure Using Modified Approach

The Wyoming Department of Transportation (DOT) accounts for its infrastructure assets using the modified approach. The infrastructure consists of the road subsystem and the bridge subsystem.

DOT manages its road network with a pavement management system developed by the Department. A consulting firm is contracted to collect the data. The pavement condition is rated in three areas; ride, rutting, and cracking. The ride is measured by suspension movement using an index called the present surface index (PSI). The rutting is measured using the height difference between the lane center and each wheel path of a cross section of the road to determine the rut index (RUT). The cracking measures the width and frequency of the cracks to establish the pavement condition index (PCI). A composite rating is derived from the three condition ratings called the pavement serviceability rating (PSR). The pavement management system establishes a PSR on a scale from 0 to 5 for each road section with excellent 5.0 to 3.5, good 3.5 to 3.0, fair 3.0 to 2.5 and poor 2.5 to 0. It is DOT's policy to maintain its National Highway System (NHS) at 3.25 (good) and its Off the National Highway System (Non-NHS) at 3.00 (fair). Each road section has data collected every other year. The road subsystem condition assessment is done every year.

As of September 30, 2003, the overall PSR for the NHS was 3.48 and Non-NHS was 3.14. As of September 30, 2002, the overall PSR for the NHS was 3.56 and Non-NHS 3.20. The number of miles for NHS and Non-NHS with excellent to good condition and fair to poor condition are as follows:

PSR Condition Rating	NHS				Non- NHS			
	2002		2003		2002		2003	
	Number of Miles	Percent						
Good to Excellent	2,139	72.4%	1,043	35.3%	1,521	42.9%	1,448	40.8%
Poor to Fair	817	27.6%	1,912	64.7%	2,028	57.1%	2,101	59.2%
	<u>2,956</u>	<u>100.0%</u>	<u>2,955</u>	<u>100.0%</u>	<u>3,549</u>	<u>100.0%</u>	<u>3,549</u>	<u>100.0%</u>

The Department uses a comprehensive bridge management system to assist in managing the State's bridges. Each bridge is inspected at least once every two years. This inspection measures and rates the required National Bridge Inventory (NBI) items, including dimensions, clearances, alignment, waterway data and structural condition. The structural condition is evaluated by using structural elements. Each component of the bridge (girders, deck, railing, columns, piling, etc.) is assigned an element and the condition of each element is evaluated based on several condition State assessments. The element data is converted to NBI ratings using a conversion program. The structure's NBI data is then used to determine its sufficiency rating. The sufficiency rating is calculated by the Federal Highway Administration, and bridges with a sufficiency rating of 80 or less and classified as structurally deficient and/or functionally obsolete are put on the Federal Highway Administration Selection List. Functional obsolescence is a measure of the suitability of the bridge to provide for requirements of traffic both on and under the structure. Structural deficiency is a measure of the condition of the structural elements and the ability of the bridge to carry the anticipated loads. Bridges appearing on the Selection List are considered deficient, whereas those not on the list are considered acceptable. The bridge subsystem condition assessment is done every year. The Department of Transportation's policy has been to maintain 83% of its NHS bridges and 80% of Non-NHS bridges in acceptable condition. The Department's policy will be to maintain 83% of its NHS bridges and 80% of the Non-NHS bridges in acceptable condition.

Using the BMS/NBI conversion program, the NBI data supplied to the Federal Highway Administration results in the following Selection List Condition Rating for the last three fiscal years:

Selet List Condition Rating	NHS						Non-NHS					
	2001		2002		2003		2001		2002		2003

The department estimate maintenance and preservation expenditures on infrastructure assets of \$318.7 million for the year ended September 30, 2003. Actual expenditures on the budgetary basis on infrastructure for maintenance and preservation were \$346.8 million, a difference of \$28.1 million. The difference is due to projects that were let late in the previous fiscal year and work was not started on these projects until this year.

Estimated and actual amounts used to maintain or preserve the Department's infrastructure systems at the Department's target PSR ratings for the past three years is as follows:

For the year ended September 30	Estimated		Actual	
	Road Network	Bridges	Road Network	Bridges
2001	315.0 million	14.4 million	257.5 million	21.7 million
2002	292.6 million	14.0 million	307.2 million	22.5 million
2003	298.9 million	19.8 million	327.9 million	18.8 million

Non-Major Governmental Funds

SPECIAL REVENUE FUNDS

Special Revenue Funds are used to account for the proceeds of specific revenue sources (other than major capital projects) that are legally restricted to expenditures for specified purposes.

Environmental Quality Fund-This fund is used to account for fees, fines, penalties, forfeitures, and grants received which are restricted for use in the reclamation of the environment.

Board & Regulatory Fund-This fund is used to account for the licensing fees paid by professionals as well as the related expenditures of regulating the specific professionals.

Game and Fish Fund-This fund is used to account for all revenues, which are restricted for the purpose of habitat, recreational facility, wildlife conservation and enhancement.

Statutory Reserve Account Fund-This fund is used to account for the first \$46,220,000 diversions from the fund balances of the GAAP Holding Fund, the REBBA Fund and the GAAP II Fund as of June 30, 1996.

GAAP Holding Fund-This fund is used to account for revenues, which were diverted when the State switched to the GAAP basis of accounting and related appropriation.

Special Projects Fund-This fund is used to account for revenues for conferences and services, as well as the related expenditures, which are restricted for use in special projects.

Community College Grants Fund-This fund is used to account for mineral severance tax, which is granted to community colleges for emergency repairs.

Municipal Rainy Day Fund-This fund is used to account for mineral severance tax, which is restricted for payments and grants to municipalities.

School Debt Service Assistance Fund-This fund is used to account for appropriations from the school district capital construction fund, which are restricted for the purpose of grants for paying debt service at school with below average property tax receipts.

Water Fund-This fund is used to account for mineral severance tax revenue which are restricted for the purpose of maintaining and rehabilitating current water facilities, capital construction, and fees received for water sales and storage at Fontenell, Sheridan and Palisades and the related costs of providing these services.

Workforce Development Fund-This fund is used to account for expenditures relating to workforce development activities for the Department of Workforce Services.

Mineral Royalties Fund-This fund is used to account for mineral royalties, which are restricted for the specific purpose of school capital construction.

Government Royalty Distributions Fund-This fund is used to account for royalties received on mineral production, which is restricted for grants and loans to municipalities, local governments, counties and special districts.

Farm Loan Revenue Fund-This fund is used to account for revenues received from farm loans, which are restricted for distribution to specific funds.

Farm Loan Loss Reserve Fund-This fund is used to account for a percentage of farm loan revenue, which is restricted for the repayment of defaulted loans and to pay the administrative and legal expenses of the Farm Loan Board in making collections on defaulted loans and foreclosing mortgages.

State Revolving Fund (SRF)-This fund is used to account for federal grants from the U.S. Environmental Protection Agency; state funds from the Department of Environmental Quality (DEQ) corrective action account and from SRF loan repayments, which were to DEQ for water pollution control projects.

Miners Hospital Land Fund-This fund is used to account for land and the income generated from land, which was donated to the State for the specific purpose of the Miner's Hospital.

Omnibus Land Fund-This fund is used to account for land and the income generated from land, which was donated to the State for the specific purpose of the establishing, maintaining and support of charitable, educational, penal and reform institutions.

Donations and Bequests Fund-This fund is used to account for bequests and donations made for specific purposes.

Wyoming Wildlife Fund-This fund is for payments made by the State for the purpose of enhancing Wyoming wildlife resources.

University Endowment Fund-This fund is used to account for the University of Wyoming's Endowment Fund.

Oil Surcharge Conservation Fund-This fund is used to account for fines and forfeitures charged to Mobil Oil, Texaco, Belridge, Palo Pinto, Stripper Wells, Diamond Shamrock and Exxon, which are required to be used to help conserve energy through special grant programs.

State Land Fund-This fund is used to account for land which was donated to the State and the land income, which is restricted to establishing, maintaining and supporting public buildings, fish hatcheries and various State institutions.

Flex Benefit Program Fund-This fund is used to account for payments made by state employees for the Flex Benefit Program and subsequent reimbursement of those payments to state employees.

DEBT SERVICE FUND

Debt Service Funds are used to account for the accumulation of, and the payment of, general long-term principal and interest.

CAPITAL PROJECTS FUND

Capital Projects Funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities.

PERMANENT TRUST FUNDS

Permanent Trust Funds are used to report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the reporting government's programs, that is, for the benefit of the government or its citizenry.

Wyoming Wildlife Trust Fund-This fund is used to account for assets of a trust agreement. The interest on this fund is restricted for the purpose of enhancing Wyoming wildlife resources.

Montgomery Home for the Blind Fund-This fund is used to account for assets of a legal trust agreement. The income from this fund is restricted for the purpose of establishing, maintaining and supporting a school for blind individuals.

Wyoming Tobacco Settlement Fund-This fund is used to account for assets of the Tobacco settlement. The income from this fund is restricted for the purpose of improvement of the health of Wyoming' citizens.

PROPRIETARY FUNDS

NON-MAJOR ENTERPRISE FUNDS

Enterprise Funds are used to account for operations: (a) that are financed and operated in a manner similar to private business enterprise-where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, public policy, management control, accountability or other purposes.

Liquor Commission Fund-This fund is used to account for the operation of the State Liquor Commission, which purchases and sells alcohol products to businesses throughout the State.

Canteen Fund-This fund is used to account for the purchase and sale of consumable goods to residents at the State institutions.

Subsidence Insurance Fund-This fund is used to account for insurance premiums received and claims payments made for house and land subsidence in subsurface mining areas. (Note that claims payments are currently being made from a federal grant in another fund. This fund is currently only receiving premiums but it is the goal of the federal program to eventually make this program self sufficient.)

Honor Farm Agricultural Sales Fund-This fund is used to account for the revenues and expenses of producing and selling agricultural products to State institutions and other consumers by the Honor Farm.

Wyoming Health Insurance Fund-This fund is used to account for premiums received from residents unable to obtain health insurance and the expense of purchasing insurance for these residents.

Unemployment Compensation Fund-This fund is used to account for premiums and claims payments made for the State's unemployment program.
