The 2008 CAFR's divider pages focus on the Yellowstone National Park Fires of 1988.

The Yellowstone National Park fires of 1988 were the largest wildfire recorded in the history of the park and is remembered in 2008 during the 20th Anniversary of the event.

President Ulysses S. Grant
(photographer unknown; no date)

On March 1, 1872, President Ulysses S. Grant signed a bill into law that created America's first national park, Yellowstone National Park.

Yellowstone National Park is located in the western United States. It spans 3,472 square miles or 2,219,789 acres. Ninety-six percent of the park is located in the State of Wyoming, another three percent is in Montana, and one percent is located in Idaho.

Introductory Section

Left: Grizzly bear with three cubs (photographer unknown; no date)

Right: Beehive Geyser; Upper Geyser Basin (photographer George Marler; 1964)

Lower left: Bull moose in the Yellowstone River (photographer William S Keller; 1977)

Plains prickly pear (*Opuntia polyacantha*) flower (photographer RG Johnsson; 1963)

Left: Bull, cow & calf elk (photographer John Good; 1966)

Right: Electric Peak (photographer Jim Peaco; September 1987)

Yellowstone National Park spans an area of 3,472 square miles and is comprised of lakes, canyons, rivers and mountain ranges. The national park is a habitat for hundreds of species of mammals, birds, fish, and reptiles. Yellowstone National Park is known for its large variety of wildlife which includes grizzly bears, wolves, bison, and elk. The vast forests and grasslands also include unique species of plants. Yellowstone National Park is also known for the world's most extraordinary geysers and hot springs which include Old Faithful. Rita C. Meyer

Wyoming State Auditor

The State Auditor is a constitutional officer elected for a four year term by the general electorate of Wyoming. The Auditor is the State's chief fiscal control officer. She maintains the central fiscal accounts, acts as the official custodian of accounting records, serves as the state payroll officer, and orders all payments into and out of the funds held in the state treasury. The Auditor is also responsible for preparing the Comprehensive Annual Financial Report on the fiscal affairs of the state.

The Auditor serves as a member of the Board of Land Commissioners, the State Loan and Investment Board, the State Building Commission, and the State Canvassing Board.

Rita Meyer was elected in November 2006 to serve as Wyoming's nineteenth State Auditor. She is a graduate of the University of Wyoming with degrees in education and finance. Rita also holds an MBA in International Business from Regis University in Denver, and a Master's in National Resource Strategy from National Defense University in Washington, D.C.

Rita has served her state and nation for over 23 years as an enlisted airman and officer in the Wyoming Air National Guard. She is a combat veteran and has been deployed in support of Operation Desert Storm, Operation Provide Comfort, and Operation Enduring Freedom. She attained the rank of full Colonel in July 2004. Rita retired from military service on November 3, 2007.

Rita is married to Dr. Charles Meyer, a retired dentist and native of Rawlins, Wyoming. They have one son, Charles, an officer on active duty in the United States Navy, and a daughter-in-law, Emily, an export control attorney.

Rita C. Meyer, State Auditor

December 31, 2008

**State Capitol
Cheyenne, Wyoming 82002
Telephone: 307/777-7831
FAX: 307/777-6983**

TO THE CITIZENS OF THE STATE OF WYOMING, THE HONORABLE DAVE FREUDENTHAL, GOVERNOR, MEMBERS OF THE WYOMING LEGISLATURE:

State law (W.S. 9-1-403(a)(v)) requires that the State Auditor provide annual financial statements prepared in conformance with generally accepted accounting principles (GAAP) by December 15 every year. I am pleased to present this Comprehensive Annual Financial Report (CAFR) of the State of Wyoming for the fiscal year ended June 30, 2008.

The CAFR is the primary means of reporting the State of Wyoming's financial activities. McGee, Hearne & Paiz, LLP, certified public accountants, has independently audited the State of Wyoming's financial statements. The independent audit is performed annually to provide reasonable assurance that the financial statements of the State of Wyoming are free of material misstatement. The independent audit involves examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the State of Wyoming's financial statements for the fiscal year ended June 30, 2008 are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of the CAFR.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complement this letter of transmittal and should be read in conjunction with it.

The CAFR consists of representations by the management of each State entity concerning the finances of the State of Wyoming. Responsibility for both the accuracy of the data and the completeness and reliability of the information, including all disclosures, rests with the State. To provide a reasonable basis for making these representations, the State has established an internal control framework that is designed both to protect the State's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the State of Wyoming's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the State's framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. This is the established and accepted standard. The financial statements have been prepared primarily from accounts and records maintained by the State Auditor. To the best of my knowledge and belief, this financial report is complete and reliable in all material respects.

The independent audit of the financial statements of the State of Wyoming is part of a broader, federally mandated "single audit" designed to meet the special needs of federal grantor agencies. The standards governing single audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with legal requirements involving the administration of federal awards. These reports are available in the State of Wyoming's separately issued Compliance Report.

Profile of the Government

On July 10, 1890, the State of Wyoming, known as the 'Equality State,' was the 44th state admitted to the Union. Located in the Rocky Mountain section of the western United States, Wyoming is bounded on the north by Montana, on the east by South Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah, Idaho and Montana. It is the ninth largest state in the United States, containing 97,914

square miles. The 2000 Census put Wyoming's population at 493,782. Wyoming is home to two of the country's foremost national parks, Yellowstone National Park and Grand Teton National Park, as well as the first designated national monument, Devil's Tower.

The executive branch of Wyoming government is comprised of a Governor, Secretary of State, State Auditor, State Treasurer, and the Superintendent of Public Instruction, all of whom are elected by statewide vote every four years. The legislative branch of government is comprised of 30 state senators and 60 state representatives. The term of office for senators is four years, 15 of the members being elected at a general election at which a President of the United States is elected, the balance at the next general election. The entire body of the House of Representatives is elected every two years for a two-year term.

The State of Wyoming provides a full range of services. Under the Governor are fifteen Cabinet level departments: Administration and Information, Agriculture, Attorney General, Department of Audit, Corrections, Employment, Engineer, Environmental Quality, Family Services, Game and Fish, Health, Revenue, State Parks and Cultural Resources, Transportation, and Workforce Services. There are also 19 separate operating agencies and 13 licensing boards and commissions.

Among the 19 separate operating agencies are seven entities which are legally separate but considered as component units of the State of Wyoming as the State has significant operational and/or financial relationships with them. Six of the component units' financial data are reported in columns separate from the financial data of the primary government (the State). Those organizations are the University of Wyoming, Department of Transportation, Wyoming Community Development Authority, Wyoming Pipeline Authority, Wyoming Infrastructure Authority and Wyoming Business Council. The Wyoming Building Corporation is a blended component unit; its financial data is blended into the primary government financial data. Additional information on all seven of these legally separate entities can be found in Note 1 in the notes to the financial statements.

Budgetary Process

The biennial budget serves as the foundation for the State of Wyoming's financial planning and control. Wyoming statutes require the Governor to prepare and submit a biennial budget to the Legislature every even-numbered year. Budgets are prepared for a biennial period and are augmented, if necessary, with supplemental appropriations during the legislative sessions conducted in odd-numbered years. Budgets are adopted at the program level by agency. The Legislature may add, change, or delete any budget items proposed by the Governor. The Governor may authorize changes and revisions to approved budgets during the budget term, including increasing appropriations in the event of federal revenue above the initial budget approved by the Legislature. Budget-to-actual comparisons are provided in the CAFR for each individual governmental fund for which an appropriated biennial budget has been adopted. For the general fund, the foundation program fund and the budget reserve fund, this comparison is presented as part of the required supplementary information. For governmental funds other than the major funds, this comparison is presented in the supplementary information section of the CAFR.

State Economy

Wyoming's economic well-being continues to depend primarily on the mineral industry. Wyoming's economy is the least diversified of the 50 states. Revenues to the State of Wyoming are generated by the production of oil, natural gas, coal, trona and coal bed methane gas and come from severance taxes, ad valorem tax on production, ad valorem tax on real and personal property and federal mineral royalties from production on federal lands in Wyoming.

Commodity prices continue to generate increased revenues for the State. Oil prices reached an all time high of \$147/barrel in July 2008. These higher commodity prices also translated to higher transportation costs with gasoline hitting a high of over \$4.00 per gallon. Increased food costs were also a byproduct of increased transportation costs. All this translated into an annual inflation rate for Wyoming of 7.49%.

On September 15, 2008 the country's current financial and credit crisis began to unfold. Wall street mainstay Lehman Brothers went bankrupt, Bear Stearns was purchased at a bargain basement price, American International Group (AIG), deemed to be too significant to let fail, forced the federal government to provide a bailout which initially started at \$85 billion, but has since risen to \$123 billion; the seizing of credit forced the federal government to consider and pass a \$770 billion bailout package to banks and the credit system in general. As of this writing, it is thought that the 'Big 3' automakers may enter Chapter 11.

bankruptcy or worse should they not receive government assistance in the form of some type of bailout. This financial crisis has become worldwide as European and Asian governments attempt to provide their own stimulus packages to help stave off a deepening recession, with China providing a \$600 billion stimulus package in November 2008.

Meeting in October 2008 Wyoming's Consensus Revenue Estimating Group (CREG) released its preliminary assessment for the balance of the 2009-2010 Biennium. CREG estimated there would be approximately \$1.5 billion surplus, with \$900 million for the General Fund/Budget Reserve and \$600 million for the foundation program. Wyoming's budget surplus contrasts with the multitude of states facing significant budget shortfalls including California and New Jersey potentially seeking federal assistance. It is now anticipated that Wyoming's budget surplus will decline significantly or disappear entirely as commodity prices have continued to fall, with the spot price of oil slipping to \$43 per barrel in trading on December 9th, 2008. This as OPEC is considering significant production cuts to try to stem the stunning 70% free fall in crude prices over the past five months. The Governor has alerted state agencies and the Legislature that the supplemental budget submitted on December 1, 2008 and its associated fiscal profile may be subject to material changes as the commodity prices for oil and natural gas continue to fall both of which contribute significantly to the state's overall revenue picture.

The lack of pipeline capacity to ship Wyoming produced natural gas continues to hinder Wyoming. The Wyoming Pipeline Authority continues to work to develop more capacity for the State's natural gas producers. Lack of pipeline capacity continues to depress the price Wyoming producers receive for their product; this translates into lost severance tax revenue to the State.

Primarily because of the energy boom, Wyoming's economy remained steady last year. Wyoming was well below the national unemployment rate of 5.5% with an unemployment rate at June 30, 2008 of 3.2%.

Each year the Division of Economic Analysis (EA) of the Department of Administration and Information forecasts economic conditions in Wyoming for a ten-year period. This report and additional economic and demographic information can be found on the Division of Economic Analysis website: <http://eadiv.state.wy.us>.

Long Term Financial Planning

Hathaway Scholarship Program

This program was fully funded reaching \$400 million in fiscal year 2008. This program provided \$7,673,538 in funding for those students going on to post secondary education whether it be for a community college, the university or a technical school.

AML Funding

The state began to receive back payments for abandoned mine reclamation funds owed the state over several years. However, the federal government made the payments in the form of grants, rather than receive lump sum distributions, Wyoming must spend its resources first then be reimbursed. The total awarded the state was approximately \$847 million. The Legislature has identified specific projects on which these funds will be expended, with the University School of Energy to be a main focus.

Local Government Funding

During the 2008 legislative session, local governments were appropriated a total of approximately \$384 million, with major allocations as follows:

- \$78,653,334 for direct distribution to cities and towns;
- \$33,826,666 for direct distribution to counties;
- \$8,260,000 for revenue challenged cities and towns;
- \$8,260,000 for revenue challenged counties;
- \$191,000,000 for county block distribution for capital projects;

Awards and Acknowledgments

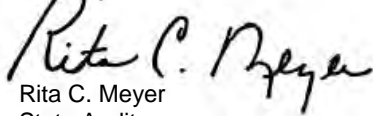

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Wyoming for its CAFR for the fiscal year ended June 30, 2007. This was the eighth consecutive year and ten of the past eleven years that the State has received this prestigious award. To be awarded a Certificate of Achievement, the State published an easily readable and efficiently organized CAFR. This report also satisfied both GAAP and applicable legal requirements.

A Certificate of Achievement is valid only for a one-year period. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and are submitting it to the GFOA to determine its eligibility for another certificate.

The CAFR represents the responsibility of the State Auditor to give the citizens of Wyoming an accurate picture of the financial condition of their state government. Great strides have been made in the past few years to improve our State's accounting and financial reporting: implementation of GAAP, preparation of the CAFR, an independent audit of our financial statements, and implementation of various Governmental Accounting Standards Board (GASB) standards. All have contributed to better financial management. My appreciation goes out to the Legislature and our staff for making these improvements possible.

Preparation of the CAFR could not have been accomplished without the cooperation and capable assistance of all State agencies. I especially appreciate the staff in the State Auditor's Office, whose commitment to serve the citizens of Wyoming is exemplary. I extend thanks to the Division of Economic Analysis and the CREG Committee for information used in this letter. I also thank the State Parks and Cultural Resources, State Archives and Technical Services, for the use of their photographs and narratives that reflected the 20th anniversary of the devastating Yellowstone fires of 1988. Thank you!

Best regards,

The Yellowstone National Park fires of 1988 started as almost 250 individual fires between June and August which spread quickly out of control due to howling winds and drought. The smaller fires combined into larger infernos, which burned for several months. Photo Credits: The Official Website of Yellowstone National Park; Yellowstone Digital Slide File.

INDEPENDENT AUDITOR'S REPORT

Honorable Governor, Members of the Legislature
State of Wyoming
Cheyenne, Wyoming

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wyoming (the "State") as of and for the year ended June 30, 2008, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Wyoming Community Development Authority, the Wyoming Natural Gas Pipeline Authority, Wyoming Infrastructure Authority, or the Wyoming Department of Transportation, which are shown as discretely presented component units. In addition, we did not audit the financial statements of the University of Wyoming Foundation (Foundation), a component unit of the University of Wyoming, which is included in the balances for the University of Wyoming (University), a discretely presented component unit of the State. The Foundation represents approximately 22% of total assets and 6% of total revenues of the University. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the Wyoming Community Development Authority, the Wyoming Natural Gas Pipeline Authority, Wyoming Infrastructure Authority, the Wyoming Department of Transportation, and the Foundation portion of the University component units, is based on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wyoming as of June 30, 2008, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As explained in Note 3, the financial statements include investments valued at approximately \$919,000,000 (5.1% of the State's combined net assets), whose fair values have been estimated by management in the absence of readily determinable fair values. Management estimates are based on information provided by the fund managers.

The Management's Discussion and Analysis, pages 4 through 17, and the budgetary comparison information and infrastructure modified approach information, pages 91 through 99, are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We and the other auditors have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Wyoming's basic financial statements. The introductory section i through vii, supplementary information pages 101 through 179, and the statistical section, pages 181 through 232, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section and statistical section, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. This information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The State Auditor's Office offers readers of the State of Wyoming's financial statements this narrative overview and analysis of the financial activities of the State of Wyoming for the fiscal year ended June 30, 2008. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found on pages i-iii of this report.

Financial Highlights

Government-Wide:

- The assets of the State of Wyoming exceeded its liabilities as of June 30, 2008 by \$11.3 billion (reported as net assets). Of this amount, \$3.8 billion is unrestricted net assets that may be used to meet the government's ongoing obligations. Component units reported net assets of \$6.5 billion.

Fund Level:

- As of June 30, 2008, the State of Wyoming's governmental funds reported combined ending fund balances of \$10.4 billion, an increase of \$1 billion.
- At the end of the fiscal year, unreserved fund balance for the general fund was \$10 million. This was after the transfer of \$642 million to the Budget Reserve Fund, per legislative directive.
- The enterprise funds reported net assets at year-end of \$462 million.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the State of Wyoming's basic financial statements. Financial reporting is intended to provide external parties that read financial statements with information that will help them to make decisions or draw conclusions about an entity. These parties do not always have the same specific objectives. In order to address the needs of as many parties as reasonably possible, the State's annual report consists of three major sections in accordance with required reporting standards: Management's Discussion and Analysis (MD&A), the basic financial statements, and required supplemental information. The State of Wyoming's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements.

Government-wide financial statements. The *government-wide financial statements* are designed to provide readers with a broad overview of the State of Wyoming's finances, in a manner similar to a private-sector business. The State's government-wide financial statements include the *statement of net assets* and *statement of activities*. These statements include all non-fiduciary assets and liabilities using the accrual basis of accounting.

- The purpose of the *statement of net assets* is to report all of the assets held and liabilities owed by the State. The State reports all of its assets when it acquires ownership over the assets and reports all of its liabilities when they are incurred. The difference between the State's total assets and total liabilities is titled *net assets* and this difference is similar to the owner's equity presented by a private-sector business.

The government-wide statement of net assets can be found on page 19 of this report.

- The purpose of the *statement of activities* is to present all the revenues and expenses of the State of Wyoming. Again, the items presented on the statement of activities are measured in a manner similar to the approach used by a private-sector business in that revenues are recognized when earned or established criteria are satisfied and expenses are reported when incurred by the State. Revenues are recorded when earned regardless of when the cash will be received and expenses are recorded even though they may not have been paid during the current period (e.g., uncollected taxes and earned but unused vacation leave).

The government-wide statement of activities can be found on pages 20-21 of this report.

Both statements report three activities:

- **Governmental Activities** – Most of the State's basic services are reported under this category. Taxes and intergovernmental revenues generally fund these services. The Legislature, the Judiciary, and the general operations of the Executive departments fall within the governmental activities.
- **Business-type Activities** – The State charges fees to customers to help it cover all or most of the cost of certain services it provides. Workers' compensation and the State's unemployment compensation services are examples of business-type activities.
- **Component Units** – Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. The State has 3 authorities, 1 university, and 2 state agencies that are reported as discretely presented component units of the State. The State blends 1 component unit into the internal service funds.

Fund financial statements. The major fund financial statements begin on page 22 and provide more detailed information about the State's most significant funds – not the State of Wyoming as a whole. Funds are accounting devices that the State uses to keep track of specific sources of funding and spending. Except for the general fund, a specific fund is established to satisfy legal requirements established by external parties or governmental statutes or regulations. The State of Wyoming establishes other funds to control and manage money for particular purposes or to show that it is properly using certain resources. All of the funds of the State of Wyoming can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

- **Governmental funds.** Most of the State's basic services are reported in the governmental funds, which focus on how money flows into and out of those funds and the balances left at year-end that are available for future spending.

Governmental fund financial statements consist of a balance sheet and statement of revenues, expenditures, and change in fund balances. The statements are prepared on an accounting basis that is significantly different from that used to prepare the government-wide financial statements. All of the State's programs are included in the governmental funds, which focus on how cash and other financial assets that can readily be converted to cash flow in and out in a short period of time. For example, amounts reported on the balance sheet include items such as cash and receivables collectable within a short period of time, but do not include capital assets such as land and buildings. Fund liabilities include amounts that are to be paid in a short period after the end of the fiscal year. The difference between a fund's total assets and liabilities is labeled as the fund balance. The unreserved-undesignated portion of fund balance generally indicates the amount that can be used to finance next year's activities.

The operating statement for governmental funds reports only those revenues and expenditures that were collected in cash or paid in cash, respectively, during the current period or very shortly after the end of the year. Consequently, the governmental funds statements provide a short-term view that helps determine if there are more or fewer financial resources to finance the State's programs. Because this information does not encompass the long-term focus of the government-wide statements, we provide an analysis reconciling the total fund balances to the amount of net assets reported in the statement of net assets.

Also, there is an analysis following the statement of revenues, expenditures, and changes in fund balances that reconciles the change in net assets of the governmental activities presented in the government-wide statement of activities to the change in fund balance presented in the statement of revenue expenditures and changes in fund balance. These two reconciliation schedules (pages 23 and 25) provide an analysis of transitioning from modified accrual accounting (Fund Basis) to full accrual accounting (Government-wide Basis). The following summarizes the impact of transitioning from modified accrual to full accrual accounting:

- Capital assets used in governmental activities are not reported on governmental fund statements.
- Internal service funds are reported as governmental activities, but reported as proprietary funds in the fund financial statements.

- Unless due and payable, long-term liabilities, such as capital lease obligations, compensated absences, bonds payable, and others only appear as liabilities in the government-wide statements.
- Certain other outflows represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental fund statements.
- **Proprietary funds.** When the State charges customers for the services it provides, whether to outside customers or to other state agencies within the State, these services are generally reported in proprietary funds. Proprietary funds (enterprise and internal service) utilize accrual accounting: the same method used by private sector businesses. Enterprises funds report activities that provide supplies and services to the general public. An example is the State Workers' Compensation. Internal service funds report activities that provide supplies and services for the State's other programs and activities-such as the State's Information Technology Division. Internal service funds are reported as governmental activities on the government-wide statements since their primary purpose is to support those activities.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The enterprise funds are broken out between major and non-major. Conversely, internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds is provided in the form of combining statements in the supplementary information section of this report.

The basic proprietary fund financial statements can be found on pages 26-28 of this report.

- **Fiduciary funds.** The State acts as a trustee or fiduciary for its employee pension plan. It is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. The State's fiduciary activities are reported in separate Statements of Fiduciary Net Assets and Changes in Fiduciary Net Assets. These statements include pension, investment trust, private purpose, and agency funds, which use accrual accounting. The government-wide statements exclude fiduciary fund activities and balances because these assets are restricted in purpose and do not represent discretionary assets of the State to finance its operations.

The basic fiduciary fund financial statements can be found on pages 29-30 of this report.

Notes to the Basic Financial Statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the basic financial statements can be found on pages 32-90 of this report.

Required Supplementary Information is presented that further explains and supports the information in the financial statements. The Required Supplementary Information includes budgetary comparisons schedules primarily prepared on a biennial basis. Also included is a discussion of the Wyoming Department of Transportation (DOT) and how they account for infrastructure assets using the modified approach.

Required supplementary information can be found on pages 91-99 of this report.

Other Supplementary Information includes combining statements referred to earlier in connection with non-major governmental, enterprise, internal service and fiduciary funds that are presented immediately following the required supplementary information.

Other supplementary information can be found on pages 101-179 of this report.

Government-Wide Financial Analysis

As noted earlier, net assets may serve over time as a useful indicator of a State's financial position. In the case of the primary government (State of Wyoming), assets exceeded liabilities by \$11.3 billion at the close of fiscal year 2008. This was an increase of \$1.2 billion. This increase in net assets was due primarily to continued high prices for the State's energy commodities. For fiscal year 2008 commodity prices remained high relative to historical standards, these prices had continued to increase as oil hit an all time high of \$147 per barrel and natural gas prices, which had declined in the first half of fiscal year 2008 rose during the second half. These increases are reflected in the State's mineral severance tax and federal mineral royalties, major revenue sources for the State.

The following condensed financial information was derived from the government-wide Statement of Net Assets:

State of Wyoming's Net Assets for Fiscal Year Ended June 30, 2008						
	Governmental Activities		Business-Type Activities		Total Primary Government	
	2007	2008	2007	2008	2007	2008

Long-term liabilities	96,245,433	89,522,108	77,199,041	796,356,041	868,235,914	885,878,149
Total liabilities	5,027,630,988	4,928,608,793	1,572,334,354	1,565,150,155	6,599,965,342	6,493,758,948
Net assets:						
Invested in capital assets, net of related debt	377,054,638	469,809,103	4,023,040	2,730,936	381,077,678	472,540,039
Restricted	6,095,047,829	6,582,594,145	342,939,117	438,386,465	6,437,986,946	7,020,980,610
Unrestricted (deficit)	3,295,894,030	3,797,598,268	21,335,732	21,172,573	3,317,229,762	3,818,770,841
Total net assets	\$ 9,767,996,497	\$ 10,850,001,516	\$ 368,297,889	\$ 462,289,974	\$ 10,136,294,386	\$ 11,312,291,490

The investments in capital assets (e.g., land, buildings, machinery, and equipment), less any related debt used to acquire those assets that is still outstanding, is \$473 million. The State of Wyoming uses these capital assets to provide services to the citizens; consequently, these assets are not available for future spending. Although the State of Wyoming's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the State of Wyoming's net assets, \$7 billion, represents resources that are subject to restrictions on how they may be used. The remaining balance of unrestricted net assets is \$3.8 billion.

The majority of the current and other non-current assets of \$17.3 billion, consists of various cash and pooled investments of \$14.8 billion, and accounts receivable, due from other governments and loan receivables (including interest receivable) of \$2.3 billion. The remaining amount is comprised of other assets such as inventory and prepaid expenses.

The current liabilities of \$5.6 billion are comprised of various items: \$2.5 billion is related to liabilities under security lending; \$225 million is related to claims and benefits payable; \$2.5 billion is related to various accounts payable. The amount of unavailable revenue totaling \$263 million is attributable to property taxes and long term loans reserved. The remaining amount of \$112 million is made up of compensated absences, current portion of bonds payable, and various other liabilities.

The majority of the long-term liabilities of \$886 million is comprised of claims and benefits payable of \$808 million, compensated absences of \$20 million and bonds payable of \$41 million. The State implemented GASB 45 for fiscal year 2008. The initial net OPEB liability is \$12 million. The remaining amount is made up of various other liabilities.

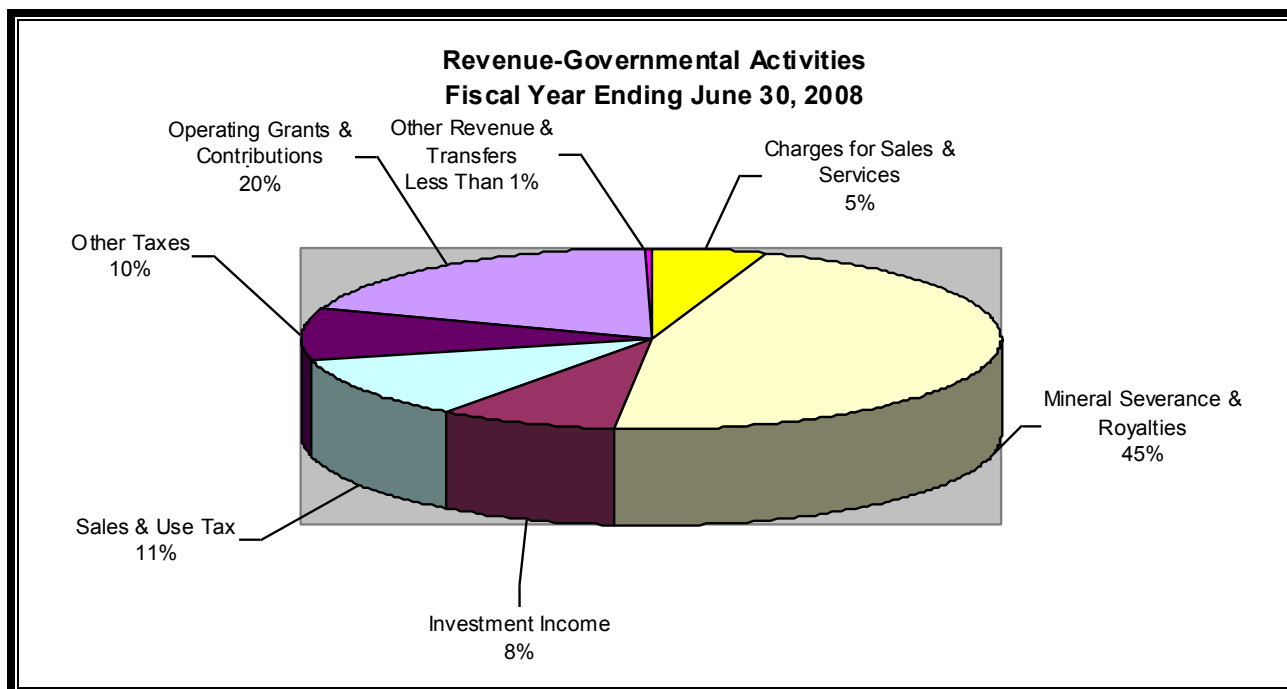

As of June 30, 2008, the State of Wyoming is able to report positive balances in all three categories of net assets for the government as a whole. The same situation held true for the prior fiscal year.

The following condensed financial information was derived from the government-wide Statement of Activities and reflects how the State's net assets changed during the fiscal year:

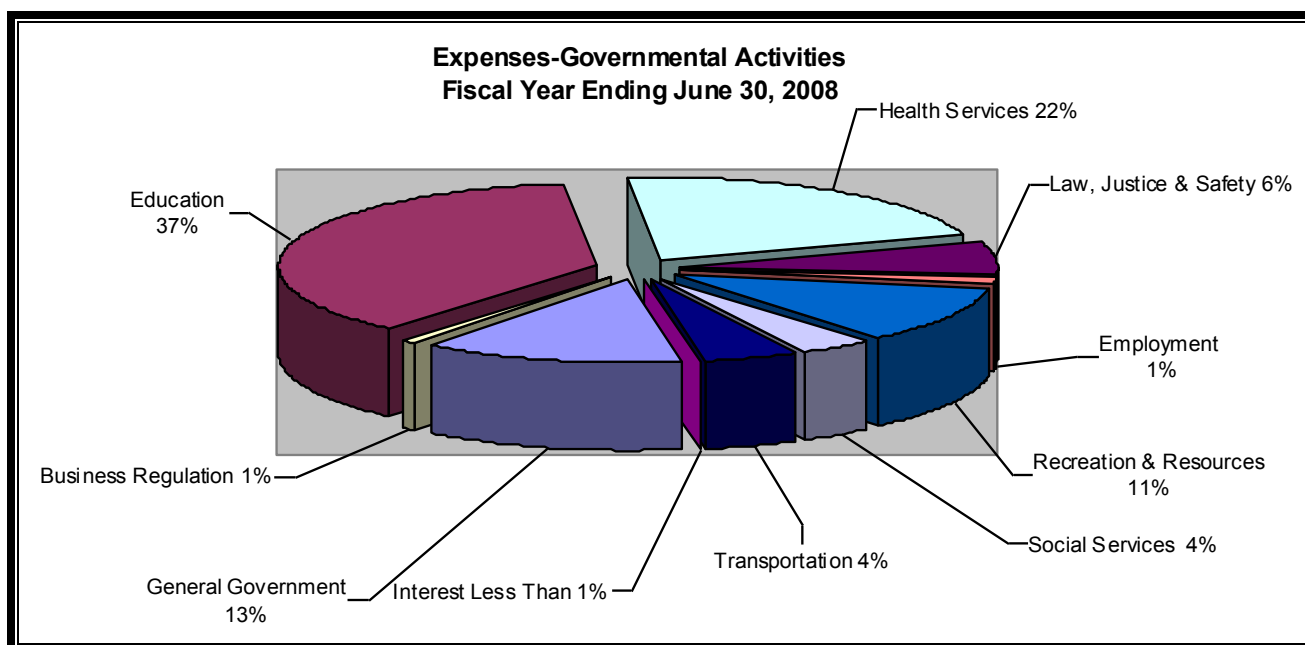

State of Wyoming's Changes in Net Assets for Fiscal Year Ended June 30, 2008 Statement of Activities

The increase in net assets related to governmental activities for the State of Wyoming was \$1 billion during the current fiscal year. The majority of this increase is attributable to the revenues received from the State's commodities in the form of mineral severance taxes, federal mineral royalties and the State's sales and use tax on items related to the mining industry.

The chart below represents revenues of the governmental activities for the fiscal year:

The following chart represents expenses of the governmental activities for the fiscal year:

Business-type activities. The net assets of the business type activities increased by \$94 million during the fiscal year. This change was an overall increase of revenues over expenditures of \$94 million for fiscal year 2008 activity.

Financial Analysis of the State of Wyoming's Funds

As noted earlier, the State of Wyoming uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the State of Wyoming's *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable* resources, as stated earlier. Such information is useful in assessing the State of Wyoming's financing requirements. In particular, *unreserved fund balance* may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of June 30, 2008, the State of Wyoming's governmental funds reported combined ending fund balances of \$10.4 billion, an increase of \$1 billion, in comparison with the prior year. Of this total fund balance, \$6.4 billion, is reserved within the permanent funds as nonexpendable. In addition, a portion of the fund balance is *reserved* to indicate that it is not available for new spending because it has already been committed 1) to liquidate contracts and purchase orders of the prior period, \$515 million, 2) for loans and advance receivables, \$370 million or 3) for inventory and prepaid expenses \$3 million.

General Fund. The general fund is the chief operating fund of the State of Wyoming. At the end of the current fiscal year, unreserved fund balance of the general fund was \$10 million, while total fund balance was \$212 million. The net change in fund balance for 2008 in the general fund was a \$582 million decrease. A major element which factors in the change in fund balance, as to whether the change is a decrease as it is this year or an increase which it was last year, is primarily a result of a legislative directive that requires the undesignated general fund balance to be capped at an amount not to exceed \$10 million at the end of a biennium. Because Fiscal Year 2008 is the end of the biennium, this cap applies, and the amount in excess of \$10 million is transferred out to the Budget Reserve Fund. For this reporting period this transfer totaled \$642 million. This legislative requirement will continue to cause significant swings in the General Fund's undesignated fund balance from year to year until appropriately corrected. A more detailed comparative analysis of the activity for the General Fund can be found on pages 12-15, of this MD&A.

Foundation Program Fund. Fund balance at June 30, 2008 totaled \$450 million, a net increase in fund balance of \$347.5 million. This fund had carried a legislative restriction on its undesignated fund balance which stated it shall not exceed \$100 million. This restriction is no longer in effect due to the Excellence in Higher Education Endowment Fund (Hathaway Scholarship and Excellence in Higher Education funds being fully funded during fiscal year 2008. For the biennium ending June 30, 2010, the undesignated fund balance in excess of \$100 million is to be transferred to the Permanent Common School Land Fund.

Legislative Reserve Fund. Fund balance at June 30, 2008 totaled \$1.4 billion, a net increase in fund balance \$729 million for the year. A major portion of this increase was the \$642 million being transferred from the General Fund to this fund.

Common School Land Fund. As of June 30, 2008, this fund balance totaled \$1.9 billion, a net increase in fund balance of \$107 million for the year. This increase due to those school trust lands managed for the benefit of schools producing \$35 million more in revenues over 2007, and investment income \$65 million greater in 2008 than in 2007.

Permanent Mineral Trust Fund. Fund balance at June 30, 2008, totaled \$4.2 billion, a net increase in fund balance of \$377 million for the year. These changes between years is primarily due to a \$105 million increase in mineral severance taxes, and a return of interest income from the General Fund, resulting in \$171 million in investment earnings being returned to this corpus per legislatively directed caps.

Proprietary funds. The State of Wyoming's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

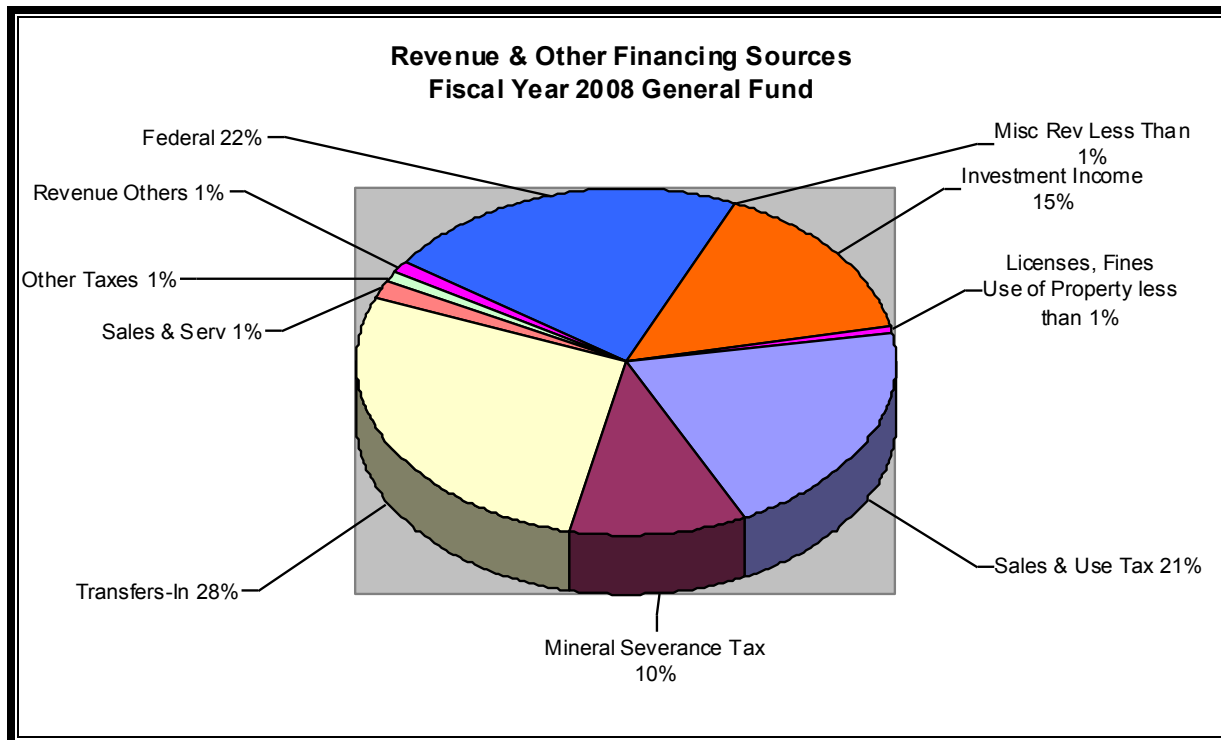

Unrestricted net assets of the enterprise funds as of June 30, 2008, totaled \$21.2 million. The major enterprise fund, the Worker's Compensation Fund, had net assets of \$142 million as of June 30, 2008, which is a \$73.1 million improvement over the prior year. This increase due to revenues primarily from charges for sales and service and investment income being sufficient to pay operating expenses including claims and benefits and produce this net increase.

General Fund Budgetary Highlights

The adjusted 2007-2008 Biennial Appropriations for the General Fund totaled \$4.7 billion. Budgetary changes to the General Fund for fiscal year 2008 totaled a net increase of \$239 million. The major increases are briefly summarized below:

- \$110 million Highway Construction (Transportation);
- \$32 million University of Wyoming Construction;
- \$33 million Wyoming Business Council (Employment, Economic Development and Commerce);
- \$53 million Federal Funds (across various programs);
- \$3 million Construction in Progress;
- \$4 million Western Wyoming College Dormitory Residence Hall;
- \$3 million Veterans Tax Exemption.

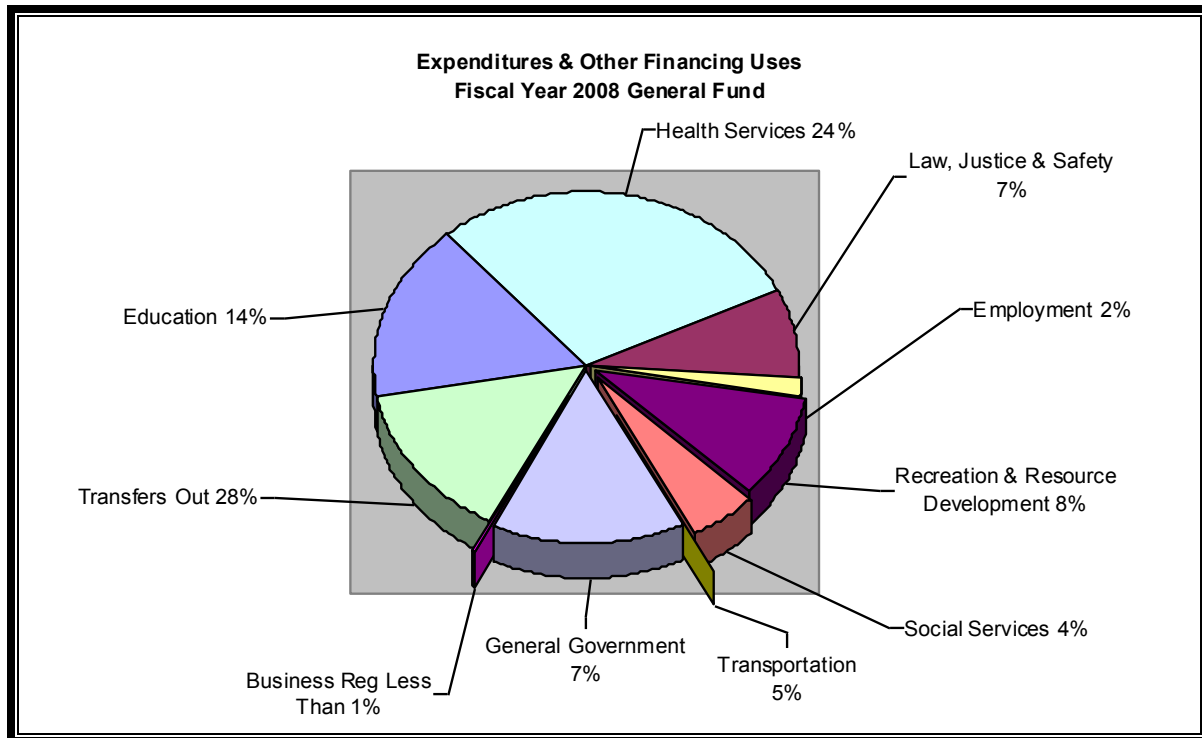

The total general fund revenues are presented in a pie chart below to display how sources relate to total revenue. The table on the following page shows the change in 2007 and 2008 revenue sources. On page 14, General Fund expenditures are similarly presented, depicting functions as they relate to total expenditures.

As shown in the table following, total Revenues decreased overall by \$484 million, with Other Financing Sources (transfers-in) decreasing 37% or \$426 million in fiscal year 2008. The General Fund saw an increase from mineral severance taxes and minor changes across the majority of the other revenue sources. Because of the interest earnings cap imposed by the Permanent Mineral Trust Reserve Fund (Spending Policy Reserve Fund), interest earnings of \$181 million originally transferred to the General Fund from the Permanent Mineral Trust Fund was transferred back to the spending policy reserve fund due to the earnings cap.

General Fund Revenue and Other Financing Sources for Fiscal Year Ended June 30, 2008				
	FY07	FY08	Increase (Decrease)	Percent Change
Taxes:				
Sales & Use	\$ 507,799,309	\$ 530,924,672	\$ 23,125,363	5%

Capital Leases	865,423	387,801	(477,622)	-55%
Transfers-In	1,146,564,237	720,622,368	(425,941,869)	-37%
Total Other Financing Sources	1,147,429,660	721,010,169	(426,419,491)	-37%
Total Revenue & Other Financing Sources	\$ 3,039,919,389	\$ 2,556,220,672	\$ (483,698,717)	-16%

Because the Legislature considers the General Fund and Budget Reserve Fund as one 'pot' when making appropriations, transfers from the Budget Reserve to the General Fund are used as a 'budget balancer' in the Appropriations Bill to 'balance out' the expenditures coming from the General Fund. The percentage change of transfers-in to the General Fund is a result of these 'budget balancer' transfers and may vary widely year to year depending on whether it's the end of a biennium or the middle of a biennium. Fiscal year 2008 is the end of a biennium. As noted in the above table, transfers in for fiscal year 2008 show a decrease of 37 percent from 2007. This percentage decrease is a function of the 'budget balancer' transfers discussed above.

As shown in the table following, overall Expenditures increased by 34% or \$802 million, while Other Financing Uses increased by 159 percent or \$536 million in fiscal year 2008. General Government decreased its expenditures by \$93 million. A majority of this decrease to General Government expenditures was the result of recording securities lending expenditures on a gross basis for financial reporting purposes. While this added \$143 million to General Government expenditures year over year, it was \$71 million less than was recorded for fiscal year 2007.

Transportation expenditures increased \$111 million or 198 percent. This percentage increase is attributable to the State increasing their General Fund appropriations for highway maintenance. GAAP requires these transfers to a component unit be reclassified as expenditures in the primary government, rather than as a "transfer out."

Recreation & Resource Development increased \$45.6 million or 33 percent. This increase was largely attributable to increased funding to cities, towns and counties through legislatively directed payments utilizing specific formula distributions as well as providing funding for capital projects through an application process.

General Fund Expenditures and Other Financing Sources for Fiscal Year Ended June 30, 2008					
	FY07	FY08	Increase (Decrease)	Percent Change

Capital Asset and Debt Administration

Capital Assets. The State of Wyoming's investment in capital assets, net of related debt, for its governmental and business type activities as of June 30, 2008, amounts to \$473 million (net of accumulated depreciation). This investment in capital assets includes land, buildings and systems improvements, machinery and equipment, and park facilities.

Major capital asset events during the current fiscal year included the following:

- The Supreme Court building major upgrade totaling approximately \$15 million is near completion at the close of the fiscal year.
- Architectural design and construction is continuing for the new Military Headquarters; \$140 million had been appropriated for the complete project, with expenditures totaling 5.4 million at the close of the fiscal year.
- Construction continues on the new prison in Torrington for the Department of Corrections construction in progress had reached approximately \$58.1 million.

More detailed information about the State's incomplete construction in progress is presented in Note 12 to the basic financial statements, on page 87.

At the end of the fiscal year 2008, the State had invested \$518 million, net of accumulated depreciation, in a broad range of capital assets (see the table below). The accumulated depreciation as of June 30, 2008, totaled \$329 million.

Capital Assets, Net of Depreciation for Fiscal Year Ended June 30, 2008							
	Governmental Activities		Business-Type Activities		2007	2008

Additional information on the State of Wyoming's capital assets can be found in Note 5 on pages 64-67 of this report.

The State's Department of Transportation (DOT), a component unit of the State, is responsible for the majority of the infrastructure (consisting of roadways and bridges). As allowed by GASB Statement No. 34, DOT has adopted an alternative process for recording depreciation expense on selected infrastructure assets. Under this alternative method, referred to as the modified approach, DOT expenses certain maintenance and preservation costs and does not report depreciation expense. More detailed information about the DOT capital assets and the reporting criteria are available in the Wyoming Department of Transportation Component Unit Financial and Compliance Report as of September 30, 2007 and on pages 98-99 of this report. DOT's policy is to maintain 83% of its national highway system bridges and 80% of its non-national highway system bridges in acceptable condition. In 2007, 96.4% of all NHS bridges were rated acceptable or above and 93.2% of non NHS bridges were rated acceptable or above. DOT's policy is to maintain its national highway system streets at an average rating of 3.25 and its non-national highway system streets at 3, on a 0-5 point scale. In 2007, the National Highway System streets rated 3.46 and the non-national highway system rated 3.16.

Bonded debt.

The state did not issue any new debt for fiscal year 2008 either as new or as refunding of old debt.

At the end of the current fiscal year, the State of Wyoming had total bonded debt outstanding of \$43.9 million. This amount, represents bonds secured solely by specified revenue sources (i.e., revenue bonds).

The State of Wyoming has a debt limitation for revenue bonds relating to capital construction in the amount of \$105 million, which is significantly in excess of the outstanding revenue bond debt.

Additional information on the State of Wyoming's long-term debt can be found in Note 8 on pages 70-77 of this report.

Economic Outlook and Condition

National Economy

Nationally, a widening recession is threatening the United States, European and Asian economies. In September 2008 the current financial crisis began to engulf not only the U.S. economy but the global economy putting the US and global economies in an ever widening recession. The federal government responded with a \$700 billion bailout of financial and credit markets designed to prevent credit markets from seizing up. The auto industry's 'Big 3' are edging ever closer to the financial abyss unless the federal government can work some type of bailout. The stock market has lost some 40 percent of its value from Sept 2008 to November 2008. Individual pension plans such as 401ks, IRAs and Deferred Compensation Plans have been ravaged by the decline in stock values. Several states face budgetary shortfalls due to economic woes. The national unemployment rate has soared from 4.5% at June 30, 2007 to 6.5% the highest level since 1994.

Wyoming's Economy

According to a report on Wyoming's economy by First Interstate Bank, the state will experience slower growth in the second half of 2008 into 2009, but the state will continue to outperform the nation with stronger job growth and lower unemployment rates.

Wyoming is not suffering from the wave of housing foreclosures as reported in other sections of the country. Nationally, about 40% of the foreclosures are sub-prime related mortgages. In Wyoming, only three percent of mortgages are classified as sub-prime.

Wyoming added 10,000 new jobs in the past year. This year the increase is expected to be only 8,000. The report noted that, considering the rest of the US economy could be in a recession this is a pretty solid performance.

The following are excerpts from the Economic Analysis Division's (EAD) *Ten Year Outlook Wyoming Economic Forecast: 2007-2016*—for most economic indicators, Wyoming's economy does not mirror the national economy. Wyoming's state economy continues to be one of the least diversified in the nation. This report further illustrates the importance of how the Mining Sector continues to be one of the most important sectors in Wyoming's economy. For example, data for the latest year cited 2005 showed that mining contributed 30 percent to the State's Gross State Product (GSP), while nationwide, this sector's contribution to the gross domestic product was 1.7 percent.

The other area, which this report cites as reflecting the magnitude of Wyoming's dependence on the mining industry, is the State's finances. Mineral severance taxes, interest from the Permanent Mineral Trust Fund, mining related sales and use tax collections, a gross products tax levied on mineral production and federal mineral royalties provide major sources of revenue for the State's General Fund, for primary and secondary education including school capital construction, and for cities, towns and counties of Wyoming. These sources combined are the primary reason Wyoming has no state personal or corporate tax and a comparatively low residential property tax. The report goes on to say that ...In terms of revenue sources the provision of public services in the state are about as dependent on mining industries in fiscal year 2006 as in fiscal year 1981.

This report's short-term and long-term outlook will see stronger than average growth, which will continue to be supported by increased natural gas mining. Although mining jobs are expected to slow to more sustainable levels, the increased demand for the state's natural resources from national markets will help provide a steady source of mining jobs and revenues for the State. Outside of the mining industry, however, the State's future prospects will be somewhat limited by a job market that fails to attract high-growth job opportunities. Although migration has recently

reversed to a positive trend, many younger and educated workers will be tempted to move to other states with more versatile job opportunities as long as labor markets are relatively tight in those economies.

- As of June 2008, Wyoming's unemployment rate was 3.2 percent while June 2007 was 3.3%. This compares favorably with the 5.5% rate for the United States in June of 2008, which increased by a percentage point from its year ago mark of 4.5 percent unemployment.
- For additional information and analysis of Wyoming's economy you are referred to the following website of the State's economic analysis division at <http://eadiv.state.wy.us/>

Commodity prices continued to generate increased revenues for the State for fiscal year 2008. Oil prices reached an all time high of \$147/barrel in July 2008. These higher commodity prices also translated to higher transportation costs with gasoline hitting a high of \$4.14 per gallon. Increased food costs were also a byproduct of increased transportation costs. All this translated into an annual inflation rate for Wyoming of 7.49%. With commodity prices continuing to fall the price of a gallon of gas had fallen to \$1.43 as of December 5th, 2008.

Request for information

This financial report is designed to provide a general overview of the State of Wyoming's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the State of Wyoming, State Auditor's Office, State Capitol, Room 114, Cheyenne WY, 82002 or see at <http://sao.state.wy.us/>.

Basic Financial Statements

Left: Military fire crews are walking to buses at the northeast entrance (photographer Jim Peaco, September 4, 1988)

Above: Single bison crossing road between two fire engines in very smoky conditions (photographer Jeff Henry; 1988)

Left: Woman firefighter wearing nomex (photographer Jeff Henry; 1988)

Right: Firefighters at work on Yellowstone National Park fires (photographer unknown; 1988)

In 1988 over 72,000 fires were reported in the western United States. With fires raging in other areas of the western United States, the staffing levels of the National Park Service and other land management agencies were inadequate to crew the Yellowstone National Park situation. At the peak of the effort, over 9,000 firefighters were assigned to the park and over 4,000 U.S. Military personnel assisted in the fire suppression efforts. By the time the fires finally went out, more than 25,000 had been involved in the fire suppression efforts. No firefighters died while fighting the fires in Yellowstone, although two fire-related deaths occurred outside the park. Reconciliation of the Balance Sheet to the Statement of Net Assets

June 30, 2008

Fund balances—total governmental funds	\$ 10,381,133,288
--	-------------------

Amounts reported for *governmental activities* in the statement of net assets are different because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds.	502,380,706
---	-------------

Other assets are not available to pay for current-period expenditures and therefore are deferred in the funds.	8,294,890
--	-----------

Internal service funds are used by management to charge the costs of certain activities, such as insurance, telecommunications, technology and transportation to individual funds. The assets and liabilities of internal service funds are included in governmental activities in the statement of net assets.	56,298,305
---	------------

Some liabilities are not due and payable in the current period and therefore are not reported in the fund.	(98,105,673)
--	--------------

These liabilities include:

Net assets of governmental activities	<u>\$ 10,850,001,516</u>
---------------------------------------	--------------------------

Reconciliation of the Statement of Revenues, Expenditures & Changes in Fund Balances to the Statement of Activities

For the Year Ended June 30, 2008

Net change in fund balances—total governmental funds	\$	976,576,458
Amounts reported for <i>governmental activities</i> in the statement of activities are different because:		
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays \$118,813,692 exceeded loss on disposal of capital assets (\$1,547,803) and depreciation (\$27,152,520) in the current period.		90,113,369
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.		(1,815,232)
Repayment of bond principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets.		2,685,300
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.		1,228,243
Internal service funds are used by management to charge the costs of certain activities, such as insurance, telecommunications, technology and transportation to individual funds. The net revenue (expense) of internal service funds is included in governmental activities in the Statement of Activities.		(7,322,702)
Change in net assets of governmental activities	\$	<u>1,061,465,436</u>

See Notes to the Basic Financial Statements

Notes to the Basic Financial Statements

For the Year Ended June 30, 2008

NOTE 1 Summary of Significant Accounting Policies

A. Reporting entity

The basic financial statements include all funds of the primary government, which is the State, as well as the component units determined to be included in the State's financial reporting entity. The decision to include a potential component unit in the State's reporting entity is based on several criteria, including legal standing, fiscal dependency, and financial accountability. Based on the application of these criteria, the following is a brief review of certain entities included in the State's reporting entity.

In accordance with Governmental Accounting Standards Board (GASB) Statement No. 14, *The Financial Reporting Entity*, entities with which the State has significant operational or financial relationships such as boards, commissions and authorities are considered component units. Component units are either discretely presented or blended. Discrete presentation entails reporting component unit financial data in columns separate from the financial data of the primary government (the State). Blending requires the component unit's balances and transactions be reported with the balances and transactions of the State.

The following organization is the State's blended component unit:

The Wyoming Building Corporation is an independent authority that was established to finance real and personal property used by the State. The Bldg. Corp. is blended as an internal service fund in this report because it provides services almost entirely to the State. The State approves the appointment of the directors and the Bldg. Corp. is fiscally dependent on the State.

The following organizations comprise the State's discretely presented component units:

The Wyoming Department of Transportation administers the State's construction and maintenance programs for roads and bridges and is legally separate from the State. The Governor appoints a voting majority of the DOT's Commission and is able to remove appointed board members at will. The financial information included for DOT relates to its fiscal year ended September 30, 2007.

The Wyoming Community Development Authority is an independent authority that provides low interest financing for Wyoming home buyers. WCDA issues negotiable notes and bonds to fulfill its purpose. Neither the faith and credit nor taxing power of the State may be pledged for the amounts so issued. The State appoints a majority of WCDA board members and the State authorizes WCDA bond issuances; thereby, WCDA is financially accountable to the State.

The Wyoming Business Council is an independent authority that provides economic development and growth for the State. The State appoints all of the directors and provides a material subsidy to WBC.

The University of Wyoming is a public land grant research university serving as a statewide resource of higher education. The University of Wyoming is governed by a board made up of twelve members appointed by the Governor with the consent of the Senate and receives significant support from the State.

The Wyoming Pipeline Authority is an independent authority created to plan, finance, construct, develop, acquire, maintain, and operate a pipeline system or systems within or outside of the State of Wyoming. The governing board is appointed by the Governor with the consent of the Senate. The Authority is dependent upon the State to finance its operating costs.

The Wyoming Infrastructure Authority is an independent authority created to diversify and expand the State's economy through improvements in Wyoming's electric transmission infrastructure and to facilitate the consumption of Wyoming energy. The Authority will participate in planning, financing, constructing, developing, acquiring, maintaining and operating electric transmission facilities and their supporting infrastructure. The State appoints the five-member board and has provided funding through loans from the State Treasurer for day-to-day operation of the Authority.

Cheyenne, WY 82001-3627

B. Basis of Presentation

The accompanying financial statements of the State of Wyoming, (the State), have been prepared in conformity with generally accepted accounting principles (GAAP) applicable to governmental organizations in the United States. Such principles are prescribed by the Governmental Accounting Standards Board (GASB), which is the standard-setting body for establishing governmental accounting and financial reporting principles in the United States of America.

The financial statements have been prepared primarily from accounts and records maintained by the State Auditor. Financial data for the Wyoming Retirement System (WRS), Wyoming Department of Transportation (DOT), University of Wyoming (University) including its component unit, the University of Wyoming Foundation (Foundation), Wyoming Community Development Authority (WCDA), Wyoming Business Council (WBC), Wyoming Pipeline Authority (WPA), and the Wyoming Infrastructure Authority (WIA) have been derived from reports prepared by those organizations, based on independent accounting systems maintained by them.

C. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of inter-fund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The **Statement of Net Assets** presents the reporting entities' non-fiduciary assets and liabilities, with the difference reported as net assets. Net assets are reported in four categories:

- **Invested in capital assets, net of related debt** consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes, and other debt that are attributed to the acquisition, construction, or improvement of those assets.
- **Restricted net assets – expendable** include resources in which the State is legally or contractually obligated to spend in accordance with restrictions imposed by external third parties.
- **Restricted net assets – nonexpendable** consist of endowment and similar type funds in which donors or other outside sources have stipulated, as a condition of the gift instrument, that the principal is to be maintained inviolate and in perpetuity, and invested for the purpose of producing present and future income, which may either be expended or added to principal.
- **Unrestricted net assets** consist of net assets that do not meet the definition of the three preceding categories. Unrestricted net assets often are designated, to indicate that management does not consider them to be available for general operations. Unrestricted net assets often have constraints on resources that are imposed by management, but can be removed or modified.

The **Statement of Activities** demonstrates the degree, to which the direct expenses, of a given function, or segment, are offset by program revenues. *Direct expenses* are those that are clearly identifiable within a specific function or segment.

The cost allocation by internal service is included in the direct expenses. *Program revenues* include 1) charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges provided by a given function and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements, with non-major funds being combined into a single column.

D. Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Revenues are classified by program and general revenues. Program revenues include 1) charges to customers or applicants for goods and services 2) operating grants and contributions, and 3) capital grants and contributions. General revenues consist of all revenues not considered program revenue. All taxes are considered general revenues. Certain indirect costs have been allocated to functional activities.

As permitted by GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Funds that use Proprietary Fund Accounting*, the State has elected not to adopt Financial Accounting Standards Board (FASB) statements issued after November 30, 1989, unless the GASB specifically adopts such FASB statements.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60-75 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt services expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Sales and use tax, mineral severance tax, federal mineral royalty tax, and interest associated with the current fiscal period are all considered to be susceptible to accrual and have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the State.

Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of operations.

The State uses funds and component units to report its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain functions or activities.

The Statement of Revenues, Expenditures and Changes in Fund Balances—Governmental Funds reflects a restatement of beginning Fund Balance totaling \$20,539,583. The fund class affected is the Water Fund. This restatement is due to a loan associated with a water development project that had previously been reported as an expenditure .

Governmental Funds:

The State reports the following major governmental funds:

- a. General Fund as the primary operating fund of the State, accounts for all financial resources except those required to be accounted for in another fund.
- b. Foundation Program Fund accounts for federal mineral royalties, mineral severance tax and other revenue sources, which are restricted for payments to school districts.
- c. Legislative Reserve Fund accounts for mineral severance tax and other revenue sources, which are restricted for specific appropriation by the Legislature.
- d. Common School Land Fund accounts for land donated to the State and income derived from those lands. The revenue earned by this fund is restricted for the purpose of establishing, maintaining, and supporting school facilities.

- e. Permanent Mineral Trust Fund accounts for a portion of severance tax. The interest earned by this fund is restricted for distribution to specific funds.

Enterprise Funds account for operations (a) that are financed and operated in a manner similar to private enterprise, where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the State has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

Revenue and expenses are classified as operating and non-operating. Operating revenues and expenses generally result from providing goods and services. All other revenues and expenses are reported as non-operating.

The State reports the following major enterprise fund:

- a. Workers' Compensation Insurance Fund accounts for activities of the Wyoming Workers' Compensation Insurance Fund that provides workers' compensation insurance to government and private businesses.

Internal Service Funds account for the financing of goods or services provided by one department or agency to other departments or agencies of the State, or to other governmental units, on a cost-reimbursement basis. The Internal Service Funds include the Computer Technology Fund, Motor Vehicle Fund, Central Duplicating Fund, Telecommunications Fund, Group Insurance Fund, Wyoming Surplus Property Fund, Personnel/Training Fund, State Self Insurance Fund, and the Wyoming Building Corporation.

Fiduciary Funds:

- a. Pension Trust Funds account for the assets held by WRS, as trustee, for eight retirement systems. The financial information included for WRS relates to its fiscal year ended December 31, 2007. WRS is legally separate from the State. However, the State appoints a voting majority of the WRS board, sets the contribution requirements and has a fiduciary responsibility for WRS assets.
- b. Private-Purpose Trust Funds account for resources of all other trust arrangements in which principal and income benefit individuals, private organizations, or other governments (i.e., unclaimed property/escheat property, and college savings).
- c. Investment Trust Fund accounts for the assets belonging to Wyoming municipalities invested by the State Treasurer (i.e., WYO-Star).
- d. Agency Funds account for assets that the State holds on behalf of others as their agent.

E. Assets, liabilities, and net assets or equity

1. **Deposits and investments.** Current statutes require all cash and investments of State agencies other than those of the University and the WRS to be pooled and invested by the State Treasurer's Office. The State Treasurer maintains different cash and investment pools for the Common School Land Fund, Permanent Mineral Trust Fund, Workers' Compensation Insurance Fund, Wyoming Tobacco Settlement Fund, and Water Fund and one cash and investment pool for the remainder of the fund types. Earnings from the cash and investment pools are credited monthly, utilizing a formula based on the average daily balance, to the applicable accounts and funds. The majority of the funds maintained by the State are not legally allowed to earn interest. The interest earned by these funds is credited directly to the General Fund. The State reports all investments at fair value, except for investments in participating interest-earning investment contracts having a remaining maturity at time of purchase of one year or less. Participating interest earning investment contracts having a remaining maturity at time of purchase of one year or less are recorded at amortized cost. For the purpose of the statement of cash flows, the State considers all assets held in the cash and investment pool to be cash equivalents because the investments are not identifiable to specific funds and the assets can be withdrawn at any time, similar to a demand deposit account.
2. **Receivables and Payables.**
 - a. **Due to Due From.** During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "Due from Other Funds" or "Due to Other Funds" in the balance sheet. See Note 6.
 - b. **Property Taxes.** The counties in the State levy property taxes in the first half of August and submit a portion of the tax levy to the State. The tax levy is divided into two billings: the first billing is mailed in the first half of September, generally September 1; the second billing is generally mailed on March 1. The billings are considered due upon receipt by the taxpayer. The taxpayer has the option of paying the full amount on December 31. Property taxes are assessed as of January 1 of each year for that year.
 - c. **Advances to other funds and component units.** Inter-fund loans receivable are reported as advances and are offset equally by a fund balance reserve account that indicates they do not constitute expendable available financial resources and therefore, are not available for appropriation.

3. **Inventories.** Inventories are reported in the proprietary funds using the lower of average cost or market. In the governmental fund types, inventories are accounted for at cost or average cost on a first-in, first-out basis. Inventory items are considered expenditures when purchased. However, as inventories on hand at June 30, 2008, are significant, they have been recorded as assets in the governmental funds. Inventories are reported by the University at the lower of cost (first-in, first-out) or market except for livestock inventory that is reported at net realizable value. The Department of Transportation's inventories are valued at average cost, less an allowance for obsolete items and charged to expenditures when consumed.
4. **Securities lending collateral.** Securities on loan for cash collateral are reported in the Statement of Net Assets. Liabilities resulting from the security lending transactions are also reported. Additional disclosures describing security-lending transactions are provided in Note 3.
5. **Capital assets.** Capital assets, which include property, plant and equipment, and infrastructure assets are reported in the governmental or business-type activities columns in the government-wide financial statements (Statement of Net Assets). Capital assets are stated at cost where historical records are available and at an estimated historical cost where no historical records exist. Donated capital assets are stated at their estimated fair market value on the date received. The State currently does not capitalize interest costs incurred during construction, except on business-type activities. Capital assets of the business-type activities are capitalized in the fund in which they are utilized. The State's capital assets are depreciated over their useful lives using the straight-line basis.

- a. **Property, plant and equipment.** The State capitalizes all buildings, land and other capital assets that have a value or cost of \$500 or more at the date of acquisition and have an expected useful life of one year or more. Estimated useful lives for capital assets are all being depreciated on a straight-line basis as follows:

Class	Estimated Life
Buildings & Building Improvements	40 years
Vehicles	3 - 7 years
Equipment	3 - 17 years

- b. **Infrastructure.** Infrastructure assets can include roads, bridges, lighting systems, drainage systems and flood control systems, and rest areas. The primary government will have infrastructure in the State Parks and Cultural Resources Division and the Department of Game and Fish. Department of Transportation (DOT) reports most of the infrastructure assets for the State. DOT's capitalization level for infrastructure is \$250,000. In accordance with the alternative approach to depreciating infrastructure assets permitted by GASB Statement No. 34, DOT has elected to expense all infrastructure related expenditures, except for those expenditures related to additions to or improvement of infrastructure assets, in lieu of depreciating infrastructure assets. In order to utilize the alternative system, DOT must maintain an asset management system which will assess asset condition and must maintain infrastructure assets at the condition level established by the DOT. Infrastructure acquired prior to fiscal years ending after June 30, 1980 are reported.
 - c. **Art and the Wyoming State Museum Collection.** The State has not capitalized works of art, historical treasures and artifacts contained in the collections of the Wyoming State Museum. The collection is held for public exhibition, education, or research in furtherance of public service, protected, kept unencumbered, cared for, preserved, and subject to an organizational policy that requires the proceeds from sales of collection items to be used to maintain the existing collection.
6. **Compensated absences.** Employees of the different State agencies earn vacation leave, based on their number of years of service, and sick leave of one day per month. Employees are vested and allowed to accumulate up to 480 hours of vacation leave. In addition, employees are paid for one half of accumulated sick leave upon termination of employment with a maximum payment for one half (½) of 960 hours. The amount of vested accumulated leave that is expected to be liquidated with expendable available financial resources is reported as an expenditure and a liability of the governmental funds in the government fund financial statements. Amounts of vested accumulated leave not expected to be liquidated with expendable available financial resources is not reported by the governmental funds in the government fund financial statements. All vested accumulated leave is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements.
 7. **Deferred revenue.** The State reports deferred revenue on its government-wide statements and its fund financial statements. At the fund level, deferred revenue is recognized either as unearned revenue or unavailable revenue. Unearned revenue arises when resources are received by the State before it has legal claim to them, as when grant funds are received prior to the occurrence of qualified expenditures. In subsequent periods, when both revenue recognition criteria are met, or when the State has a legal claim to the resources, the liability for deferred revenue is removed and the revenue is recognized. Unavailable revenue arises when revenue does not meet the „susceptibility to accrual“ test, which is the revenue must be both

measurable and available to finance expenditures of the current fiscal period, including property tax receivable assessed but not levied.

8. **Long-term obligations.** In the government-wide statements and proprietary fund financial statements, long-term liabilities are reported as liabilities. Long-term debt is recognized as a liability of a governmental fund when due, or when resources have been accumulated in the debt service fund for payment early in the following year. For other long-term obligations, only that portion expected to be financed from expendable available financial resources is reported as a fund liability of a governmental fund. Long-term liabilities expected to be financed from proprietary fund operations are accounted for in those funds.
9. **Fund equity.** Portions of fund equity are reported in the fund financial statements as "reserved" to indicate (1) amounts not available for expenditure, such as equity represented by inventory and prepaid items; and (2) amounts legally segregated for a specific future use, such as those pledged for debt service, or legally binding contractual agreements. Designated fund balance represents tentative plans for future use of financial resources.
10. **Inter-fund transactions.** Inter-fund services provided and used are accounted for as revenue, expenditures or expenses. Transactions that constitute reimbursements to a fund for expenditures/expenses initially made from it that are properly applicable to another fund, are recorded as expenditures/expenses in the reimbursing fund and as a reduction of expenditures/expenses in the fund that is reimbursed. All other inter-fund transactions are reported as transfers. As a general rule, the effect of inter-fund activity has been eliminated from the government-wide statements. Inter-fund receivables and payables have been eliminated from the Statement of Net Assets, except for the residual amounts due between governmental and business-type activities. See further information in Note 7.

F. Reconciliation of government-wide and fund financial statements

- a. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net assets.

The Reconciliation of the Balance Sheet to the Statement of Net Assets includes an item that explains, "Some liabilities are not due and payable in the current period and therefore are not reported in the fund." The details of this \$(98,105,673) difference are shown here:

Bonds Payable	\$ (43,891,282)
Compensated Absences	(45,040,811)
Capital Leases	(1,086,136)
Benefits Payable	(8,087,444)
Net adjustment to reduce fund balance-total governmental funds to arrive at net assets-governmental activities	<u>\$ (98,105,673)</u>

- b. Explanation of certain differences between the Statement of Revenue, Expenditures and Changes in Fund Balance and the government-wide statement of activities.

The Reconciliation of the Statement of Revenues, Expenditures & Changes in the Fund Balance to the Statement of Activities includes an item that explains, "Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds." The details of this \$1,228,243 difference are shown here:

Compensated Absences	\$ (177,909)
Benefits Payable	140,711
Retirement Obligations	7,883
Deferred Interest and Bond Interest Payable	1,129,140
Capital Leases	128,418
Net adjustment to decrease net changes in fund balances-total governmental funds to arrive at change in net assets of governmental activities	<u>\$ 1,228,243</u>

NOTE 2 Funds and Component Units

The following table lists all of the funds and component units reflected in this financial report:

<p>PRIMARY GOVERNMENT:</p> <p>Governmental Funds: General Fund</p> <p>Special Revenue Funds: Foundation Program Fund Legislative Reserve Fund</p> <p>Permanent Funds: Common School Land Fund Permanent Mineral Trust Fund</p> <p>Governmental Funds: Special Revenue Funds: Environmental Quality Fund Board & Regulatory Fund Game and Fish Fund Statutory Reserve Account Fund Special Projects Fund Community College Grants Fund Water Fund Workforce Development Fund Mineral Royalties Fund Government Royalty Distributions Fund Farm Loan Loss Reserve Fund State Revolving Fund Miners Hospital Land Fund Omnibus Land Fund Donations and Bequests Fund Wyoming Wildlife Fund Endowment Fund Oil Surcharge Conservation Fund State Land Fund Flex Benefit Program Fund</p> <p>Permanent Funds: Wyoming Wildlife Trust Fund Montgomery Home for the Blind Fund Wyoming Tobacco Settlement Fund Wyoming Military Assistance Trust Fund Wyoming Cultural Trust Fund Sundry Trust Funds Wyoming Excellence in High Education Endowment Funds</p> <p>Agency Funds: Treasurer's Agency Fund Department of Revenue Fund Other Agency Funds State Lands Fund Funds Held For Individuals</p>	<p>MAJOR FUNDS</p> <p>NON-MAJOR FUNDS</p>	<p>Proprietary Funds: Enterprise Funds: Workers' Compensation Insurance Fund</p> <p>Proprietary Funds: Enterprise Funds: Liquor Commission Fund Canteen Fund Subsistence Insurance Fund Honor Farm Agricultural Sales Fund Wyoming Health Insurance Fund Unemployment Compensation Fund</p> <p>Internal Service Funds: Computer Technology Fund Motor Vehicle Fund Central Duplicating Fund Telecommunications Fund Group Insurance Fund Wyoming Surplus Property Fund Personnel Training Fund State Self Insurance Fund Wyoming Building Corporation</p> <p>Fiduciary Funds Private-Purpose Trust Funds: Unclaimed Property Fund College Savings Fund</p> <p>Investment Trust Fund: WYO-Star</p> <p>Pension Trust Funds: Public Employees Pension Plan Wyoming State Highway Patrol Game and Fish Warden, and Criminal Investigator Retirement Plan Volunteer Firemen's Pension Plan Paid Firemen's Pension Plans (Plans A & B) Wyoming Judicial Retirement Plan Wyoming Law Enforcement Retirement Plan 457 Plan</p> <p>Capital Projects Fund</p> <p>Debt Service Fund</p>
<p>Governmental Component Units: Department of Transportation Wyoming Business Council</p>	<p>DISCRETELY PRESENTED COMPONENT UNITS</p>	<p>Proprietary Component Units: University of Wyoming Wyoming Community Development Authority Wyoming Pipeline Authority Wyoming Infrastructure Authority</p>

NOTE 3 Deposits and Investments

GASB Statement No. 40 *Deposit and Investment Risk Disclosures-An Amendment of GASB Statement No. 3* addresses common deposit and investment risks related to credit risk, concentration of credit risk, interest rate risk and foreign currency risk. As an element of interest rate risk, disclosure is required of investments that have fair values that are highly sensitive to changes in interest rates. GASB 40 also requires disclosure of formal policies related to deposits and investment risks.

In addition, GASB Statement No. 14 *The Financial Reporting Entity* requires separate deposit and investment risk information to be provided for each of the State's component units. This note includes separate deposit and investment disclosure information for the University of Wyoming, Wyoming Retirement System, Wyoming Building Corporation, Wyoming Business Council, Wyoming Community Development Authority, Wyoming Pipeline Authority, and the Wyoming Infrastructure Authority. The University of Wyoming, Wyoming Retirement System and Wyoming Department of Transportation, however, have cash and investments, some of which are held in the State cash and investment pool at June 30, 2008. These investments are included in the respective risk disclosures for the primary government.

MASTER INVESTMENT POLICY

The State Loan and Investment Board (SLIB), consisting of the five elected officials – the Governor, Secretary of State, State Auditor, State treasurer and State Superintendent of Public Instruction – sit as the State Loan and Investment Board. The SLIB is responsible for fiduciary oversight of the state's non-pension investment portfolio. The SLIB establishes the Master Investment Policy and Sub-Policies (Policy). The SLIB reviews the Policy at least annually by law, and updates the Policy throughout the year as needed.

The Policy sets forth roles and responsibilities, acceptable transactions, prohibited transactions and performance expectations on its managed funds. The Policy is aligned with state statutes governing state investments.

Those managing the State's investment program are governed in part by the prudent investor rule contained in the State's Uniform Prudent Investor Advisor Act. This rule states in part:

"[a] Trustee shall invest and manage trust assets as a prudent investor would, by considering the purposes, terms, distribution requirements and other circumstances of the trust."

The Policy restates the prudent investor principle that ...investments or groups of investments shall not be evaluated in isolation but in the context of the entire investment portfolio and as part of an overall investment strategy of the trust or fund from which the investment is derived, consistent with the policies for such trust or fund established under statute by the Board.

Policy also allows a trustee to delegate investment and management functions that a prudent trustee of comparable skills could properly delegate under the circumstances. The Policy further states the trustee shall exercise reasonable care, skill and caution in

- a) Selecting an agent;
- b) Establishing the scope and terms of the delegation, consistent with the purposes and terms of the trust; and
- c) Periodically reviewing the agent's actions in order to monitor the agent's performance and compliance with the terms of the delegation.

At June 30, 2008 the State had external investment managers for equities, fixed income, real estate, private equity, absolute return, overlay and cash management strategies.

State statutes allow monies in the permanent funds to be invested in common stocks not to exceed fifty-five percent (55%). It is a primary goal of the State's Master Investment Policy to obtain an optimal asset allocation for Wyoming's investments. This includes determining the optimal division of an investment portfolio among available asset classes, factoring in such elements as risk and return as central to the overall financial planning and investment management. Investment selection for all funds shall be based on legality, appropriateness, liquidity, and risk/return considerations. There are two classifications of funds:

- Permanent funds and non-permanent funds, which disperse income and capital gains. The funds included in this classification are the Permanent Mineral Trust Fund, the Common School Permanent Land Fund, the State Agency Pool, the Permanent Lands Fund, the University Permanent Land Fund, the Wyoming Tobacco Settlement Trust Fund, the Hathaway Scholarship Endowment Fund, the Higher Education Endowment Fund and the Wyoming State Treasurer's Asset Reserve (WYO-STAR).
- Permanent funds and non-permanent funds, which retain income and capital gains with the fund's portfolio. The only fund in this classification is the Workers' Compensation Insurance Fund.

During fiscal year 2008, the State continued to rebalance its permanent fund portfolios. The following schedule reflects Fiscal Year 2008 weightings of the Permanent Funds:

<u>Permanent Fund</u>	<u>Fixed Income, cash and cash equivalents</u>	<u>Equities</u>
Permanent Mineral Trust Fund	49.5%	50.5%
Common School Land Fund	49.5%	50.5%
Permanent Lands Fund Pool	49.4%	50.6%
Wyoming Excellence in Education Trust Funds:		
Hathaway Scholarship Endowment Fund	75.1%	24.9%
Higher Education Endowment Fund	73.9%	26.1%

<u>Enterprise Fund</u>	<u>Fixed Income, cash and cash equivalents</u>	<u>Equities</u>
Workers' Compensation Fund	84.9%	15.1%

In Fiscal Year 2008, once the goal of a fixed income weighting of 48.0% and an equity weighting of 52.0% is reached, a long-term (10 plus years) total investment return of 7% is expected.

Risk exposures for the different funds within the managed fund classifications including the State's managed fiduciary Unclaimed Property Fund are not significantly different than the deposit and investment risks of the primary government. As each risk element is presented, disclosure will specify whether the Policy formally provides for management of the particular risk being discussed.

A. Custodial Credit Risk-Deposits

Deposits that have exposure to custodial credit risk are those which are not covered by depository insurance and are either uncollateralized, or collateralized with securities held by the pledging financial institution or held by pledging financial institution but not in the depositor-government's name.

STATE OF WYOMING

Wyoming Statutes require any deposit not so insured shall be secured by depository bond or approved collateral securities as required by law.

As of June 30, 2008 the State had no deposits exposed to custodial credit risk.

Custodial Credit Risk-Agency Funds

Deposits not collateralized and not so required by state law include those funds held on behalf of others. At year-end, \$7.5 million was held in demand and savings bank accounts and \$21.3 million was held in bank certificates of deposit. These funds are reported in the agency funds.

UNIVERSITY OF WYOMING—Investment Policy

University investment policy specifies that internally invested funds may be invested in a combination of fixed-income, minimal risk instruments and money market funds. Investment goals for internally invested funds are designed to achieve a return to provide income, protect assets from risk and maintain liquidity to meet spending requirements. Investments are limited to collateralized bank certificates of deposit, money market funds or federally guaranteed or insured securities that mature in less than one year. Custodial services are utilized to safeguard the assets and provide monthly reports.

It is the policy of the University to invest endowment funds under a memorandum of agreement with the University of Wyoming Foundation. Investment goals for these funds are designed to achieve donor objectives, protect assets from excessive risk, provide program income and growth of the endowment and preserve the purchasing power of both the principal and the income. The Foundation Board of Directors reviews and establishes limits on market segment investment concentration, maximum investment in any company, and maximum share of portfolio per manager.

The University oversees the investment of funds for the Advance Payment of Higher Education Costs (APHEC) program through the use of an external investment firm selected by the Board of Trustees. The investment goal for APHEC is the same as for the endowments. The University also has investments managed by the State of Wyoming Treasurer's Office. These investments are managed under the State of Wyoming Master Investment Policy.

The University has funds on deposit with the Wyoming State Treasurer's pooled investments.

UNIVERSITY OF WYOMING—Custodial Credit Risk-Deposits

At June 30, 2008, the carrying amount of the University's demand deposits in financial institutions was \$38,291,252 and the bank balances were \$42,481,847. The demand deposits were fully insured with a combination of FDIC insurance and pledged collateral held in the name of the University. All deposits were held by a qualified depository as outlined in the State statutes.

CUSTODIAL CREDIT RISK

At June 30, 2008, the University had \$10,460,105 on deposit with the Foundation. Detailed information on the Foundation's pooled cash and investments is available from the Foundation.

WYOMING RETIREMENT SYSTEM, WYOMING BUSINESS COUNCIL, WYOMING COMMUNITY DEVELOPMENT AUTHORITY, WYOMING PIPELINE AUTHORITY, WYOMING INFRASTRUCTURE AUTHORITY, AND WYOMING DEPARTMENT OF TRANSPORTATION—Custodial credit risk

As of December 31, 2007 for the Wyoming Retirement System, September 30, 2007 for Wyoming Department of Transportation and June 30, 2008 for the other component units; none had deposits exposed to custodial credit risk.

B. Investment Risk Categories

GASB Statement 40 requires presentation to discuss those risks associated with investment activity including credit risk, custodial credit risk, concentration of credit risk, interest rate risk and foreign currency risk.

Credit Risk is the risk the issuer will not fulfill its obligation to the holder of the investment. The minimum credit ratings for investment debt securities as provided in the State's Master Investment Policy for fixed income managers are A1/P1 or equivalent for commercial paper, BAA for long-term corporate debt, AA for Mortgage-backed securities, and AA for Asset-backed securities. Either Standard and Poor's, Fitch or Moody's ratings are acceptable. Where the issue is split-rated, the lower of the ratings will apply. N/R indicates that the investment is not rated. Legislatively authorized investments represents those investments the Treasurer has been directed to invest in by the Legislature and/or approved by the Legislature.

Custodial credit risk is for those investment securities that are uninsured, are not registered in the name of the government, and are held by either (a) the counterparty or (b) the counterparty's trust department or agent but not in the government's name.

Concentration of Credit Risk is the risk of loss attributed to the magnitude of an entity's investment in a single issuer. GASB 40 requires disclosure by issuer and amount of investments in any one issuer that represents five percent (5%) or more of total investments for the State. The information presented is based on concentrations of investments in the State's portfolio.

Interest rate risk is the exposure that the fair value of the State's fixed-income investments fluctuate in response to changes in market interest rates. An element of interest rate risk are those securities which are „highly sensitive“ to changes in interest rates. These highly sensitive securities are separately disclosed.

Foreign currency risk is that changes in foreign exchange rates will adversely affect the fair value of an investment. This risk disclosure applies only to investments that are denominated in foreign currencies. The State's Master Investment Policy does not provide a policy for foreign currency diversification.

STATE OF WYOMING

The State's investments at June 30, 2008 are presented here:

Custodial Credit Risk

The State does not have any custodial credit risk exposure.

Concentration of Credit Risk

The Wyoming State Treasurer's fixed income portfolio holds \$3,839,276,853 or 42% of the fixed income securities in government agency securities such as Federal National Mortgage Association (FNMA), Federal Home Loan Mortgage Corporation (FHLMC), and Federal Home Loan Bank (FHLB). These agency securities hold a rating of AAA.

While the State's Master Investment Policy sets limits for concentration of investments, it provides that U.S. agency bonds are eligible without limitation.

Interest Rate Risk

The interest rate disclosure for the State's fixed income portion of its investments is presented here. The State has chosen the segmented time distribution method for its interest rate disclosure. This method most closely matches how the State manages interest rate risk. A majority of the bonds in the Wyoming State Treasurer's internal fixed income portfolio have call structures allowing the issuer to call that bond at specific times during the life of the bond. These bonds are purchased because they add yield compared to buying a non-callable bond. This is a preferred strategy when faced with a rising interest rate environment.

Administratively, the State manages interest rate risk of decreasing market value on its internal fixed investment portfolio arising from increasing interest rates by managing the average life of the fixed income portfolio. These securities have a concentration of US Government agency securities holding AAA ratings.

The State has no formal policy with respect to managing interest rate risk within its Master Investment Policy, however, the Policy does provide guidance relative to safety, liquidity and yield using the following criteria:

- Funds are analyzed by asset class including cash to determine if securities need to be purchased or sold.
- Future needs are determined and current positions are reviewed.
- Economic, market and interest rate assumptions are considered.
- Securities are selected based on market value, price and availability.
- Trades are executed to raise cash, to shift maturity, to change asset mix, to enhance yield and to improve quality.

Maturity assumptions have been made using a matrix analyzing interest rates versus final maturity dates of callable securities. The maturity assumptions or average life of the fixed income portfolio securities are displayed in the Interest Rate Risk Table.

The State's Master Investment Policy does not provide a policy for foreign currency denomination diversification, with the exception of Global Fixed Income Managers. To hedge currency exposure, the portfolio may use foreign exchange forwards, futures, or currency options. The portfolio must remain at least seventy percent (70%) hedged against foreign currency exposure at all times.

Highly Sensitive Securities

The Wyoming State Treasurer's fixed income portfolio holds securities that are classified as "highly sensitive". These securities, because of their specific type and structure, are rate sensitive as market conditions change.

The fed funds rate decreased from 5.25% in July 2007 to 2.00% by the end of June 2008. During the fiscal year, deteriorating economic conditions caused a flight to quality. Investors were moving toward less risky assets such as U.S. treasury bonds. As a general rule, the more known or perceived risk the market considered a security to have, the lower the market price dropped. This caused risk re-pricing as the sub-prime market meltdown continued in the U.S. The portfolio holds \$2,637,960,006 or 28.89% of the fixed income securities in mortgage-backed securities. Collateralized mortgage obligations, (CMO's) perform like mortgage-backed securities. The portfolio holds \$396,927,004 or 4.35% of the fixed income securities in highly sensitive CMO's.

During FY08, the State continued to trade step-up bonds to the portfolio. Step-up bonds are structured so that the bonds, at strategic times during their life, will step-up to a higher interest rate if they aren't called. These type of bonds diversify the portfolio and add options that may present opportunities to take capital gains. The portfolio holds \$124,986,745 or 1.37% of the fixed income securities in step-up structured bonds.

SECURITIES LENDING –PRIMARY GOVERNMENT

State Statutes permit the State Treasurer to lend its securities, through the use of agents, to broker-dealers and other entities with simultaneous agreement to return the collateral for the same securities in the future. The State's agents lend securities, of the type on loan at year-end, for collateral in the form of cash or other securities at 100 percent of value for US Treasury Strips and US Treasury Bills, and 102-105 percent of value for other securities. The State, through its agents, measures the fair value of the securities loaned against the fair value of the collateral on a daily basis. Additional collateral is obtained as necessary to ensure such transactions are adequately collateralized. Securities lent for securities collateral are classified according to the category of the collateral. At year-end, the State has no credit risk exposure to borrowers because the amounts the State owes the borrowers exceed the amounts the borrowers owe the State. The contract with the State's agent requires it to indemnify the State if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or fail to pay the State for income distributions by the securities' issuers while the securities are on loan.

The following represents the balances relating to the securities lending transactions at the financial statement date:

		Fair Value		Cost of
		Underlying Securities		Collateral Received
Lent for Cash Collateral				
U.S. Governments	\$	225,083,337	\$	230,047,810
U.S. Government Agencies		1,788,866,809		1,864,603,265
Corporate Securities		71,505,445		73,984,298
Equities		399,808,436		414,800,285
Total Lent for Cash Collateral		2,485,264,027		2,583,435,658
Lent for Securities (Bulk) Collateral				
U.S. Governments		119,177,231		122,640,778
U.S. Government Agencies		1,192,525		1,221,960
Equities		1,273,245		1,309,298
Total Lent for Securities (Bulk) Lending		121,643,001		125,172,036
Total Securities Lending	\$	2,606,907,028	\$	2,708,607,694

Cash collateral is invested in the lending agent's short-term investment pool, which at year-end has a weighted-average maturity of 288 days. The relationship between the maturities of the investment pool and the State's loans is affected by the maturities of securities loans made by other entities that use the agent's pool, which the State cannot determine. The State cannot pledge or sell

collateral securities received unless the borrower defaults. At June 30, 2008, the cash collateral of \$2,583,435,658 was recorded as cash and investments with trustee and as a liability under security lending. The difference between the amount shown here and the amount reflected in the Statement of Net Assets of \$2,538,301,301 for the primary government is due to the amounts allocated to component units and private purpose trust fund.

Credit Risk

The credit risk disclosures for the State's securities lending program are presented here:

STATE OF WYOMING CREDIT QUALITY DISTRIBUTIONS FOR SECURITIES WITH CREDIT EXPOSURE SECURITY LENDING AS OF JUNE 30, 2008				
Category	Credit Rating	Market Value		Percentage of Total Investments
		Cash Collateral	Purchased	
Asset Backed Securities	AAA	\$	188,455,191	7.596%
CMO / Remic - Commercial	AAA		314,825,069	12.690%
Commercial Paper	A-1		54,715,767	2.206%
Commercial Paper	D		19,997,000	0.806%
Corporate Certificate of Deposit	AA		129,587,450	5.224%
Master Notes	AA		217,054,735	8.749%
Master Notes	A		49,893,500	2.011%
Medium Term Notes	AAA		32,450,100	1.308%
Medium Term Notes	AA		128,666,617	5.186%
Medium Term Notes	A		232,200,262	9.360%
Medium Term Notes	BBB		86,591,330	3.490%
Medium Term Notes	D		34,830,000	1.404%
Money Market	AAA		702,010	0.028%
Repurchase Agreement Pools	AA		315,604,739	12.722%
Repurchase Agreement Pools	A		100,000,000	4.031%
Repurchase Agreement Pools	B		14,628,387	0.590%
Repurchase Agreement Pools	NR		528,800,000	21.315%
Senior Note	AAA		31,852,269	1.284%
Grand Total		\$	2,480,854,426	100.00%

The market value reflected in the above table, of collateral securities purchased with cash received from securities lending practices, is \$102.5 million less than cash collateral received. Which means the state would require at least an additional \$102.5 million in cash to satisfactorily liquidate all outstanding securities lending transactions as of June 30, 2008.

Custodial Credit Risk

For the State's securities lending program, the State has lent its securities for other securities. These securities have custodial credit risk, and at June 30, 2008 these securities had an amortized cost of \$119,783,822. By investment type there were \$117,221,153 in US Government securities, \$1,156,843 in US Government Agencies and \$1,405,826 in equity securities.

Concentration of Credit Risk

The State's securities lending program does not have any concentration of credit risk exposure.

Interest Rate Risk

The State has chosen the segmented time distribution method for its interest rate disclosure. This method most closely matches how the State manages interest rate risk. There is minimal interest rate risk due to the average life of the security lending portfolio. The maturity assumptions or average life of the security lending portfolio are displayed in the following table:

STATE OF WYOMING						
INTEREST RATE ORGANIZED BY INVESTMENT TYPE USING SEGMENTED TIME DISTRIBUTION						
SECURITY LENDING AS OF JUNE 30, 2008						
Category	Market Value		LESS THAN			
			1 YEAR	1 - 5 YRS		
Asset Backed Securities	\$	188,455,191	\$	39,822,320	\$	148,632,871

Master Note		266,948,235		101,000,000		165,948,235
Medium Term Notes		514,738,309		460,672,959		54,065,350
Money Market		702,010		702,010		
Repurchase Agreement Pools		959,033,126		959,033,126		
Senior Note		31,852,269		31,852,269		
Grand Total	\$	2,480,854,426	\$	1,889,952,312	\$	590,902,114

Foreign Currency Risk

The State had no foreign currency exposure in its securities lending program as of June 30, 2008.

Highly Sensitive Securities

There are no highly sensitive securities to disclose for the state's securities lending program.

UNIVERSITY OF WYOMING

As of June 30, 2008, the University had investments with weighted-average maturities as shown in the following table:

Investment Type	Carrying Amount	Fair Value	Weighted Average Maturity In Years
US Government Sponsored			
Enterprise Discount Notes	\$ 134,744,353	\$ 134,787,950	0.35
Certificate of Deposit	2,400,000	2,400,000	0.26
Mutual Funds	6,707,909	7,146,108	n/a
Total Investments	<u>\$ 143,852,262</u>	<u>\$ 144,334,058</u>	

Interest rate risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The University's policy for managing its exposure to fair value loss arising from interest rate changes on internally invested funds is to limit the maturity of all securities to less than one year.

Credit Risk

The table below shows quality ratings of investments that are rated:

Investment Type	Fair Value	Quality Rating
US Government Sponsored		AAA
Enterprise Discount Notes	\$ 134,787,950	\$ 134,787,950
Total Investments	<u>\$ 134,787,950</u>	<u>\$ 134,787,950</u>

Custodial credit risk

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty to a transaction, the University will not be able to recover the value of the investments or collateral securities that are in the possession of an outside party. The University does not have a formal investment policy for custodial credit risk. Investments are held in safekeeping by external custodians in the University's name.

Concentration of credit risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the University's investment in a single issuer. Concentration of risk is not addressed in the internal investment policy. At June 30, 2008, the University held securities from the following issuers in excess of 5% of the total portfolio: Federal Home Loan Bank 14.47%, Federal Home Loan Mortgage Corporation 9.72% and Federal National Mortgage Corporation 21.40%.

UNIVERSITY OF WYOMING—FOUNDATION

University-owned endowment funds are held by the Foundation for investment purposes. The investment committee, following the Prudent Expert Rule, carries out the Foundation's investment policy. The Prudent Expert Rule states that a fiduciary shall manage the portfolio "with the care, skill, prudence and diligence, under circumstances then prevailing, and that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of like character and like aims." External managers have been hired to invest in the following asset classes: equities, fixed income, absolute return, private equity/venture capital, hedged equity and real estate. A long-term target asset allocation strategy has been implemented to achieve required returns while minimizing risk. All investment vehicles selected must be in compliance with the laws of the State of Wyoming, Internal Revenue Code prohibitions on self-dealing or vehicles that would jeopardize the carrying out of the exempt purpose of the Foundation and restrictions on unrelated business taxable income.

The summarized investments of the Foundation at June 30, 2008 are as follows:

Investment Type	Carrying Amount	Fair Value
Money Market Funds	\$ 15,244,751	\$ 15,242,378
Corporate Stocks	115,035,986	148,523,908
Corporate Bonds and Notes	60,503,607	59,499,844
Alternative Investments	99,185,087	125,155,164
Real Estate	4,275,397	4,275,397
Government Obligations	2,317,135	2,317,135
Cash Value of Life Insurance Policies	264,077	264,077
Other Investments	79,205	84,512
Total	\$ 296,905,245	\$ 355,362,415

The University and Foundation have invested in alternative investments defined as hedge funds, private equity, venture capital and other investments for which the fair market value is not readily attainable. Because the alternative investments are not readily marketable, their estimated value is subject to uncertainty and, therefore, may differ from the value that would have been used had a ready market for such investments existed. Such difference could be material. At June 30, 2008, the alternative investments held by the Foundation were \$125,155,164.

As of June 30, 2008, the University of Wyoming investments held by the Foundation, primarily in mutual funds, has weighted-average maturities, where applicable, as shown in the following table:

Investment Type	Historical Cost	Fair Value	Weighted Average Maturity in Years
Cash Funds	\$ 78,036	\$ 85,236	N/A
Real Assets	6,193,344	7,393,321	N/A
Private Equity	12,727,101	14,970,297	N/A
Absolute Return	12,697,483	19,609,139	N/A
Fixed Income	7,999,606	11,246,552	8.29
Hedged Equity	10,092,829	15,514,810	N/A
International Equity	14,437,018	20,386,935	N/A
Domestic Equity	25,880,698	36,431,239	N/A
	\$ 90,106,115	\$ 125,637,529	

Credit risk

The high yield and fixed income bond mutual fund investments are not rated.

Custodial Credit Risk

The Foundation does not have a formal investment policy for custodial credit risk. Investments are held in safekeeping by external custodians in the Foundation's name.

Concentration of Credit Risk

The Foundation's investment policy limits concentrations as follows:

1. The initial investment in any one issuer should not exceed 10% of a manager's portfolio (with the exception of U.S. Government securities);
2. The investment with any one issuer should not exceed 15% of a manager's portfolio (with the exception of U.S. Government securities);
3. No purchases of securities of the portfolio manager's organization or of any firm with controlling interest in said organization are to be made.

At June 30, 2008, there were no single issuer investments that exceeded 5% of the total holdings of the Foundation.

Interest rate risk

The Foundation has no formal policy addressing interest rate risk.

SECURITIES LENDING—UNIVERSITY OF WYOMING

State statutes permit the State Treasurer to lend its securities, through the use of agents, to broker-dealers and other entities with simultaneous agreement to return the collateral for the same securities in the future. The State's agents lend securities, of the type on loan at year-end, for collateral in the form of cash or other securities at 100% of value for U.S. Treasury Strips and U.S. Treasury Bills, and 102% to 105% of value for other securities. The State, through its agents, measures the fair value of the securities loaned against the fair value of the collateral on a daily basis. Additional collateral is obtained as necessary to ensure such transactions are adequately collateralized. Securities lent for securities collateral are classified according to the category of the collateral. At year-end, the State has no credit risk exposure to borrowers because the amounts the State owes the borrowers exceed the amounts the borrowers owe the State. The contract with the State's agent requires it to indemnify the State if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or fail to pay the State of income distributions by the securities' issuers while the securities are on loan.

The following represents the University's balances relating to the securities lending transactions at the financial statement date:

	Fair Value		Cost of	
	Underlying Securities		Collateral Received	
Lent for Cash Collateral				
U.S. Governments	\$	248,100	\$	290,893
U.S. Government Agencies		2,516,109		2,581,113

		<u>\$ 4,455,843</u>	<u>100.000%</u>

Concentration of credit risk—University of Wyoming Securities Lending

The State's securities lending program does not have any concentration of credit risk exposure.

Interest rate risk—University of Wyoming Securities Lending

The State has chosen the segmented time distribution method for its Interest Rate Disclosure. This method most closely matches how the State manages interest rate risk. There is minimal interest rate risk due to the average life of the security lending portfolio. The maturity assumptions of average life of the University's portion of the security lending portfolio are displayed in the following table:

Category	Cost	Less Than 1 Year	1-5 Years
Asset Backed Securities	\$ 391,550	\$ 81,065	\$ 310,485
CMO/Remic-Commercial	618,994	295,101	323,893

Medium Term Notes	919,849	580,210	339,639
Money Market	1,210	1,210	-
Repurchase Agreement Pools	1,654,086	1,654,086	-
Senior Note	55,192	55,192	-
	<u>\$ 4,455,843</u>	<u>\$ 2,987,367</u>	<u>\$ 1,468,476</u>

WYOMING RETIREMENT SYSTEM

The System's Board has been authorized by the Wyoming Legislature pursuant to State statutes, to act on behalf of the plan membership in investing and managing monies in the retirement account, and in doing so shall exercise the judgment and care that a prudent investor would, in light of the purposes, terms, distribution requirements and all other circumstances surrounding the monies in the retirement account, including risk and return objectives established by the Board which are reasonably suitable to the purpose of the Wyoming Retirement System. The Board shall evaluate and select investments in appropriate asset classes as is deemed necessary to enhance returns or reduce risk in the total portfolio.

The Wyoming Retirement System's schedule of defined benefit plan investments, as of December 31, 2007 is presented here:

WYOMING RETIREMENT SYSTEM SCHEDULE OF INVESTMENTS BY INVESTMENT TYPE AS OF DECEMBER 31, 2007		
Equities-U.S.	\$	2,967,750,139
Equities-International		1,061,298,228
Corporate Bonds		942,829,764
Mortgage-Backed Securities		534,467,351
Commercial Mortgage Backed		95,446,242
CMO/REMIC		160,701,359
Asset Backed		71,019,246
Cash and Equivalents-Domestic and Foreign		2,698,211
Cash-Equivalents		178,088,243
Government Securities		303,798,913
Real Estate		395,389,255
Total Investments	\$	6,713,486,951

Credit Risk-Debt Securities

In addition to the diversification policy guidelines by sector provided above, the System expects that unless otherwise specified in the manager specific guidelines, fixed income grade investments shall have an average quality of the portfolio equivalent of a Standard & Poor's rating of A or better. Managers of accounts holding publicly traded non-Government debt should select and manage them so as to assure an appropriate balance in maturity, quality, marketability and adequate diversification with respect to industry and issues.

High yield investments are defined by the System as those debt securities, which carry a Standard & Poor's quality rating of BB or lower. According to the System's investment policies, fund managers who manage these investments should structure a well diversified portfolio with respect to rating, maturity, duration, yield, industry and issuer with the intent of minimizing the risk of losses in any single security.

The distribution of quality rating of debt securities in the System's investment portfolio at fair value as of December 31, 2007 is as follows:

WYOMING RETIREMENT SYSTEM CREDIT QUALITY FOR SECURITIES WITH CREDIT EXPOSURE AS OF DECEMBER 31, 2007		
Quality Rating:		
AAA	\$	828,485,736
AA		137,878,562
A		213,240,305
BBB		253,910,425
BB		141,105,765
B or below		229,843,169
Total Credit Risk Debt Securities		1,804,463,962
U.S. Government and Agency Investments		303,798,913
Total Debt Securities Investments	\$	2,108,262,875

Custodial Credit Risk

Custodial credit risk for deposits of the defined benefit plans is the risk that in the event of a bank failure, the Systems' and Plans' deposits may not be returned to them. Deposits subject to this risk are those other than the \$4,503,557 of deposits held by the State Treasurer. These deposits totaling \$180,786,454 are held by the System's primary custodian are collateralized by commercial paper, repurchase agreements and money market mutual funds held by the primary custodian or its agents in accounts in the name of the Wyoming Retirement System. Deposits are presented in the basic financial statements at cost plus accrued interest which is also the market or fair value. At December 31, 2007, the carrying amount of all deposits and the corresponding bank balance totaled approximately \$185.3 million.

Investment securities within the defined benefit plans are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the System and are held by either the counterparty or the counterparty's trust department or agent, but not in the System's name. Consistent with the System's investment policy, all investments are held by the System's primary custodian and registered in the System's name except for approximately \$395.4 million in real estate holdings, and \$1.6 billion of beneficial ownership of stock held in a collective trust fund. One of the System's money managers serves as the trustee for the collective trust fund's assets and holds legal title of the trust's assets for the exclusive benefit of each of the trust's beneficial owner's including the System.

The System does not have a formal deposit or investment policy for custodial credit risk.

Concentration of Credit Risk

The Systems and Plans expect the domestic investment managers to maintain diversified portfolios by sector and by issuer using the following guidelines in accordance with the System's investment policies:

Target Allocation	Minimum	Target	Maximum
Fixed Income:			
U.S. Investment Grade	20%	25%	40%
U.S. High Yield	0%	6%	10%
Total Fixed Income	25%	31%	45%
Equity :			
U.S. Large-Cap Equity	25%	32%	45%
U.S. Small-Medium Cap	10%	13%	20%
Non-U.S.-Developed and Emerging Markets	10%	16%	20%
Real Estate and Alternatives	0%	8%	10%
Total Equity and Real Estate	55%	69%	75%

The policy of the Board is to discourage equity investment managers from holding positions in a single issue whose market value exceeds 5% of the market value of the portfolio. However, exceptions can be made if this percentage of the overall portfolio is exceeded as a consequence of long held positions whose value has grown as a consequence of their strong returns. At December 31, 2007, the System did not hold any single investment with a market value of greater than 5% of its portfolio.

The Board does not authorize the use of derivatives as speculative instruments or in a leveraged manner such that the risk of loss from a particular position would be materially larger than if actual securities were utilized. Derivatives for the purpose of equitizing cash in a non-leveraged context, is acceptable with specific Board authorization.

The purpose of real estate investments is to provide counter cyclical returns income and a defense against inflation. Funds considered will be comprised primarily of highly-leased properties with reasonable income components. The real estate portfolio, in aggregate, shall be diversified by property type, property size, geographic region, and economic sector exposure. Leverage shall be used sparingly.

Interest Rate Risk

The System is also exposed to investment fair value loss arising from increased interest rates. Duration is a measure of the sensitivity of a debt security's value to rate changes. It is calculated using the present value of cash flows, weighted for those cash flows as a percentage of the investment's full price. More specifically, it is the approximate percentage change in value for a 100 basis point change in rates. The System's investment policy guidelines require that the investment grade debt securities portfolio be maintained with a weighted-average portfolio duration of no longer than ten years. No specific investment guidelines exist for other debt securities subject to interest rate risk not included in the investment grade portfolio.

At December 31, 2007 the following table shows investments by investment type, amount and the effective weighted duration:

WYOMING RETIREMENT SYSTEM INTEREST RATE RISK ORGANIZED BY INVESTMENT TYPE USING DURATION METHOD AS OF DECEMBER 31, 2007		
Investment Type	Amount	Effective Weighted Duration
Government Securities	\$ 303,798,913	0.86
Asset Backed	71,019,246	0.21
Mortgage Backed Securities	534,467,351	1.53
CMO/REMIC	160,701,359	0.49
Commercial Mortgage Backed	95,446,242	0.54
Corporate Bonds	942,829,764	3.55
Total Debt Securities	\$ 2,108,262,875	4.75

Foreign Currency Risk

The System also expects its international security investment managers to maintain diversified portfolios by currency denomination, however, no formal policy limits have been established. At December 31, 2007, the System's exposure to foreign currency risk for its short-term and equity securities is as follows:

	Foreign Cash		Foreign Equities			Foreign Cash		Foreign Equities	
Australian Dollar	\$	18,555	\$	62,513,173	Indonesian Rupiah	\$	4	\$	394,388
Austrian Schilling		0		2,857,008	Irish Punt		0		3,237,750
Belgium Franc		0		6,042,632	Italian Lira		0		19,765,499

At December 31, 2007, the System had no debt securities denominated in a foreign currency.

Defined Contribution Plan Cash and Investments

The cash and investments held within the defined contribution plan are comprised of the aggregate holdings of the participant's accounts that are invested in 29 different mutual-fund type investment options and cash held on deposit with the State collected from participants as fees for the purposes of plan administration. Plan participants determine the holdings of their individual participant accounts; therefore, the exposure of each participant to the investment risks discussed above including custodial, credit, interest rate, foreign currency and concentration is determined by that individual's risk tolerance. Additionally, the risks of the investment portfolios associated with each of the 29 investment options are determined by the mutual fund manager and may vary depending on their risk tolerances and performance objectives. The defined contribution plan does not have any investments (other than those issued or guaranteed by the U.S. Government) in any one organization that represents 5% or more of the Plan's net assets.

SECURITIES LENDING-WYOMING RETIREMENT SYSTEM

Under the authority of the governing statutes and in accordance with policies set by the Board of Trustees, the System lends its securities to broker-dealers with a simultaneous agreement to return the collateral for the securities in the future. The System's custodian is authorized to lend available securities to authorized broker-dealers subject to the receipt of acceptable collateral. The System lends securities such as common stock, U.S. Treasury and corporate bonds and receives collateral in the form of either cash or other securities similar to the type on loan. Borrowers are required to provide collateral amounts of 102% of the market

value of loaned U.S. securities plus accrued interest and 105% of the market value of loaned non-U.S. securities plus accrued interest. The System cannot pledge or sell collateral securities received until and unless a borrower defaults. Securities held as collateral at year-end are not subject to the preceding disclosures of custodial credit risk as they are held in a collateral investment pool. At year-end, the System has no credit risk exposure to borrowers because the amounts the System owes the borrowers exceed the amounts the borrowers owe the System. Contracts with the lending agents require them to indemnify the System if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or fail to pay the System for income distributions by the securities' issuers while the securities are on loan. Net securities lending income during the year ended December 31, 2007 was \$2,595,101.

Securities lent as of December 31, 2007, with a market value of \$572,847,766 and a collateral value at a rate of 102% and/or 105%, as appropriate, for a total market value of \$587,778,777, could be terminated on demand by either the System or the borrower(s). There is no direct match of the maturities of the collateral investments with the maturities of the securities loaned.

WYOMING COMMUNITY DEVELOPMENT AUTHORITY

The WCDA trust indentures and State statutes authorize the types of investments in which WCDA invests. Among these authorized investments are certificates of deposit, obligations of the U.S. Treasury, agencies and instrumentalities of the U.S. Government, mortgage-backed securities, guaranteed investment contracts, mutual funds, and repurchase agreements with banks with the underlying securities being obligations of the U.S. Treasury, or agencies and instrumentalities of the U.S. Government. The investments are carried at fair value except for certificate of deposits that are carried at cost.

The components of the Authority's investment portfolio are as follows:

Investments		
Certificates of Deposit	\$	276,547
U.S. Government and Agency Securities		222,960,301
Guaranteed Investment Contracts		75,865,707
Total	\$	299,102,555

Credit Risk

State statutes limit the types of investments available to the Authority. Investments, including the underlying securities for repurchase agreements, are held by the Authority's trustees in the Authority's name. Guaranteed investment contracts which have a maturity beyond 18 months are generally guaranteed by AAA rated institutions or collateralized.

Custodial Credit Risk

For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the Authority would not be able to recover the value of its investments or collateral securities that are in possession of an outside party. Substantially all of the Authority's investments are held in the name of the Authority by a trustee.

Interest Rate Risk

As a means of limiting its exposure to fair value losses arising from rising interest rates, the Authority attempts to match its investment maturities to the expected call dates of its bonds or needs for purchasing mortgages. With this investment focus, investments would be expected to reach maturity with limited realized gains or losses.

As of June 30, 2008, the Authority had the following investments and maturities:

		Investment Maturities (in Years)				
		Fair Value	Less Than 1	1-5	6-10	More Than 10
Certificates of Deposit	\$	276,547	\$ 276,547	\$ 0	\$ 0	\$ 0
U.S. Government and Agency Securities		222,960,301	65,751,153	1,317,321	31,701,104	124,190,723
Guaranteed Investment Contracts		75,865,707	35,537,271	40,328,436	0	0
Total	\$	299,102,555	\$ 101,564,971	\$ 41,645,757	\$ 31,701,104	\$ 124,190,723

Interest Rate Swaps

Swap Objectives

The Authority has entered into interest rate swap agreements in connection with variable-rate bond series as a technique to lower the cost of long-term debt. The objective of the swaps is to effectively change the variable interest rate on the bonds to a synthetic fixed rate.

Terms and Values

Bond Series	Swap Contractual Dates	Notional Amount	Fixed Rate Paid	Variable Rate Received	Termination Date	Fair Value	Counterparty Credit Rating
2005 Series 2	3/31/2005	\$ 6,275,000	3.523%	70% or LIBOR	6/1/2021	\$ (102,957)	AAA-Aaa
2005 Series 4	6/30/2005	6,885,000	3.260%	70% or LIBOR	12/1/2021	(7,345)	AAA-Aaa
2005 Series 7	9/20/2005	6,890,000	3.325%	70% or LIBOR	12/1/2016	(85,633)	AAA-Aaa
2006 Series 2	1/9/2006	8,000,000	3.465%	70% or LIBOR	12/1/2013	(185,469)	AAA-Aaa
2006 Series 5	4/20/2006	10,000,000	3.926%	70% or LIBOR	6/1/2014	(474,308)	AAA-Aaa
2006 Series 7	6/26/2006	10,000,000	4.115%	70% or LIBOR	6/1/2014	(574,094)	AAA-Aaa
2006 Series 9	9/27/2006	10,000,000	3.621%	70% or LIBOR	12/1/2014	(315,245)	AAA-Aaa
2007 Series 2	1/11/2007	6,000,000	3.678%	70% or LIBOR	12/1/2014	(209,204)	AAA-Aaa
2007 Series 4	3/13/2007	14,000,000	3.577%	70% or LIBOR	6/1/2015	(406,521)	AAA-Aaa
2007 Series 6	5/10/2007	14,000,000	3.661%	70% or LIBOR	6/1/2015	(477,519)	AAA-Aaa
2007 Series 8	7/31/2007	12,000,000	3.924%	USD-SIFMA	6/1/2015	(476,613)	AAA-Aaa
2007 Series 11	11/7/2007	12,000,000	3.530%	70% or LIBOR	12/1/2015	(309,190)	AAA-Aaa
2008 Series 2	5/13/2008	13,000,000	3.075%	70% or LIBOR	6/1/2016	68,119	AAA-Aaa
		<u>\$ 129,050,000</u>				<u>\$ (3,555,979)</u>	

As of June 30, 2008, the Authority's swap agreements had a fair value of \$(3,555,979). If negative, the fair value of the swaps may be offset by reductions in total interest payments required under the related variable-rate bond, creating lower synthetic rates. Because the coupons on the related variable-rate bonds adjust to the changing interest rates, the bonds do not have a corresponding fair value increase. The fair value amounts, obtained from an independent third-party, represent mid-market valuations that approximate the current economic value using prices and rates at the average of the estimated bid and offer amounts.

Swap Risks

Credit Risk - As of June 30, 2008, the Authority was exposed to credit risk on certain swaps which had a positive fair value. The positive fair value of the swaps represents the Authority's exposure as of June 30, 2008, to a potential counterparty failure. Should the counterparty to this transaction fail to perform according to the swap contract, the Authority would face a maximum possible loss equivalent to the swap's fair value. As of June 30, 2008, the swap counterparty was rated Aaa by Moody's Investors Service and AAA by Standard & Poor's. The Authority's policy to manage credit risk would require the Authority to seek credit enhancements should the counterparty's ratings be below AA- or Aa3.

Basis Risk - Basis risk is the potential mismatch between the variable interest rate paid on the underlying bonds and the variable rate payments received by the Authority pursuant to the swap. The Authority's variable rate bond interest payments should correspond to the SIFMA Index (formerly the BMA Index), while the payments the Authority receives pursuant to the swap are for the most part 70 percent of LIBOR. The Authority is exposed to basis risk should LIBOR and SIFMA Index rates converge. If a change occurs that results in the rates moving to convergence (that is, the SIFMA Index exceeding 70 percent of LIBOR), the value to the Authority of the hedge from the swap is diminished. As of June 30, 2008, the SIFMA Index rate was 1.55 percent, while 70 percent of LIBOR (the swap rate) was 1.72 percent.

Termination Risk - The Authority or the counterparty may terminate the swaps if the other party fails to perform under the terms of the swap contracts. The swaps may be terminated by the Authority at its discretion with a maximum of ten days notice. If a swap was terminated, the variable-rate bonds would no longer carry a synthetic fixed rate. Also, if at the time of termination the swap has a negative fair value, the Authority would be liable to the counterparty for a payment equal to the swap's fair value.

Rollover Risk - The Authority is exposed to rollover risk on swaps that mature or may be terminated prior to the maturity of the associated bonds. When these swaps terminate or are terminated by either party, the Authority will not realize the synthetic fixed rate offered by the swaps on the underlying bond issues. The following bond series are exposed to rollover risk:

Associated Bond Issuance	Bond Maturity Date	Swap Termination Date
2005 Series 2	December 1, 2035	June 1, 2021
2005 Series 4	December 1, 2035	December 1, 2021
2005 Series 7	June 1, 2036	December 1, 2016
2006 Series 2	December 1, 2035	December 1, 2013
2006 Series 5	December 1, 2036	June 1, 2014
2006 Series 7	June 1, 2037	June 1, 2014
2006 Series 9	June 1, 2037	December 1, 2014
2007 Series 2	June 1, 2037	December 1, 2014
2007 Series 4	December 1, 2037	June 1, 2015
2007 Series 6	December 1, 2037	June 1, 2015
2007 Series 8	June 1, 2038	June 1, 2015
2007 Series 11	December 1, 2038	December 1, 2015
2008 Series 2	December 1, 2038	June 1, 2016

WYOMING INFRASTRUCTURE AUTHORITY

The Wyoming Infrastructure Authority had deposits and investments with a carrying amount of \$2,219,823 at June 30, 2008. The investments were in certificates of deposit. The investments held by the Wyoming Infrastructure Authority had no exposure to investment risks associated with debt securities.

Investments			
	Cash and Investments	\$	2,219,823
	Total	\$	2,219,823

WYOMING BUSINESS COUNCIL

Deposits for WBC of are invested in the pooled cash account managed by the State and included in the State's deposit and risk disclosure above.

WYOMING PIPELINE AUTHORITY

The Authority had investments in certificates of deposit of \$300,000 at June 30, 2008.

Credit Risk

State statutes limit the types of investment available to the Authority. The Authority, at June 30, 2008, held investments solely in certificates of deposit with maturities of less than 1 year.

Custodial Credit Risk

All of the Authority's investments are certificates of deposit insured through FDIC. The Authority considers this risk significantly mitigated.

Interest Rate Risk

As a means of limiting its exposure to fair value losses arising from changing interest rates, the Authority keeps only short-term investments. With this investment focus, investments would be expected to reach maturity with limited realized gains or losses.

WYO-STAR

The Wyoming State Treasurer's Asset Reserve Fund (WYO-STAR) has been established, in accordance with Wyoming statute 9-1-416 to invest funds upon request of any county, municipality, school district or any other local governmental entity. The State Land and Investment Board oversees the WYO-STAR program and there is no involuntary participation in WYO-STAR. In accordance with GAAP, the external portion of WYO-STAR is reported as an investment trust fund in the fiduciary funds, using the economic resources measurement focus and accrual basis of accounting, due to the State's fiduciary responsibility. The internal portion of the pool is reported in the Deferred Compensation Fund of the Wyoming Retirement System and the University of Wyoming. The investments of WYO-STAR are carried at their fair value as determined at June 30th each year. A ratio based on the participants share to the total share invested in WYO-STAR is used to determine each participant's share. The State has not provided or obtained any legally binding guarantees during fiscal year 2008 to support the value of the shares. A summary of WYO-STAR Investments as of June 30, 2008 is presented here:

WYO-STAR INVESTMENTS

Custodial Credit Risk

The WYO-STAR Program at June 30, 2008 had no custodial credit risk exposure.

Concentration of Credit Risk

The WYO-STAR fixed income portfolio holds \$213,241,250 or 72.6% of the fixed income securities in government agency securities such as Federal National Mortgage Association (FNMA), Federal Home Loan Mortgage Corporation (FHLMC), and Federal Home Loan Bank (FHLB). These agency securities hold a rating of AAA.

Interest Rate Risk

The WYO-STAR investment portfolio by description as stated in the Master Investment Policy administers the short-term cash deposits made with the State by local entities. The actual investments are administered to provide liquid cash reserves, placing the majority portion in a cash portfolio and the rest in an extended cash portfolio.

These guidelines afford minimal interest rate risk.

The maturity assumptions or average life of the WYO-STAR fixed income portfolio securities are displayed in the WYO-STAR Interest Rate Risk Table:

Foreign Currency Risk

As of June 30, 2008 the WYO-STAR investment portfolio had no exposure to foreign currency risk.

Highly Sensitive Securities

The WYO-STAR fixed income portfolio holds securities that are classified as "highly sensitive". These securities, because of their specific type and structure, are rate sensitive as market conditions change.

The fed funds rate decreased from 5.25% in July 2007 to 2.00% by the end of June 2008. During the fiscal year, deteriorating economic conditions caused a flight to quality. Investors were moving toward less risky assets such as U.S. treasury bonds. As a general rule, the more known or perceived risk the market considered a security to have, the lower the market price dropped. This caused risk re-pricing as the sub-prime market meltdown continued in the U.S. . The portfolio holds \$8,353,111 or 2.84% of the fixed income securities in mortgage-backed securities. Collateralized mortgage obligations (CMO"s) perform like mortgage-backed securities. The portfolio holds \$18,181,637 or 6.19% of the fixed income securities in highly sensitive CMO"s.

WYO-STAR Master Investment Policy

The target asset allocation, as stated in the Master Investment Policy, comprises one hundred percent (100%) of the fund in short term bonds and cash.

Diversification/permissible investments as stated in the Master Investment Policy permits purchase of the following securities:

- Asset Backed Securities
- Repurchase Agreements
- Government Securities: including obligations of the U.S. Treasury and Obligations of the U.S. Government Agencies or Instruments, bearing floating or fixed interest rates.
- Asset-backed securities will be limited to CMOs or pass through; the collateral for which is securities issued by Government Mortgage National Association (GMNA), Federal National Mortgage Association (FNMA), or Federal Home Loan Mortgage Corporation (FHLMC) or notes fully guaranteed as to principal and interest by the Small Business Administration. Automobile receivables and credit receivables will also be considered permissible investments.
- Currency: U.S. dollar denomination only.

The following tables represent the condensed statements of net assets and changes in net assets for the Investment Trust Fund WYO-STAR. The tables below include amounts for both the primary government, as well as its component units, and therefore will not agree to the Statement of Net Assets-Fiduciary Funds and the Statement of Changes in Net Assets-Fiduciary Funds, respectively.

ALTERNATIVE INVESTMENTS

The State of Wyoming, and its component units, have invested in alternative investments defined as hedge funds, private equity, venture capital and other investments for which the fair market value is not readily attainable. Because the alternative investments are not readily marketable, their estimated value is subject to uncertainty and, therefore, may differ from the value that would have been used had a ready market for such investments existed. Such difference could be material. At June 30, 2008, the organizations holding alternative investments were:

State of Wyoming	\$ 794,319,149
University of Wyoming Foundation	125,155,164
	<u>\$ 919,474,313</u>

NOTE 4 Loans Receivable

As of June 30, 2008, the gross amount of outstanding loans for governmental type funds was \$370,822,101 with an allowance of \$700,567. The largest portion of loans outstanding are municipal wastewater, totaling \$196,451,354, which have rates which vary between 2.5% and 4%, are primarily collateralized by pledges of revenue, and are required to be repaid within a maximum of 30 years. The second major category of loans outstanding are water loans, totaling \$75,021,569, which have rates which vary between 4% and 7.25%, are primarily collateralized by mortgages and pledges of revenue, are required to be repaid within a maximum of 50 years and are for the construction maintenance and evaluation of water facilities. At June 30, 2008, loans receivable included loans to one major loan customer totaling \$63,218,525, which comprised 17% of total loans receivable.

The State's loans receivable as of June 30, 2008, are as follows:

	Common School Land Fund	Permanent Mineral Fund	Legislative Reserve Fund	Non-Major Governmental Funds	Total

Net Total Receivables	\$ 416,485	\$ 77,169,253	\$ 432,201	\$ 292,103,595	\$ 370,121,534

As of June 30, 2008, the State had committed \$56,305,992 in various loans for distribution after June 30th.

University of Wyoming Loans Receivable

As of June 30, 2008, the total amount of outstanding loans was \$21,638,092 net of an allowance for doubtful accounts. The outstanding loans primarily consist of medical school contracts, which have rates from 0% to 8%, repayment schedules of 96 months after leaving school and allow for loan cancellation based on the number of years of residency at eligible clinics in the State of Wyoming or upon practicing full-time medicine in the State of Wyoming. The University and the University of Wyoming Foundation had pledged receivables due of \$23,709,556 for donor pledges.

Wyoming Community Development Authority

WCDA loans receivable consist of mortgage loans receivable. As of June 30, 2008, mortgage loans receivable consist of the following:

Single-Family Mortgage Bonds, 1978 Indenture Fund, bearing interest at 0% to 11.375%, 25 to 30 year term, FHA or private mortgage company insured or guarantee by RD, VA, or mortgage guaranty fund:		\$	80,668,115
Less: Reserve for Losses on Loans			(3,844,455)
			<u>76,823,660</u>
Housing Revenue Bonds, 1994 Indenture Fund, bearing interest at 4% to 8.625%, 25 to 30 year term, FHA or private mortgage company insured, or guaranteed by RD, VA, or mortgage guaranty fund:			978,676,590
Less: Reserve for Losses on Loans			(34,192,893)
			<u>944,483,697</u>
Wyoming Homeownership Bonds, 1992 Indenture Fund, bearing interest at 7.625%, 30 year term, FHA or private mortgage company insured, or RD guaranteed:			916,468
Federal Program Fund with various terms, including deferred payments and fixed rates, 10 to 30 year term:			16,096,686
Less: Reserve for Losses on Loans			(200,000)
			<u>15,896,686</u>
Housing Trust Fund, bearing interest at 0% to 11.375%, 1 to 30 year term, FHA or private mortgage company insured or guarantee by VA or mortgage guaranty fund:			14,999,113
Less: Reserve for Losses on Loans			(3,783,895)
			<u>11,215,218</u>
Mortgage Loans Receivable, Net		\$	<u><u>1,049,335,729</u></u>

Total loan loss reserves for mortgage loans receivable established by the Authority as of June 30, 2008 was \$42,021,243 for mortgage loans receivable.

Wyoming Business Council

WBC loans receivable consist of economic development loans, technology development loans, as well as rural rehabilitation loans. Interest rates on loans vary from 0% to 9% and have varying maturity dates through 2026; collateral includes personal guarantees, mortgages on real estate, and liens on receivables, inventory, furniture, equipment and crops. At June 30, 2008, loans receivable included outstanding loans to one major loan customer totaling \$1,306,560, which comprised 17% of gross loans receivable as of that date. There were two non-accruing loans with outstanding principal balances of \$148,411 in the Technology Development Fund, both of which were fully reserved as of June 30, 2008. There were no loans charged off during the year ended June 30, 2008. As of June 30, 2008, WBC's loans receivable consists of the following:

	Gross Balance	Allowance	Net Balance
Economic Development Fund	\$ 7,524,129	\$ 780,085	\$ 6,744,044
Technology Development Fund	213,411	152,718	60,693
General Fund	28,883	0	28,883
Total Loan Receivable	<u>\$ 7,766,423</u>	<u>\$ 932,803</u>	<u>\$ 6,833,620</u>

Wyoming Infrastructure Authority

The Wyoming Infrastructure Authority, under its bonding authority, previously issued \$34.5 million dollars in Revenue Bonds purchased in total by the Wyoming State Treasurer. These bonds are secured by a loan receivable from Basin Electric for the same amount. This note accrues interest at 4.69%, and matures on September 15, 2025.

	Gross Balance	Allowance	Net Balance
Loan Receivable-Basin Electric	\$ 34,500,000	\$ 0	\$ 34,500,000
Total Loan Receivable	<u>\$ 34,500,000</u>	<u>\$ 0</u>	<u>\$ 34,500,000</u>

NOTE 5 Capital Assets

Capital asset activity for the fiscal year ended June 30, 2008, was as follows:

Primary Government

	Beginning July 1, 2007	Additions	Deletions	Balance June 30, 2008
Governmental Activities:				
Capital assets, not being depreciated:

NOTE 6 Receivables and Payables

On the Statement of Net Assets the "Due to Primary Government" and the "Due from Component Units" does not balance by \$37,110,545. The "Due to Component Units" and the "Due from Primary Government" does not balance by \$66,306,256. These differences are due primarily to the Department of Transportation's September 30 fiscal year end.

To the extent that certain transactions between funds had not been paid or received as of June 30, 2008, balances of inter-fund amounts receivable or payable have been recorded as presented below. Amounts due to internal service funds are generally for services performed by those funds. The principle amounts of the balances within the Non-Major Governmental Funds represent advances between funds.

Payable Fund	Receivable Fund							Total
	General Fund	Foundation Program Fund	Legislative Reserve Fund	Workers' Compensation Fund	Non-Major Governmental Funds	Non-Major Enterprise Funds	Internal Service Funds	
Major Funds:								
Governmental:								
General Fund	\$ 0	\$ 0	\$ 649,357,218	\$ 896,240	\$ 19,263	\$ 306,115	\$ 832,615	\$ 651,411,451

Total	<u>\$ 9,170,497</u>	<u>\$ 4,747,297</u>	<u>\$ 649,357,218</u>	<u>\$ 1,071,750</u>	<u>\$ 36,952,851</u>	<u>\$ 324,638</u>	<u>\$ 2,794,397</u>	<u>\$ 704,418,648</u>

NOTE 7 Inter-fund Transfers

State of Wyoming

The primary government's operating transfers for the year ended June 30, 2008, were as follows:

Transferred To	Transferred From							Total
	General Fund	Legislative Reserve Fund	Foundation Program Fund	Workers' Comp Fund	Common School Land Fund	Non-Major Govt Funds	Non-Major Enterprise Funds	
Major Funds:								
Governmental:								
General Fund	\$ 0	\$ 707,761,230	\$ 0	\$ 0	\$ 0	\$ 2,220,635	\$ 10,640,503	\$ 720,622,368
Legislative Reserve Fund	649,357,218	0	71,433,150	0	1,646,882	0	0	722,437,250
Foundation Program Fund	56,514,455	0	0	0	166,123,570	167,612,223	0	390,250,248
Common School Land Fund	0	55,146,838	5,044,178	0	0	0	0	60,191,016
Permanent Mineral Fund	0	40,000,000	0	0	0	0	0	40,000,000
Non-Major Govt Funds	166,835,613	33,475,699	0	0	0	44,954,975	70,000	245,336,287
Internal Service Funds	536,804	0	0	43,526	0	5,372	0	585,702
Total	\$ 873,244,090	\$ 836,383,767	\$ 76,477,328	\$ 43,526	\$ 167,770,452	\$ 214,793,205	\$ 10,710,503	\$ 2,179,422,871

Transfers are used to 1) move revenues from the fund that statute requires to collect them to the fund that statute requires to expend them; 2) use unrestricted revenues collected in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations; and 3) move profits from the Liquor Commission Fund (\$10.6 million) as required by law.

In the fiscal year ended June 30, 2008, the significant transfers include transfers to the General Fund from the Non-Major Governmental Funds representing excess revenues not needed in those funds (\$2.2 million), and the transfers to the General Fund from the Legislative Reserve Fund are made as a budget balancer (\$707.8 million). The term budget balancer is used to describe the legislative process whereby the General Fund and Legislative Reserve Fund are considered one pool of available resources when making appropriations. The revenues from the Legislative Reserve Fund are used to 'balance' the expenditures made in the General Fund. Transfers from the Common School Land Fund (\$167.6 million) are the investment income that is distributed to the Foundation Program Fund for the expenditures in that fund. These transfers were made in accordance with statutory authority granted by the Legislature.

The General Fund transfers to non-major governmental funds included the transfer of appropriations to the Capital Construction Fund (\$116.3 million) and transfers for operational activities (\$50.5 million).

The Non-Major Government transfers to non-major government funds were for operational activities during the year (\$45.0 million).

NOTE 8 Long-Term Obligations

State of Wyoming

During the year ended June 30, 2008, the following changes occurred in long-term liabilities for the primary government:

	Beginning Balance	Additions	Deletions	Ending Balance	Amount Due Within One Year
Governmental Activities:					
Revenue Bonds	\$ 46,576,582	\$ 0	\$ 2,685,300	\$ 43,891,282	\$ 2,653,854
Compensated Absences	48,515,438	35,280,665	32,264,619	51,531,484	32,102,293
Capital Leases	1,208,356	433,656	555,876	1,086,136	473,443
Deferred Interest Payable	7,318,739	522,767	1,639,700	6,201,806	1,604,199
Net OPEB Obligation	0	19,292,000	7,324,000	11,968,000	0
Claims/Benefits Payable	91,230,064	229,118,157	220,694,527	99,653,694	87,976,505
Total Governmental					
Long-term Obligations	\$ 194,849,179	\$ 284,647,245	\$ 265,164,022	\$ 214,332,402	\$ 124,810,294
Business-Type Activities:					
Compensated Absences	\$ 1,363,996	\$ 1,416,982	\$ 1,335,919	\$ 1,445,059	\$ 1,335,448
Capital Leases	310,636	0	148,316	162,320	162,320
Claims/Benefits Payable	858,447,029	228,740,874	154,317,168	932,870,735	136,624,305
Total Business-Type					
Long-term Obligations	\$ 860,121,661	\$ 230,157,856	\$ 155,801,403	\$ 934,478,114	\$ 138,122,073

Claims and benefits payable of the governmental activities are primarily liabilities of the General Fund for health and welfare benefits and the Environmental Quality Special Revenue Fund for claims associated with damages from prior mining activities. Compensated absences are payable by the funds in which they are incurred that are primarily the General Fund, the Board and Regulatory Special Revenue Fund, the Game and Fish Special Revenue Fund, and Computer Technology Internal Service Fund. In the business-type activities, the claims and benefits payable are primarily liabilities of the Workers' Compensation Insurance and Wyoming Health Insurance Funds. The inclusion of Deferred Interest Payable is the result of interest on outstanding bonds being deferred until the bonds mature.

Department of Transportation

The following table represents the changes in long-term liabilities of the DOT during the year ended September 30, 2007:

	Beginning Balance	Additions	Reductions	Ending Balance	Amount Due Within One Year
Governmental Activities:					
Compensated Absences	\$ 17,341,591	\$ 5,077,874	\$ 1,557,851	\$ 20,861,614	\$ 12,004,170
Governmental activities, Long-term liabilities	\$ 17,341,591	\$ 5,077,874	\$ 1,557,851	\$ 20,861,614	\$ 12,004,170

University of Wyoming

	\$ 39,984,040	\$ 19,861,406	\$ 59,845,446

Wyoming Community Development Authority

The following table represents the changes in long-term liabilities of the WCDA during the year ended June 30, 2008:

	Beginning Balance	Additions	Deletions	Ending Balance	Amount Due Within One Year
Business-Type Activities					
Housing Revenue Bonds	\$ 1,111,589,614	\$ 175,355,000	\$ 31,642,465	\$ 1,255,302,149	\$ 62,027,374

A. Capital Leases

The State has entered into various leases and lease purchase agreements for equipment that have been accounted for as capital leases in accordance with generally accepted accounting principles. Lease contracts are required by law to contain a fiscal funding clause indicating continuation of the lease is subject to funding by the Legislature.

Future minimum lease payments under capital leases, for the State's governmental and business-type activities and the University as of June 30, 2008, are as follows:

Year Ending June 30th	Governmental Activities	Business-Type Activities	University of Wyoming
2009	\$ 556,739	\$ 177,641	\$ 362,986
2010	477,977	0	308,963
2011	170,740	0	138,865
2012	23,547	0	135,907
2013	0	0	135,907
2014-2015	0	0	294,481
Total Minimum Payments	1,229,003	177,641	1,377,109
Less Interest	142,867	15,321	165,175
Present Value of Lease Payments	\$ 1,086,136	\$ 162,320	\$ 1,211,934

The gross cost of assets acquired under capital leases, asset class Equipment is \$2,336,162 for governmental activities with accumulated depreciation of \$1,308,108, \$446,158 for business-type activities with accumulated depreciation of \$260,259, and \$3,172,348 for the University of Wyoming with accumulated depreciation of \$3,164,808 in the asset class Equipment.

B. Bonded debt

State of Wyoming

No new bonds were issued during Fiscal year 2008. The governmental funds bonded debt reported below represents the remaining principal payable on capital facilities revenue bonds. Funds for the repayment of the principal and interest on these bonds are restricted to the federal mineral royalties distributed to the school foundation program. The following table presents the State of Wyoming capital facilities revenue bonds outstanding as of June 30, 2008:

	Series	Amount Issued	Interest Range % On Outstanding Balance	Balance June 30, 2008
Government-Wide Statements				
Capital Facilities Refunding Bonds	1992	\$ 28,750,000	3.0-6.25	\$ 12,466,000
Capital Facilities Refunding Bonds	1993	8,777,522	4.1-6.2	3,896,282
Capital Facilities Refunding Bonds	2002	10,405,000	2.75-5.0	5,580,000
Capital Facilities Refunding Bonds	2005	23,440,000	2.5-5.0	21,950,000
Total		\$ 71,372,522		\$ 43,891,282

Future minimum payments for revenue bonds recorded in the government-wide statements of June 30, 2008 are as follows:

Year Ending June 30th	Principal	Government-Wide Statements Interest	Total
2009	\$ 2,653,854	\$ 3,750,400	\$ 6,404,254
2010	2,657,969	3,768,164	6,426,133
2011	2,654,005	3,775,944	6,429,949
2012	2,645,454	3,766,827	6,412,281
2013	1,860,000	3,665,127	5,525,127
2014-2018	11,945,000	7,335,038	19,280,038
2019-2023	13,045,000	3,964,763	17,009,763
2024-2026	6,430,000	721,750	7,151,750
	\$ 43,891,282	\$ 30,748,013	\$ 74,639,295

University of Wyoming

University revenue bonds payable represent the remaining principal payments on bonds used for construction of facilities. Revenues from the operations of residence halls, apartments, cafeterias, dining halls, other food service facilities, bookstore and telecommunications; income from other sales and services; income from the University Permanent Land Fund and mineral royalties from the University Government Royalty Fund are pledged for the Facilities Improvement and Refunding Revenue Bonds Series 1999, the Facilities Improvement Revenue Bonds Series 2001, the Facilities Refunding Revenue Bonds Series 2003, and the Facilities Improvement Revenue Bond Series 2004, and the Facilities Improvement Revenue Bond Series 2005.

Revenue bonds payable consist of the following at June 30, 2008

	Series	Amount Issued	Interest Range %	Balance June 30, 2008
Government-Wide Statements				
University Revenue Bonds	1999	\$ 18,760,000	5.05-5.5%	\$ 8,490,000
	2001	9,120,000	4.25-5.5%	6,855,000
	2003	4,340,000	3.25-3.5%	2,755,000
	2004	11,100,000	3.75-5.0%	10,235,000
	2005	16,000,000	3.25-5.0%	14,390,000
Total		\$ 59,320,000		42,725,000
Original issue discount/premium				792,023
Total				\$ 43,517,023

Future minimum payments for the University's revenue bonds recorded as of June 30, 2008 are as follows:

Year Ending June 30th	University of Wyoming	
	Principal	Interest
2009	\$ 3,430,000	\$ 2,048,544
2010	3,545,000	1,914,774
2011	2,245,000	1,773,311
2012	2,345,000	1,672,761
2013	2,460,000	1,559,486
2014-2018	14,240,000	5,872,129
2019-2023	11,235,000	2,326,280
2024-2025	3,225,000	221,250
	\$ 42,725,000	\$ 17,388,535

University Wyoming Foundation

The Foundation issued revenue bonds in the aggregate principal amount of \$3,700,000, pursuant to an Indenture of Trust, dated November 2007, by and between the Foundation and Wells Fargo Bank, N.A. The aggregate amount includes \$1,155,000 of serial bonds and \$2,545,000 of term bonds. The proceeds were used by the Foundation to help finance the cost of constructing and equipping the Conference Center located at 22nd Street and Grand Avenue in Laramie, Wyoming. The bonds bear interest from the date of issue to maturity or earlier redemption with interest payable semi-annually on May 1 and November 1 of each year.

Year	Principal Due November 1	Interest	Interest Rate	Annual Debt Service
2008	\$ 80,000	\$ 210,924	5.10%	\$ 290,924
2009	75,000	215,379	5.15%	290,379
2010	80,000	211,516	5.25%	291,516
2011	80,000	207,316	5.30%	287,316
2012	85,000	203,076	5.40%	288,076
2013-2017	510,000	939,579	5.45% to 5.72%	1,449,579
2018-2022	670,000	775,492	5.79% to 5.95%	1,445,492
2023-2027	2,120,000	547,350	6.15%	2,667,350
	\$ 3,700,000	\$ 3,310,632		\$ 7,010,632

The bonds maturing on or after November 1, 2018 are redeemable by the Foundation on any date after November 1, 2017, in whole or in part, at a redemption price equal to 100% of the principal amount of the bonds being redeemed and accrued interest to the redemption date.

The bonds maturing on November 1, 2022 and November 1, 2027 are subject to mandatory sinking fund redemptions at a redemption price equal to 100% of the principal amount thereof and accrued interest to the redemption date.

Since the Foundation no longer had an interest in the Conference Center at year end, they were required by the Bond Counsel to transfer funds in the amount of \$3.7 million to certain "permitted investments" to satisfy future obligations on the bonds. This transfer occurred subsequent to year end.

Wyoming Community Development Authority

Bonds are generally payable in scheduled annual and semiannual installments and are subject to mandatory sinking fund requirements in scheduled amounts. Redemption is optional after various dates at prices ranging from 100 to 102 per 100. Capital appreciation bonds (CABs) are reported at accredited value.

The bonds of the 1978, 1992, and 1994 indentures are special obligations of the Authority, payable solely from the income and receipts of these indentures. The bonds of the 1982 indenture are general obligations of the Authority payable from any of its revenues, income and receipts. All of the bonds are secured by mortgage loans and other assets of the respective indentures. Interest on all outstanding bonds is payable semi-annually or annually, except for variable rate debt which reprices weekly, based on market interest rates. The following table presents WCDA bonds outstanding at June 30, 2008:

Governmental Fund Revenue Bond Debt	Series	Amount Issued	Interest Range %	Balance June 30
Single Family Mortgage Bonds	1998 Series B	\$ 15,000,000	5.3	\$ 13,000,000

Five years ending 2037		173,130,000		13,596,404	186,726,404
Five years ending 2042		6,025,000		92,280	6,117,280
Total	\$	1,255,696,308	\$	863,597,771	\$ 2,119,294,079

The balances above do not include premiums, discounts, or losses on refundings in the amount of \$394,159 that are reported as components of bonds payable.

The WCDA entered into a line of credit agreement with a financial institution, secured by specific investments and mortgages. This agreement allows the Authority to borrow approximately 80% of the value of the investment collateral. As of June 30, 2008 the Authority had investments worth approximately \$7,351,886 par value on deposit with this financial institution; however, no amounts were outstanding on this line of credit.

Swap Payments and Associated Debt

Using rates as of June 30, 2008 and giving effect to scheduled reductions in the notional amount of the swap, debt service requirements of the Authority's outstanding variable-rate debt in 2005 Series 2, 2005 Series 4, 2005 Series 7, 2006 Series 2, 2006 Series 5, 2006 Series 7, 2006 Series 9, 2007 Series 2, 2007 Series 4, 2007 Series 6, 2007 Series 8, 2007 Series 11, and 2008 Series 2 and net swap payments are as follows. As rates vary, variable rate bond interest payments and net swap payments will vary.

	Variable Rate Bonds		Interest Rate		Total
	Principal	Interest	Swaps (Net)		
2009		\$ 2,399,068	\$ 2,404,297	\$	4,803,365

Conduit Debt

From time to time, the Authority has issued Multi-Family Housing Revenue Bonds to provide financial assistance to private-sector entities for the acquisition and construction of low-income multi-family housing deemed to be in the public interest. The bonds are secured by the revenues from the property financed. Neither the Authority, nor the State, nor any political subdivision thereof is obligated in any manner for repayment of the bonds. Accordingly, the bonds are not reported as liabilities in the accompanying financial statements.

As of June 30, 2008, there were two such series of Multi-Family Housing Revenue bonds outstanding, with an

aggregate principal amount payable of \$6,965,000.

C. Net OPEB Obligation

State of Wyoming

Fiscal year 2008 was the implementation year for the primary government regarding Governmental Accounting Standards Board (GASB) Statement 45 entitled "Accounting and Financial Reporting by Employers for Postemployment Benefit Plans Other Than Pension Plans." (GASB 45). This is also the „transition year“ for the State of Wyoming.

GASB 45 requires the State to have an actuarial valuation of the post-retirement benefit plan (other than pensions). The net result of which is to identify the actuarial accrued liability, the annual required contribution and the net OPEB obligation. The retiree benefits offered by the State included in this actuarial valuation are the self-insured plans, including prescription drugs, 3 options for early retirees and 2 options for Medicare retirees. Currently, the retiree benefits are subsidized by the State based on age and years of service.

Plan Description. The State participates in a single-employer defined benefit postemployment healthcare plan, the Retirees Health Insurance Plan. The Legislature has the authority for establishing and amending the plan. This plan does not issue a separate report.

A retiree is eligible for coverage under the group insurance plan at premium rates established by the State, provided:

Application to continue coverage is made to the State within thirty-one (31) days after termination of the retiree's employment; and

The retiree has had medical coverage in effect under the group insurance plan for at least one (1) year immediately prior to the date of retirement and is eligible to receive a retirement benefit under the Wyoming Retirement System; and either:

Has attained the age of fifty (50) on the date of retirement and has at least four (4) years of service credit under the Wyoming Retirement System as an employee of one (1) of the employing entities participating in the plan; or

Has at least twenty (20) years of service credit under the Wyoming Retirement System as an employee of one (1) of the employing entities participating in the plan.

Required Monthly Contributions. Contributions are required for both retiree and dependent coverage. The State of Wyoming is currently providing a subsidy to offset the retiree's contributions for the medical insurance program. The monthly contribution is required for both retiree and dependent coverage. The current contribution amounts are provided here:

Pre-Medicare

\$11.50 per month per year of service,
up to a maximum of 30 years

Medicare Eligible

\$5.75 per month per year of service,
up to a maximum of 30 years

For the plan year ending June 30, 2008 there were 4,736 fully eligible active participants, 6,953 active but not fully eligible participants and 1,585 retirees. The retiree's benefit description provides eligible retirees receive health care through one of three medical plans. All plans are available to those under age 65 while the Health Savings Plan is not available to those 65 and older. The actuarial valuation identified a dental benefit which is available, but does not believe there is an OPEB liability associated with this benefit since the benefit is full-contributory and there is no implicit subsidy.

GASB 45 allows the use of one of the following actuarial cost methods for the valuation: Unit Credit, Entry Age Normal, Attained Age, Aggregate, Frozen Entry Age, or Frozen Attained Age. These methods can be amortized on either a level dollar or a level percentage of earnings basis. This actuarial valuation assumes the use of the Unit Credit method with amortization on a level percentage basis, because it is believed the Unit Credit method provides the most logical correlation between accruing and expensing of retiree benefits.

Funding Policy. The State finances this program on a "pay-as-you-go" basis. The Legislature has the authority for establishing and amending the funding policy. For fiscal year 2008 the State's post-retirement plan is considered an unfunded plan. This is because the Legislature had not made the Retirees Health Insurance Fund an irrevocable trust fund as of June 30, 2008.

Annual OPEB Cost and Net OPEB Obligation. The State's annual other postemployment benefit (OPEB) cost (expense) is calculated based on the *annual required contribution of the employer (ARC)*, an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The following table shows the components of the State's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the State's net OPEB obligation:

Annual Required Contribution (ARC)	\$	19,292,000
Interest on net OPEB obligation		-
Adjustment to annual required contribution		-
Annual OPEB Cost	\$	19,292,000
Less:		
Employer Contributions		(7,324,000)
Increase in Net OPEB Obligation	\$	11,968,000
Net OPEB Obligation beginning of year	\$	-
Net OPEB Obligation end of year	\$	11,968,000

The Net OPEB Obligation (NOO) is the cumulative difference between the ARC and the employer's contributions to the plan. Since fiscal year 2008 is considered to be the transition period, the NOO is equal to zero as of July 1, 2007. For the fiscal year ending June 30, 2008 the NOO is projected to be \$11,968,000, and assumes the State continues on a pay-as-you-go basis (Unfunded).

The Annual Required Contribution (ARC) includes an amount to amortize the calculated unfunded actuarial liability. As of June 30, 2008 the ARC included \$6,647,000 representing the amount of amortization of the actuarial accrued liability over 30 years the maximum period allowed by GASB 45.

The State's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for 2008 for the plan was as follows:

Year Ended		June 30, 2008
Annual OPEB cost	\$	19,292,000
Percentage of OPEB cost contributed		38.0%
Net OPEB obligation	\$	11,968,000

The actuarial valuation date was as of July 1, 2007. The *Schedule of Funded Status and Funding Progress* is presented here.

Actuarial Valuation Year Ended June 30	Actuarial Valuation of Plan Assets	Actuarial Accrued Liabilities (AAL)	Unfunded AAL (Funding Excess)	Funded Ratio	Covered Payroll	Funding Excess as a Percentage of Covered Payroll
	(A)	(B)	(B-A)	(A/B)	C	((B-A)/C)
2008	0	\$ 174,161,000	\$ 174,161,000	0.00%	\$ 756,349,722	23.03%

The Actuarial Accrued Liability (AAL) for this post retirement benefit plan as of July 1, 2007 is \$174,161,000. This represents the present value of all future expected postretirement medical payments and administrative costs which are attributable to past service.

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events in the future. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future.

Actuarial Methods and Assumptions. Projections of benefits are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits in force at the valuation date. Actuarial calculations reflect long-term perspective and employ methods and assumptions that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets. Significant methods and assumptions were as follows:

Actuarial valuation date	July 1, 2007
Actuarial cost method	Projected Unit Credit
Amortization method	Level percentage
Remaining amortization period	30 years
Asset valuation method	Fair value of assets
Actuarial assumptions:	
Investment rate of return	5.0%
Healthcare Cost Trend Rate (HCCTR)	11.0% for 2008; decreasing approximately 0.5% each year thereafter until reaching 6.0%
Assumed rates of increase applied to retiree premiums	Same as HCCTR
Projected salary increases	4.0% per annum

NOTE 9 Lease Revenue

Lease revenue

The State possesses significant amounts of land of which the majority was received from the federal government when the Wyoming Territory was incorporated as a state. Such land is leased to third parties under leases accounted for as operating leases. Future minimum rents receivable under these lease agreements as of June 30, 2008 are as follows:

Year Ending June 30th	Governmental Funds	
2008	\$	6,167,874
2009		5,551,087
2010		4,934,299
2011		4,317,512
2012-2015		3,700,724
	\$	<u>24,671,496</u>
# of Grazing Leases		4,656
# of Special Use Leases		265
Total Acres Under Lease		3,545,026

NOTE 10 Pensions

State employees are eligible to participate in five different pension plans, depending on their current employment position. These plans are administered by the Wyoming Retirement System (WRS).

The Wyoming Retirement System was established in 1943 as a teachers' retirement program and amended in 1949 to incorporate State employees. Over 500 counties, municipalities, school districts and other units of government participate in the Wyoming Retirement System.

The Wyoming Retirement System administers seven defined benefit pension plans and one defined contribution plan:

1. Public Employees Pension Plan
2. Paid Firemen's Pension Plan A
3. Paid Firemen's Pension Plan B
4. Wyoming Highway Patrol, Game Warden & Division of Criminal Investigators Retirement Plan
5. Wyoming Judicial Retirement Plan
6. Wyoming Law Enforcement Retirement Plan
7. Volunteer Firemen's Pension Plan
8. Wyoming Deferred Compensation (457) Program

The responsibility for the administration and operation of the first six retirement systems and Wyoming Deferred Compensation (457) Program is vested in the Wyoming Retirement Board. The board is composed of eleven members, ten appointed by the Governor and the eleventh being the State Treasurer.

The Volunteer Firemen's Pension Plan is controlled by a separate board and administered by the director of the Wyoming Retirement System. The board consists of six members who shall be appointed by the Governor for staggered terms of three years. Each member is a volunteer fireman with a minimum of five years as a member of a volunteer fire department in the State of Wyoming.

The State reports all the plans administered by the Wyoming Retirement System as Pension Trust Funds. The Pension Trust Funds are presented on the accrual basis of accounting with investments valued at fair value determined, primarily, by the latest bid price or the closing exchange price at the balance sheet date.

WRS issues a stand-alone financial report. It can be obtained by writing to the Wyoming Retirement System, 6101 Yellowstone Road, 5th Floor West, Cheyenne, WY, 82002, or by calling 307-777-7691. The WRS fiscal year-end statements are as of December 31, which the State uses for its June 30th report.

The State administers the Wyoming Judicial Retirement Plan, which is a non-funded single-employer defined-benefit pension plan. No report is issued for this plan.

Plan Descriptions

Public Employees Pension Plan:

The Public Employees Pension Plan is a defined benefit, contributory retirement plan covering substantially all employees of the State and of the Public School Systems of Wyoming. The Plan also covers employees of those political subdivisions, which have elected to participate in the Plan.

The Plan statutorily requires 11.25% of the participant's salary to be contributed to the Plan. Contributions consist of 5.68% of the participant's salary as employer contributions and 5.57% as employee contributions. The amount of contributions designated as employee contributions represent the portion of total contributions that a participant retains ownership of and can elect to receive as a refund upon termination of employment. Employers can elect to cover all or a portion of the employee's contribution at their discretion.

The Plan allows for normal retirement after four years of service and attainment of age 60. Early retirement is allowed provided the employee has completed four years of service and attained age 50 but will result in a reduction of benefits based on the length of time remaining to normal retirement age.

The Plan provides retirement, disability and death benefits according to predetermined formulas and allows retirees to select one of seven optional methods for receiving benefits, including two optional forms of benefits: a 100% joint and survivor annuity, and a 50% joint and survivor annuity. The benefit amounts under these options are determined on an actuarially equivalent basis. The Plan also statutorily provides for an annual percentage increase in the benefit amounts beginning on July 1, after two full years of retirement, by the lesser of 3% or the cost of living as determined by the Board. State statutes provide for future annual percent increases in the benefit amount to be the greater of the cost of living as determined by the Board or the percentage determined actuarially sound by the System's actuary, up to 3% each year.

Employees terminating prior to normal retirement age can elect to withdraw all employee contributions plus accumulated interest through date of termination or, if they are vested, they may elect to remain in the Plan and be eligible for retirement benefits at age 50.

Wyoming State Highway Patrol, Game and Fish Warden and Criminal Investigator Retirement Plan:

The Wyoming State Highway Patrol, Game and Fish Warden and Criminal Investigator Retirement Plan is a defined benefit, contributory retirement plan covering sworn officers of the Wyoming State Highway Patrol and law enforcement officers employed by the Wyoming State Game and Fish Department who are not covered under the System, and sworn peace officers of the Division of Criminal Investigation.

The Plan statutorily requires participants to contribute 11.02% of their salary to the Plan and the State is required to contribute 11.33% of each participant's salary for a total contribution of 22.35%.

The Plan allows for normal retirement at age 50. The Plan provides retirement, disability and death benefits according to predetermined formulas. Terminating employees are entitled to a refund of employee contributions plus accumulated interest. The Plan also statutorily provides for an annual percentage increase in the benefit amounts beginning on July 1, after two full years of retirement, by the lesser of 2.25% or the cost of living as determined by the Board. State statutes provide for future annual percent increases in the benefit amount to be the greater of the cost of living as determined by the Board or the percentage determined actuarially sound by the System's actuary, up to 2.25% each year.

The maximum service pension is 75% of the highest average salary. The minimum years of service requirement for a monthly benefit are six years.

Volunteer Firemen's Pension Plan:

The Volunteer Firemen's Pension Plan is a defined benefit, contributory retirement plan covering volunteer firemen who elect to participate in the Plan. Participants are statutorily required to contribute \$12.50 monthly to the Plan, although such contributions may be fully or partially paid by political subdivisions on behalf of participants, if approved by the governing board. In addition, the State pays into the Plan 50% of the gross annual tax collected on fire insurance premiums. The Plan provides retirement and death benefits according to predetermined amounts primarily determined by age and years of service of the participant. Participants may withdraw from the Plan at any time and receive refunds of participant contributions plus accumulated interest.

Paid Firemen's Pension Plan A:

The Paid Firemen's Pension Plan A is a defined benefit, contributory retirement plan covering paid firemen who were employed prior to July 1, 1981 and who elect to participate.

The Plan statutorily required participants to contribute 8% of their salary to a maximum not to exceed the salary of a Firemen First Class. Employers were required to contribute 21% of the salary. Effective April 1, 1997, required contributions have been suspended as the Plan has been determined to be actuarially over-funded.

The Plan statutorily provides retirement, disability and death benefits according to predetermined amounts primarily determined by years of service and average salaries. The Plan also statutorily provides for a percentage change in the benefit amounts after one full year of retirement, by the lesser of 3% or the cost of living as determined by the Board or the percentage determined actuarially sound by the System's actuary. In the event the current actuarial valuation indicates the market value of assets is greater than one hundred fifteen percent (115%) of the actuarial value of liabilities, the Board may increase the benefit by an amount determined affordable by the actuary but not greater than five percent (5%) of the benefit. Participants may withdraw from the Plan at any time and receive refunds of participant contributions without interest.

Paid Firemen's Pension Plan B:

The Paid Firemen's Pension Plan B is a defined benefit, contributory retirement plan covering paid firemen who were employed on or after July 1, 1981 and who elect to participate.

The Plan statutorily requires participants to contribute 6% of their salary to the Plan and the employer is required to contribute 12% of each participant's salary.

The Plan provides retirement, disability and death benefits according to predetermined amounts primarily determined by years of service and average salaries. The Plan also statutorily provides for a percentage change in the benefit amounts after one full year of retirement, by the lesser of 3% or the cost of living as determined by the Board or the percentage determined actuarially sound by the System's actuary. Participants may withdraw from the Plan at any time and receive refunds of participant contributions without interest.

Wyoming Judicial Retirement Plan:

The Wyoming Judicial Retirement Plan is a defined benefit, contributory plan covering any Justice of the Supreme Court, District Judge or County Court Judge appointed to any of these offices on or after July 1, 1998, and with no prior service as a Justice of the Supreme Court or District Judge at the time of the appointment. The Plan also covers any Justice or Judge who elects to participate.

The Plan statutorily requires participants to contribute 9.22% of their salary to the Plan and the employer is required to contribute 8.78% of each participant's salary.

The Plan statutorily provides retirement and death benefits according to predetermined amounts primarily determined by age and years of service of the participant. The Plan also statutorily provides for an annual percentage increase in the benefit amounts beginning July 1, after one full year of retirement, by the lesser of 3% or the cost of living as determined by the Board. State Statutes provide for future annual percent increases in the benefit amount to be the greater of the cost of living as determined by the Board or the percentage determined actuarially sound by the System's actuary, up to 3% each year. Participants may withdraw from the Plan at any time and receive refunds of participant contributions plus accumulated interest.

Wyoming Law Enforcement Retirement Plan:

The Wyoming Law Enforcement Retirement Plan is a defined benefit, contributory plan covering any county sheriff, deputy county sheriff, municipal police officer, Wyoming correctional officer, Wyoming law enforcement academy instructor, University of Wyoming campus police officer, detention officer, probation and parole agent, or dispatcher for law enforcement agencies and certain investigators of the Wyoming Livestock Board.

The Plan statutorily requires participants to contribute 8.6% of their salary to the Plan and the employer is required to contribute 8.6% of each participant's salary.

The Plan statutorily provides retirement, disability and death benefits according to predetermined amounts primarily determined by salary, age and years of service of the participant. The Plan also statutorily provides for a percentage increase in the benefit amounts beginning July 1, after two full years of retirement by 2% each year. State Statutes provide for future annual percent increases in the benefit amount to be the greater of the cost of living as determined by the Board or the percentage determined actuarially sound by the System's actuary, up to 2% each year. Participants may withdraw from the Plan at any time and receive refunds of participant contributions plus accumulated interest.

The Section 457 Plan

The Section 457 Plan administered by the Wyoming Retirement System is a defined contribution plan. This Plan is available as a supplemental plan to the basic retirement benefits of the Retirement System for employees of public employers who have adopted the 457 Plan. Contributions may be made into the Plan (subject to Plan and Internal Revenue Code limitations) by employees of participating employers sponsoring the Plan. Employer contributions may be made into the Plan at rates determined by the employers. There are 13,824 participants in the 457 Plan who are contributing through 218 employers.

Upon qualifying for distributions, benefits are paid out in lump sums, or as periodic benefit payments, at the option of the participant based on individual account balances and plan provisions. The 457 Plan's account balances are fully vested to the participants at the time of deposit.

Investments in the 457 Plan are individually directed by Plan participants who direct the investment of their funds among Board approved investment options of varying degrees of risk and earnings potential. Participants may transfer their funds between these options daily. Investments of the Plan are reported at fair value.

In addition to accepting employee deferrals, this Plan also accepts employer contributions on behalf of their employees, provided such contribution when added to the employees' contribution deferred does not exceed the maximum deferral permitted by the Plan. The State contributes \$20 a month per employee participating in the 457 Plan no matter the amount of the employee's contribution. The State contributed \$1,434,080 on behalf of its employees during the year ended December 31, 2007.

The State's contributions as employer are as follows:

Employer Contributions				
	Public Employees Pension Plan	WY State Hwy Patrol, G&F Warden, and Criminal Investigator Retirement Plan	Wyoming Judicial Retirement Plan	Wyoming Law Enforcement Retirement Plan
Year Ended Dec. 31	Annual Required Contribution	Annual Required Contribution	Annual Required Contribution	Annual Required Contribution
2005	\$ 34,028,580	\$ 3,364,049	\$ 533,322	\$ 2,787,991
2006	35,884,329	3,643,618	633,747	3,545,679
2007	42,930,434	4,539,222	765,194	4,344,614
Contributions have been fully funded in the current and prior years. And equals the required contributions for the years then ended.				

University of Wyoming

Retirement and Pension Plans

Eligible University employees have the option of participating in either the Wyoming Retirement System (WRS) or Teachers Insurance and Annuity Association-College Retirement Equities Fund (TIAA-CREF). WRS is a cost-sharing, multiple-employer public employee defined benefit, contributory retirement plan. TIAA-CREF is a defined contribution plan. Participants in WRS who retire at age 60 with four years of credited service are entitled to a retirement benefit according to predetermined formulas and are

allowed to select one of five optional methods for receiving benefits. Early retirement is allowed provided the employee has completed four years of service and attained the age of 50, but will result in a reduction of benefits based on the length of time remaining to normal retirement age. WRS also provides death and disability benefits. Benefits are established by State statutes. The WRS issues a publicly available financial report that includes financial statements and required supplementary information. This report may be obtained by writing to Wyoming Retirement System, 6101 Yellowstone Road, 5th Floor West, Cheyenne, Wyoming 82002 or by calling (307) 777-7691.

Defined Contribution Plan

Statutes require that 11.25% of the covered employee's salary be contributed to the plan, one-half by the employee and the other half by the employer. The University contributes both the employee and employer portions funded primarily through appropriations from the State Legislature. For the years ended June 30, 2006, 2007 and 2008, the University's contributions to the WRS were \$5,404,660, \$5,596,376 and \$5,999,462, respectively, which equals the required contribution for the years then ended.

The University has an additional program called "Board Retirees." To qualify for the program, an employee must meet one of the following two criteria at the time of retirement:

1. Be age 60 or over and have 15 years or more of immediately preceding service, or
2. 25 years of cumulative service.

Board retiree status allows an individual with unused sick leave at the time of retirement to convert up to 120 days of unused accrued sick leave to be applied toward the State contribution for group health insurance if elected. The conversion is at a rate of 1.5 months of coverage for each five days of sick leave (a maximum of 36 months of premiums). The maximum per month premium currently is \$489 a month for individuals, \$969 a month for employee and spouse, and \$1,107 a month for family participants in the plan. The premium is paid by the University as it is incurred on a monthly basis. The health care trend rate is based on a 20% increase per year. There are 88 employees that have elected board retirement and are participating in the plan as of June 30, 2008. The total amount charged to expense during the year ended June 30, 2008 was \$(223,063). The total accrued liability at June 30, 2008 is \$7,638,944.

Effective June 7, 2007, the policy was changed such that any employee who retires (begins drawing retirement payments) and has completed 25 years of service or has 15 years of service immediately preceding the date of retirement shall receive the same sick leave conversion benefit as Board Retirees. There is one employee that has elected to receive this benefit and is participating in the plan as of June 30, 2008. The total amount charged to expense during the year ended June 30, 2008 was \$361,154, which is also the total accrued liability at June 30, 2008.

Board retiree status also allows an individual who has been enrolled in the State life insurance plan to have the University pay one-half the premium for the remainder of the time the individual holds the policy. The share of the premium is paid by the University as it is incurred on a monthly basis. There are 517 employees that have elected board retirement and are participating in the plan as of June 30, 2008. The total amount charged to expense during the year ended June 30, 2008 was \$(3,484). The total accrued liability at June 30, 2008 is \$938,725.

NOTE 11 Risk Management

Self-Insurance Funds

The State maintains two self-insurance plans: the State self-insurance program and the State employee medical, life, and dental insurance programs. Each of these plans is reported as an internal service fund. The University administers its own risk management program and reports a liability in the University funds. A brief description of each of the plans is provided below:

A. State Self Insurance Fund

Wyoming statute 1-41-103 created the State Self Insurance Fund to handle liability insurance claims brought against the State. The range of losses financed includes general liability, automobile liability, police liability, medical malpractice liability and civil rights. In addition, this plan covers peace officers liability for the political subdivisions within Wyoming. The State generally does not maintain reserves; losses are covered by a combination of appropriations from the State's general fund, Department of Transportation, Game & Fish Commission, and by assessing other State agencies a deductible of up to \$2,500 per claim when the agency is determined to be liable for the loss. The estimated liability for claims against the State including incurred but not reported claims is approximately \$5.6 million as of June 30, 2008. The claims liability estimate is based on an analysis of past, current and future estimated loss experience, a review of pending claims, an actuarial evaluation. Because actual claims liabilities depend on such factors as inflation, changes in legal doctrines and damage awards, the process used in computing claims liabilities may not result in an exact amount. Claims liabilities are evaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. The above estimate is not discounted and includes all claims adjustment expenses estimated necessary to properly settle the claim. There is no outstanding amount of claims for which annuity contracts have been purchased in the claimant's name as of June 30, 2008.

B. Group Insurance Fund

The State co-administers employee medical, life, and dental insurance with a third party administrator. The State self-insures medical costs and assumes all the risk for claims incurred by plan participants. Insurance providers solely administer the life insurance plan. The State does not retain any risk of loss under the life insurance plan, as the insurance provider of the plan assumes all the risk for claims incurred by the participants.

During the year ended June 30, 2008, the State contributed up to 85% a month for insurance premiums for each covered participant towards these plans. Participants are responsible for paying premium charges in excess of this amount. As of June 30, 2008, the medical claims liability including incurred but not reported claims is approximately \$12.4 million. A liability is recorded in the accompanying financial statements for the estimated claims liability. The claims liability estimate is based on an analysis of past, current and future estimated loss experience, a review of pending claims, an actuarial evaluation. Because actual claims liabilities depend on such factors as inflation, changes in legal doctrines and damage awards, the process used in computing claims liabilities may not result in an exact amount. Claims liabilities are evaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. The above estimate is not discounted and includes all claims adjustment expenses estimated necessary to properly settle the claim. There is no outstanding amount of claims for which annuity contracts have been purchased in the claimant's name as of June 30, 2008. No significant reductions in insurance coverage were made in the last fiscal year.

C. University Risk Management

The University is exposed to various risks of loss including torts, theft of, damage to, or destruction of assets, and teachers' liability. The University has purchased commercial insurance for these risks that include insurance for property and liability. Settlements have not exceeded insurance coverage in any of the past three fiscal years. The uninsured risk retention per occurrence/aggregate is \$100,000/\$200,000 for property and ranges from \$100,000 to \$1,000,000 for various liability risks. A liability for a claim is established if information indicates that it is probable that a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated.

The following is a reconciliation of the unpaid claims liability:

	State Self Insurance Fund		Group Insurance Fund		University of Wyoming	
	2007	2008	2007	2008	2007	2008
Claims Liability at Beginning of Fiscal Year	\$ 6,064,174	\$ 5,123,543	\$ 7,622,100	\$ 10,991,778	\$ 750,000	\$ 750,000
Current Year Claims & Changes in Estimates	1,136,478	4,024,365	125,237,494	151,679,192	515,663	598,454
Claim Payments	(2,077,109)	(3,503,365)	(121,867,816)	(150,296,807)	(515,663)	(598,454)
Claim Liability at End of Fiscal Year	\$ 5,123,543	\$ 5,644,543	\$ 10,991,778	\$ 12,374,163	\$ 750,000	\$ 750,000

The University included their unpaid claims liability under the caption of "Accounts Payable."

Insurance Enterprise and Public Entity Risk Pools

The State administers three insurance enterprises: workers' compensation insurance, the Wyoming health insurance pool, and the mine subsidence insurance which are reported in enterprise funds. None of these funds have acquisition costs, therefore, no cost is amortized for the period. Unpaid claims and claim adjustment expenses are estimated based on the ultimate cost of settling the claim, including the effects of inflation and other social and economic factors. These funds use the accrual basis of accounting. The insurance enterprises do not consider anticipated investment income in determining if a premium deficiency exists. A brief description of the insurance enterprises and the pool are provided below:

- A. Workers' Compensation Insurance Fund-** Wyoming statute 27-14-101-806 created the Wyoming Workers' Compensation Act (Act). This Act requires all employers engaged in extra hazardous employment to obtain liability coverage for the payment of benefits to employees for job related injuries and diseases through the Workers' Compensation Insurance Fund. Eligible employers complying with the provisions of the Act are generally protected from suit by employees. Employers not required by the Act to participate in this program may elect to do so at their option. As of June 30, 2008, there were 17,815 employers insured under this Act.

The fund is used to account for the State's Workers' Compensation program that provides time-loss, medical, and disability payments to qualifying individuals sustaining work-related injuries, or death benefits to dependent families if the worker were to die from such injuries. To fund these benefits, the State charges employers' monthly premiums based on rates it establishes for each employment classification, the employer's experience rating, and the total payroll for covered employees in each particular classification. The Act requires that rates be established at a level to maintain an actuarially sound insurance program. The State is working towards funding the workers' compensation liabilities by 2013 through premium rate adjustments.

An actuarial study has estimated the liabilities and the ultimate cost of settling claims that have been reported but not settled and of claims that have been incurred but not reported. Because actual claims costs depend on such complex factors as inflation, changes in doctrines of legal liabilities, claims adjudication, and judgments, the process used in computing claims liabilities does not necessarily result in an exact amount. Claims liabilities are re-computed periodically using a variety of actuarial and statistical techniques to produce current estimates that reflect recent settlements, claim frequency, and other economic, legal and social factors.

A provision for inflation in the calculation of estimated future claims costs is implicit in the calculation because reliance is placed both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience. The Department of Employment uses an undiscounted Workers' Compensation Insurance Fund balance when determining industry base rates for employer premiums. For consistency between the Department of Employment's Workers' Compensation Insurance Fund balance used for rate setting purposes and Workers' Compensation Insurance Fund balances shown in the CAFR, the Workers' Compensation Insurance Fund balance is shown at an undiscounted value. At June 30, 2008, approximately \$925.1 million of claims and adjustment expenses have been accrued. The State does not use reinsurance agreements, therefore the State retains full liability as the direct insurer.

B. Wyoming Health Insurance Fund

This fund is comprised of two programs: the Wyoming Health Insurance Pool and the Wyoming Small Employer Health Reinsurance Program.

Wyoming Health Insurance Pool (WHIP)

Wyoming statute 26-43 created the Wyoming Health Insurance Pool (Pool) for the purpose of providing health insurance for State residents. Qualifying State residents who are denied insurance by private carriers or leave coverage because of excessively high premiums or restrictive coverage may join the Pool. The Pool began providing health insurance coverage to participants on January 1, 1991. The statute creating the Pool contains a sunset provision that calls for the Pool to be terminated on June 30, 2011, unless authorization is continued. The State co-administers the Pool along with a third party insurance provider, Blue Cross Blue Shield of Wyoming; however, the Pool retains all risk of loss for claims filed by Pool participants. As of June 30, 2008, 641 residents were covered under the Pool. A copy of the Pool's financial report may be obtained by contacting Blue Cross Blue Shield of Wyoming in writing at 4000 House Avenue, Cheyenne, Wyoming 82001.

The Pool's liability exposure per participant is a maximum lifetime benefit of \$500,000 for the Brown Plan and \$750,000 for the Gold Plan. Premiums are collected from Pool participants to pay Pool expenses; however, if such premiums are insufficient to meet expenditures, the State has the authority to assess all carriers who write health insurance policies in the State to cover Pool deficits.

The estimated liability for unpaid claims and loss adjustment expense is based on data developed by the Pool's third-party administrator. Since the Pool has limited historical experience of its own, industry experience is also considered in determining the estimated liability. The liability includes estimates of the costs to settle individual claims that have been reported, plus a provision for losses incurred but not yet reported. The undiscounted liability for unpaid claims and claim adjustment expenses is \$1,400,000 at June 30, 2008.

Wyoming Small Employer Health Reinsurance Program (WSEHRP)

Wyoming statute 26-19-301, et. seq. created the Wyoming Small Employer Health Insurance Availability Act (the Act). The purposes of the Act are to 1) promote the availability of accident and health insurance coverage to small employers, 2) to provide reinsurance as a mechanism to fairly share risk, and 3) to improve the efficiency and fairness of the small employer group accident and health insurance marketplace.

The WSEHRP (the Program) is created under Wyoming Statute 26-19-307. The program is funded by reinsurance premiums paid by participating carriers and assessments against all authorized insurers who pay premium taxes to the State of Wyoming. Each year the Program's net earnings are determined. If net earnings are negative (i.e. the Program has operated at a loss), the loss is recovered by assessments against all authorized insurers. An independent board determines each authorized insurer's assessment in accordance with statutory provisions. As of June 30, 2008, the Program is reinsuring 100 lives. Three whole group plans reinsure 8 lives and eighty-three individuals plans reinsure 92 lives. A copy of the Pool's financial report may be obtained by contacting the Wyoming Department of Insurance at 106 East 6th Avenue, Cheyenne, Wyoming 82002.

The estimated liability for unpaid claims and loss adjustment expense is based on data maintained by the Program's reinsurance intermediary manager, Pool Administrators, Inc., Wethersfield, CT. The Program's claim loss reserve is made up of two amounts, one being claims payable and the other being claims incurred but not reported (IBNR). The Program uses a claims loss ratio applied to earned premiums to estimate the incurred claims. The Program used a 750% loss ratio to estimate the incurred claims for both calendar year 2007 and the first 6 months of 2008. The loss reserves and IBNR estimates are then calculated from the estimates of incurred claims. As of 12/31/2007 the claims payable balance was \$345,694 and the IBNR was estimated at \$2,149,715 for a total loss reserve balance of \$2,495,409. As of 6/30/2008 the claims payable balance was \$1,341,442 and the IBNR was estimated at \$3,998,607 for a total loss reserve balance of \$5,340,049.

- C. Subsidence Insurance** - Wyoming statute 35-11-13 requires the Department of Environmental Quality (DEQ) to administer an insurance program to cover mine subsidence loss to specified structures in the State. The Wyoming Mine Subsidence Insurance Program provides insurance to any individual whose home or business exists over or near any underground mine in the State. On October 29, 1986, the DEQ received a funding grant from the Federal Department of Interior's Office of Surface Mining to assist with administrative and claim costs. A grouting program was initiated in Rock Springs in 1986. A cement type of material is used to fill those abandoned mines subject to the greatest risk of subsidence. As of June 30, 2008, there were 254 policyholders with in-force premiums. The insured value of these policies is \$28,134,409. There was 1 unresolved or pending claim as of June 30, 2008. The estimated cost of this unresolved claim is \$14,600. This program had an actuarial valuation performed in 1999 that is used to determine that premiums charged to participants are sufficient to meet anticipated claim expense.

The following table summarizes current period activity for the State insurance enterprise funds:

	Workers' Compensation Insurance Fund		Wyoming Health Insurance Fund	
	2007	2008	2007	2008
Claims Liability at Beginning of Fiscal Year	\$ 825,206,000	\$ 854,121,631	\$ 1,200,000	\$ 3,522,357
Incurred Claims & Claim Adjustment Expenses:				
Provisions for Insured Events of the Current Year	118,735,536	175,430,221	7,837,485	16,816,635
Increase in Provision for Insured Events of Prior Years	36,735,000	36,098,000	0	(618,754)
Total Incurred Claims & Claim Adjustment Expense	155,470,536	211,528,221	7,837,485	16,197,881
Claims & Claim Adjustment Expenses Attributable to Insured Events of Current Year	(42,172,000)	(45,430,000)	(4,228,556)	(11,750,191)
Claims & Claim Adjustment Expenses Attributable to Insured Events of Prior Year	(84,382,905)	(95,103,937)	(1,286,572)	(1,229,998)
Total Payments	(126,554,905)	(140,533,937)	(5,515,128)	(12,980,189)
Total Unpaid Claims & Claim Adjustment Expenses at End of Fiscal Year	\$ 854,121,631	\$ 925,115,915	\$ 3,522,357	\$ 6,740,049

Note 12 Commitments and Contingencies

Federal Grants

Grant monies received and disbursed by the State are for specific purposes and are subject to audit by the grantor agency. Such audits may result in requests for reimbursement due to disallowed expenditures. Based upon prior experience and current knowledge, the State does not believe that such disallowances, if any, would have a material effect on the financial position or results of operations of the State.

School Capital Construction Commitments

As of June 30, 2008, the State has signed agreements for contracts/obligated amounts--totaling approximately \$784.5 million with school districts throughout the state that commit the State to provide funding for school district capital construction projects. As of June 30, 2008, approximately \$553.3 million was unexpended under these agreements.

Investment Commitments

The State has committed to provide funding to certain private equity and real estate investments. The State's total commitment over the ten-year term of the partnership is \$292,950,000. This includes \$225,000,000 in capital for investment and up to \$32,985,000 for management fees to be paid over the term of the investments. The State had invested \$143,089,436 in these investments at June 30, 2008.

Wyoming Retirement System

At December 31, 2007, the System was committed to the future purchase of investments at an aggregate cost of \$220,587,538.

Wyoming Business Council

Loans approved by the Council's Board of Directors but undistributed as of June 30, 2008 totaled \$3,055,022. Of this amount, \$129,512 will be funded out of general funds appropriated for the Mainstreet loan program and the remaining amount will be funded out of the cash balance in the Economic Development Fund.

Wyoming Business Council—Transactions with the State

The Council pays for services provided by the State for certain phone service, computer processing, motor pool vehicles, State plane usage, loan exam services and central mail. Total amounts expended for these services for the year ended June 30, 2008 were \$391,526.

The Council has entered into several agreements with the University of Wyoming (UW) to fund various projects which include the Market Research Center, Research Product Center, Manufacturing-Works (formerly known as the Mid-America Manufacturing Technical Centers), Small Business Development Centers, Small Business Innovation Research, Government Resources and Opportunities for Business (GRO-Biz), Technology Business Center and Small Business Technology Transfer programs. Total amounts paid to UW for the year ended June 30, 2008 were \$1,356,914. The Council had accounts payable to the University of Wyoming in the amount of \$446,362 as of June 30, 2008. The Council is contingently liable for amounts remaining under these agreements in the amount of \$1,800,513 as of June 30, 2008.

The Council has also entered into several agreements with the Wyoming Department of Transportation to provide for certain highway signage and highway advisory radios. Total amounts paid under these agreements for the year ended June 30, 2008 were \$544,069. The Council is contingently liable for amounts remaining under these agreements in the amount of \$172,083 as of June 30, 2008.

Construction Commitments

As of June 30, 2008, there were 36 uncompleted construction projects as follows:

Project	Appropriation Amount	Expended Amount	Remaining Encumbrance	Remaining Balance to Obligate
Supreme Court Bldg renovation	\$ 15,529,836	\$ 12,428,375	\$ 1,624,929	\$ 1,476,532

	\$ 342,184,517	\$ 147,309,882	\$ 25,700,076	\$ 169,174,609

University of Wyoming

The University has contracted and/or appropriated funds for the planning and construction or maintenance of several facilities with an aggregate cost of \$217,470,000. As of June 30, 2008, the remaining commitment to complete these projects totaled approximately \$153,962,000. These completion costs will be financed by a combination of State appropriations, bond proceeds, federal grants, and private gifts and grants.

Department of Transportation

The Department of Transportation had outstanding contract commitments for highway construction, maintenance, and aeronautics projects at September 30, 2007 of approximately \$195 million. A substantial portion of these commitments (\$39,338,127) will be funded by federal financial assistance as expenses are incurred.

Wyoming Business Council

The Council has contracted and/or committed funds for various projects, services or other items arising in the normal course of operations. The amounts remaining to complete these commitments totaled \$45,415,532 as of June 30, 2008. These commitments will be funded by a combination of restricted net assets, State appropriations, and federal revenues.

Leases

The State is committed under various leases that are considered operating leases. The operating lease expenditures/expenses are recognized as incurred or paid.

Governmental funds rental expenditures under operating leases for the year ended June 30, 2008 were \$11,321,799. Future rental commitments for operating leases are as follows:

Year Ending June 30th	Governmental Fund Types
2009	11,322,918
2010	10,003,323
2011	6,992,207
2012	6,340,573
2013	5,154,364
2014-2015	5,405,071
2016-2020	2,199,067
	<u>\$ 47,417,523</u>

On July 1, 2007, the State signed a one hundred year lease for the military department which will expire June 30, 2107. The future rental expenditure for the military department's operating lease beyond the year 2020 reported in the table above is \$19,575,000.

Wyoming Business Council

The Council has entered into operating leases for office space and equipment. Expenditures or expenses on these leases are recognized as incurred. Total rent expenses for these operating leases for the year ended June 20, 2008 was \$180,051. Future rental payments for these operating leases are as follows:

Year Ending June 30th	Amount
2009	\$ 165,248
2010	149,222
2011	14,391
2012	11,067
2013	4,454
Total minimum payments	<u>\$ 344,382</u>

Wyoming Retirement System

The System leased a commercial office facility, under a non-cancelable lease agreement. Future minimum annual rental commitments are \$144,050 per year, until the lease agreements expires on June 30, 2009.

Contingencies

Under the School District Bond Guarantee Program the Wyoming State Loan and Investment Board approved the guarantee of approximately \$61.6 million of bonds by the State through the year ended June 30, 2008. The State approved the following bonds as of June 30, 2008:

School Districts Approved	Date Approved	Amount Approved	Outstanding Bond Principle	Available for Future Guarantee
Big Horn County School District #3	June 14, 2001	2,310,000	1,150,000	
Fremont County School District #1	October 4, 2001	6,000,000	4,610,000	
Fremont County School District #2	April 3, 2003	795,000	250,000	
Fremont County School District #6	March 5, 1998	1,435,000	205,000	
Fremont County School District #25		5,680,000	1,610,000	
Hot Springs Co. School District #1	February 6, 2003	4,200,000	1,320,000	
Laramie County School District #2	August 15, 2003	2,060,000	1,005,000	
Lincoln County School District #2	October 1, 1998	2,250,000	270,000	
Lincoln County School District #2	August 15, 2003	2,590,000	650,000	
Platte County School District #1	December 9, 1999	6,000,000	2,500,000	
Platte County School District #1	November 7, 1996	3,000,000	850,000	
Sweetwater County School District #2	May 8, 1998	18,200,000	8,165,000	
Sweetwater County School District #2	February 6, 2003	4,460,000	840,000	
Washakie County School District #2	February 4, 1999	500,000	225,000	
Weston County School District #1	June 1, 2000	1,870,000	1,275,000	
Weston County School District #7	June 1, 2000	255,000	90,000	
		<u>\$ 61,605,000</u>	<u>\$ 25,015,000</u>	<u>\$ 274,985,000</u>

The Legislature has placed a \$300 million cap under the School District Bond Guarantee Program, of which \$274,985,000 is still available as noted above. This guarantee program only applies to refunding issues for bonds issued by school districts on or before November 1, 2001 and no longer applies to original issues after this date.

Wyoming Statute 35-11-1414, *Water Pollution from Underground Storage Tanks Corrective Action Act of 1990*, requires that the State establish a corrective action and financial responsibility account which is funded by mineral severance taxes as well as certain registration fees. In addition, this statute requires the Department of Environmental Quality to establish a prioritized list of sites contaminated by tanks and to take corrective action. As of June 30, 2008, 1560 contaminated sites have been identified and 830 have been resolved. The State remediates contaminated sites as funding allows, and the statute limits the State's liability for clean-up costs to amounts available in the corrective action accounts. This liability totals \$12,502,206 at June 30, 2008. Management believes that the ultimate costs to remediate the known contaminated sites will exceed the amounts available in the corrective action accounts. However, given the statutory limitation on the State's responsibility for remediation, liabilities beyond the amounts held in the corrective action accounts have not been recorded. The State intends to conduct a program review and actuarial study to determine the potential clean-up costs associated with sites encompassed by the statute. Until such studies have been completed, the ultimate cost of remediation of contaminated sites cannot be determined.

The State is also a party to various legal proceedings arising in the normal course of business. The State believes that the outcome of these matters will not have a material adverse impact on the State's financial position or results of operations.

Wyoming Community Development Authority

At June 30, 2008, the Authority was committed to purchase single-family mortgages aggregating approximately \$2,381,505 under the 1978 Indenture, \$52,062,392 under the 1994 Indenture and \$1,897,303 under the Housing Trust Fund. In addition, at June 30, 2008, the Authority had committed approximately \$5,617,748 for other project mortgages to be funded through federal programs or housing trust funds. The Authority has variable rate bonds outstanding in the 1978 Indenture of \$52,545,000 and in the 1994 Indenture of \$170,900,000. These bonds are subject to tender at par for repurchase by the Authority at the option of the bondholders; however, the Authority may remarket these bonds if they are tendered by the bondholders. As of June 30, 2008, \$6,000,000 of the variable rate debt is subject to repurchase directly by the Authority, and \$92,445,000 of the repurchase commitment has been assumed by Westdeutsche Landesbank Girozentrale and \$125,000,000 of the repurchase commitment has been assumed by State Street Bank, through a standby bond purchase agreement. Under these agreements, the Banks will purchase any bonds tendered by bondholders and not remarketed, and will adjust the interest rate associated with any to a Bank rate.

The Authority uses a number of insurers for its mortgage receivables as noted in Note 4. The Authority requires private mortgage insurance (PMI) on some mortgages with coverage ranging from 35% to 50% of the outstanding balances. As of June 30, 2008, approximately 27% and 24% of the Authority's outstanding mortgage receivable balances were covered by PMI from Radian and Genworth, respectively. In addition, the Authority has obtained pool insurance for its mortgage receivables. Pool insurance provides stop loss coverage of up to 5% of the covered balances with a .5% to 1% deductible. As of June 30, 2008, approximately 40% and 22% of the Authority's outstanding mortgage receivable balances were covered by pool insurance from Radian and Genworth, respectively.

Note 13 Subsequent Events

Primary Government

Subsequent to year end, the credit and liquidity crisis in the United States and throughout the global financial system has resulted in substantial volatility in financial markets and the banking system. These and other economic events have had a significant adverse impact on investment portfolios. As a result, the State's investments had declined in value by approximately \$1,050,000,000 or 10% of the investments market value as of November 30, 2008.

Wyoming Community Development Authority

On July 1, 2008, the Authority redeemed \$40,328,436 of bonds under the 2007 Indenture. On September 4, 2008, the Authority issued \$60,000,000 of bonds under the 1994 Indenture. During September 2008, there were disruptions in the credit markets which caused significant increases in short term interest rates. The Authority has \$223,445,000 of variable rate debt on which the interest rate resets weekly. As of September 24, 2008 and September 25, 2008 the interest rate on this variable rate debt had reset to rates ranging from 9.15% to 11.00%. The rates on this debt reset weekly. It is uncertain how long this market disruption will last. Legislation has been proposed in Congress to address the conditions in the credit markets and the Authority continues to monitor their variable rate obligations and the impact of high variable interest rates.

On September 26, 2008, the Authority drew on its standby bond purchase agreement with Westdeutsche Landesbank Girozentrale to repurchase a total of \$14,550,000 of variable rate bonds. The Westdeutsche Landesbank Girozentrale provided this financing at their bank rate of 5%. The Authority's remarketing agent will continue to actively remarket these bonds.

Wyoming Business Council

The Council has entered into various agreements subsequent to June 30, 2008, with vendors primarily for marketing, public relations and promotion services and to cities, towns, counties and joint powers boards for economic development infrastructure projects during the period July 1, 2008 through December 31, 2014. These agreements are valued at up to but no more than \$22,255,250. These agreements will be funded by a combination of State appropriations and federal revenues.

The Council distributed \$473,750 subsequent to June 30, 2008, out of the Economic Development Fund for loans approved but undistributed as of June 30, 2008.

Subsequent to June 30, 2008, the Council approved \$847,450 of loans under bridge loan provisions of the Wyoming Partnership Challenge Loan Program. These loans will be distributed out of the Economic Development Fund.

Note 14 New Pronouncements

The Government Accounting Standards Board (GASB) has issued Statement No. 51, "Accounting and Financial Reporting for Intangible Assets." This statement establishes accounting and financial reporting requirements for intangible assets including easements, water rights, timber rights, patents, trademarks, and computer software. The requirements of this Statement are effective for financial statements for periods beginning after June 15, 2009. An assessment of the effect of adopting Statement No. 51 is ongoing.

In November 2007, the Government Accounting Standards Board (GASB) issued Statement No. 52 Land and Other Real Estate Held as Investments by Endowments. Statement No. 52 establishes consistent standards for the reporting of land and other real estate held as investments by essentially similar entities. It requires endowments to report their land and other real estate investments at fair value. Governments also are required to report the changes in fair value as investment income and to disclose the methods and significant assumptions employed to determine fair value, and other information that they currently present for other investments report at fair value. The State will be required to apply Statement No. 52 for its June 30, 2009 year-end. An assessment of the effect of adopting Statement No. 52 is not yet complete.

The Government Accounting Standards Board (GASB) has issued Statement No. 53, "Accounting and Financial Reporting for Derivative Instruments" This statement establishes accounting and financial reporting requirements for derivative instruments entered into by the State. The requirements of this Statement are effective for financial statements for periods beginning after June 15, 2009. An assessment of the effect of adopting Statement No. 53 is ongoing.

Required Supplementary Information

Clockwise starting upper left corner: Smoke coming from behind Bunsen Peak, taken from Old Road behind Aspen Dorm (photographer Terry Danforth; 1988); Irrigation system protecting power line near Norris Geyser Basin (photographer Jeff Henry; 1988); Bomber dropping retardant at NE gate (photographer Bob Chambers; September 4, 1988); Firefighter spraying water on Old Faithful Inn (photographer Jeff Henry; 1988); Flame & smoke approaching Old Faithful Photo shop & Snow Lodge; (photographer unknown; 1988); Approaching firestorm at Old Faithful Inn with buses in parking lot (photographer Jeff Henry; September 7, 1988); Crown fire approaching Old Faithful Snowlodge (photographer Jeff Henry; September 7, 1988); Smoke & Roosevelt Arch at north entrance (photographer Jeff Henry; Late August 1988);

The fires were so intense that vehicles left near the fire had their wheels melted, windshields shattered and paint scorched. Priority was concentrated on life and structure protection, especially structures of historical significance such as the Old Faithfull Inn. Firefighters, using fire engines and portable water pumping systems, kept the roofs and other surfaces of the structures wet. Of more than 1,000 structures located in the park, only 67 were destroyed. Photo Credits: The Official Website of Yellowstone National Park; Yellowstone Digital Slide File.

Schedule of Revenues & Expenditures

(Budget & Actual)

General Fund

For the Year Ended June 30, 2008

Required Supplementary Information

Budgets

The Legislature appropriates substantially cash basis budgets for a majority of the funds at the program level (administration, revenue division, investigations, etc.) within an agency. The State budget office maintains budgets for budgeted funds at the series level (personnel services, support services, etc.) within a program. Agency budget analysts are allowed to transfer appropriations from one series to another series within an agency's program but the Governor must approve all changes in appropriations at the program level. The State's legal level of budgetary control is at the program level.

Encumbrance accounting, under which purchase orders, contracts and other commitments for the expenditure of funds are recorded to reserve that portion of the applicable appropriation, is employed for governmental fund types. Encumbrances outstanding at June 30, 2008, for which the goods or services have not been received, are shown as a reservation of fund balance.

Reconciliation from the Budgetary Basis of Accounting to the GAAP Basis

	General Fund	Foundation Program Fund	Legislative Reserve Fund
Budgetary Basis Excess (Deficit)			
Revenues over (under) Expenditures	\$ 454,374,515	\$ 371,439,488	\$ (264,824,821)
Changes in certain revenue and expenditure accruals	(309,690,832)	84,772,468	635,720,010
Revenue and/or Expenditures from previous biennium budgets	391,266,191	(31,935,478)	(78,267,151)
Encumbrances as of June 30, 2007	147,464,980	1,327,058	80,080
Non-budgeted funds	(562,126,930)	(83,800,438)	(96,924,706)
GAAP Basis Excess (Deficiency) of Revenues and Other Financing Sources over (Under) Expenditures and Other Financial Uses for the biennium	\$ 121,287,924	\$ 341,803,098	\$ 195,783,412
Net Change in Fund Balance:			
Year ended June 30, 2007	\$ 703,300,996	\$ (5,681,306)	\$ (533,025,723)
Year ended June 30, 2008	(582,013,072)	347,484,404	728,809,135
Total net change for the biennium	\$ 121,287,924	\$ 341,803,098	\$ 195,783,412

Supplemental appropriations and additional appropriations approved by the Governor are included in the column titled "B11's & Supplemental Budget." In the budget and actual statements, encumbrance accounting, under which purchase orders, contracts, and other commitments are recorded as expenditures and liabilities in order to reserve that portion of the applicable appropriation, is employed for budgetary control purposes. Some unencumbered appropriations lapse at the end of each biennium. Encumbrances are reported as a reservation of fund balance and carried forward for use in future years. Revenue budgets are not legislatively established but are determined by individual agencies or the Consensus Revenue Estimating Group.

Wyoming Department of Transportation Infrastructure Using Modified Approach

The Wyoming Department of Transportation (DOT) accounts for its infrastructure assets using the modified approach. The infrastructure consists of the road subsystem and the bridge subsystem.

DOT manages its road network with a pavement management system developed by the Department. A consulting firm is contracted to collect the data. The pavement condition is rated in three areas: ride, rutting, and cracking. The ride is measured by suspension movement using an index called the present surface index (PSI). The rutting is measured using the height difference between the lane center and each wheel path of a cross section of the road to determine the rut index (RUT). The cracking measures the width and frequency of the cracks to establish the pavement condition index (PCI). A composite rating is derived from the three condition ratings called the pavement serviceability rating (PSR). The pavement management system establishes a PSR on a scale from 0 to 5 for each road section with the following categories: excellent 5.0 to 3.5, good 3.5 to 3.0, fair 3.0 to 2.5 and poor 2.5 to 0. It is DOT's policy to maintain its National Highway System (NHS) at an average rating of 3.25 (good) for the NHS.

system as a whole and its Off the National Highway System (Non-NHS) at an average rating of 3.00 (fair) for the Non-NHS system as a whole. Each road section has data collected every other year. The road subsystem condition assessment is done every year.

As of September 30, 2007, the overall PSR for the NHS was 3.46 and Non-NHS was 3.16. As of September 30, 2006, the overall PSR for the NHS was 3.43 and Non-NHS 3.14. As of September 30, 2005, the overall PSR for the NHS was 3.45 while the Non-NHS was 3.13. The number of miles for NHS and Non-NHS with excellent to good condition and fair to poor condition are as follows:

PSR Condition Rating	NHS						NON-NHS					
	2005			2006			2005			2006		
	# of		Miles	# of		Miles	# of		Miles	# of		Miles
	Miles	Percent		Miles	Percent		Miles	Percent		Miles	Percent	
Good to Excellent	1,887	63.8%		2,006	62.6%	2,418	62.9%		1,444	40.7%	1,399	39.2%
Poor to Fair	1,069	36.2%		1,437	37.4%	1,425	37.1%		2,103	59.3%	2,170	60.8%
	2,956	100.0%		3,443	100.0%	3,843	100.0%		3,547	100.0%	3,569	100.0%

The Department uses a comprehensive bridge management system (PONTIS) to assist in managing the State's bridges. Each bridge is inspected at least once every two years. This inspection measures, rates, and records the required National Bridge Inventory (NBI) items, including dimensions, clearances, alignment, waterway data and structural condition. The structural condition is evaluated by using structural elements. Each component of the bridge (girders, deck, railing, columns, piling, etc.) is assigned an element and the condition of each element is evaluated based on several condition assessments. The element data is converted to NBI ratings using a conversion program. The structure's NBI data is then used to determine its sufficiency rating. The sufficiency rating is calculated by the Federal Highway Administration, and bridges with a sufficiency rating of 80 or less and classified as structurally deficient and/or functionally obsolete are put on the Federal Highway Administration selection list. Functional obsolescence is a measure of the suitability of the bridge to provide for requirements of traffic both on and under the structure. Structural deficiency is a measure of the condition of the structural elements and the ability of the bridge to carry the anticipated loads. Bridges appearing on the selection list are considered deficient, whereas those not on the lists are considered acceptable. The bridge subsystem condition assessment is done every year. The Department of Transportation's policy is to maintain 83% of its NHS bridges and 80% of Non-NHS bridges in acceptable condition.

Using the BMS/NBI conversion program, the NBI data supplied to the Federal Highway Administration results in the following selection list condition rating for the last three fiscal years:

Selection List Condition Rating	NHS						Non-NHS					
	2005		2006		2007		2005		2006		2007	
	Bridges	Percent	Bridges	Percent	Bridges	Percent	Bridges	Percent	Bridges	Percent	Bridges	Percent
Acceptable	1,224	96.2%	1,227	96.5%	1,224	96.4%	612	93.0%	609	92.8%	614	93.2%
Deficient	49	3.8%	45	3.5%	46	3.6%	46	7.0%	47	7.2%	45	6.8%
	1,273	100.0%	1,272	100.0%	1,270	100.0%	658	100.0%	656	100.0%	659	100.0%

The Department estimated maintenance and preservation expenditures on infrastructure assets of \$463.2 million for the year ended September 30, 2007. Actual expenditures on infrastructure for maintenance and preservation were \$360.8 million, a difference of \$102.4 million. The difference is due to the size of the projects, with larger projects taking a longer period to complete, and projects that were let late in the current fiscal year and work was not started on these projects until the next year.

Estimated and actual amounts used to maintain or preserve the Department's infrastructure systems at the Department's target PSR ratings for the past four years is as follows:

For the year ended September 30	Estimated		Actual	
	Road Network	Bridges	Road Network	Bridges
2003	298.9 million	19.8 million	327.9 million	18.8 million
2004	325.1 million	22.7 million	323.5 million	13.4 million
2005	320.4 million	18.3 million	320.7 million	13.8 million
2006	391.5 million	22.8 million	298.4 million	22.1 million
2007	426.0 million	37.2 million	338.8 million	22.0 million

Supplementary Information

On September 11th, colder weather, bringing with it rain and snow calmed the fires throughout the national park. All fires in Yellowstone National Park were officially declared out on November 18th. A total of 793,880 acres, approximately 36 percent, of the park was affected by the wildfires. Fire crews were sent home, but additional manpower continued to arrive at Yellowstone National Park to rehabilitate areas that had been affected by the firefighting efforts. The most important lesson learned from the 1988 Yellowstone National Park fires was that while large destructive fires are unacceptable in regions with densely populated communities, fires are mandatory in a region such as the Yellowstone ecosystem, if it is to be maintained in a natural manner. Non-Major Governmental Funds

SPECIAL REVENUE FUNDS

Special Revenue Funds are used to account for the proceeds of specific revenue sources (other than major capital projects) that are legally restricted to expenditures for specified purposes.

Environmental Quality Fund-This fund is used to account for fees, fines, penalties, forfeitures, and grants received which are restricted for use in the reclamation of the environment.

Board & Regulatory Fund-This fund is used to account for the licensing fees paid by professionals as well as the related expenditures of regulating the specific professionals.

Game and Fish Fund-This fund is used to account for all revenues, which are restricted for the purpose of habitat, recreational facility, wildlife conservation and enhancement.

Statutory Reserve Account Fund-This fund is used to account for the first \$46,220,000 diversions from the fund balances of the GAAP Holding Fund, the REBBA Fund and the GAAP II Fund as of June 30, 1996.

Special Projects Fund-This fund is used to account for revenues for conferences and services, as well as the related expenditures, which are restricted for use in special projects.

Community College Grants Fund-This fund is used to account for mineral severance tax, which is granted to community colleges for emergency repairs.

Water Fund-This fund is used to account for mineral severance tax revenue which are restricted for the purpose of maintaining and rehabilitating current water facilities, capital construction, and fees received for water sales and storage at Fontenell, Sheridan and Palisades and the related costs of providing these services.

Workforce Development Fund-This fund is used to account for expenditures relating to workforce development activities for the Department of Workforce Services.

Mineral Royalties Fund-This fund is used to account for mineral royalties, which are restricted for the specific purpose of school capital construction.

Government Royalty Distributions Fund-This fund is used to account for royalties received on mineral production, which is restricted for grants and loans to municipalities, local governments, counties and special districts.

Farm Loan Loss Reserve Fund-This fund is used to account for a percentage of farm loan revenue, which is restricted for the repayment of defaulted loans and to pay the administrative and legal expenses of the Farm Loan Board in making collections on defaulted loans and foreclosing mortgages.

State Revolving Fund (SRF)-This fund is used to account for federal grants from the U.S. Environmental Protection Agency; state funds from the Department of Environmental Quality (DEQ) corrective action account and from SRF loan repayments, which were to DEQ for water pollution control projects.

Miners' Hospital Land Fund-This fund is used to account for land and the income generated from land, which was donated to the State for the specific purpose of the Miners' Hospital.

Omnibus Land Fund-This fund is used to account for land and the income generated from land, which was donated to the State for the specific purpose of the establishing, maintaining and support of charitable, educational, penal and reform institutions.

Donations and Bequests Fund-This fund is used to account for bequests and donations made for specific purposes.

Wyoming Wildlife Fund-This fund is for payments made by the State for the purpose of enhancing Wyoming wildlife resources.

Endowment Fund-This fund is used to account for the endowment funds.

Oil Surcharge Conservation Fund-This fund is used to account for fines and forfeitures charged to Mobil Oil, Texaco, Belridge, Palo Pinto, Stripper Wells, Diamond Shamrock and Exxon, which are required to be used to help conserve energy through special grant programs.

State Land Fund-This fund is used to account for land which was donated to the State and the land income, which is restricted to establishing, maintaining and supporting public buildings, fish hatcheries and various State institutions.

Flex Benefit Program Fund-This fund is used to account for payments made by State employees for the Flex Benefit Program and subsequent reimbursement of those payments to State employees.

DEBT SERVICE FUND

Debt Service Funds are used to account for the accumulation of, and the payment of, general long-term principal and interest.

CAPITAL PROJECTS FUND

Capital Projects Funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities.

PERMANENT TRUST FUNDS

Permanent trust funds are used to report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the reporting government's programs, that is, for the benefit of the government or its citizenry.

Wyoming Wildlife Trust Fund-This fund is used to account for assets of a trust agreement. The interest on this fund is restricted for the purpose of enhancing Wyoming wildlife resources.

Montgomery Home for the Blind Fund-This fund is used to account for assets of a legal trust agreement. The income from this fund is restricted for the purpose of establishing, maintaining and supporting a school for blind individuals.

Wyoming Tobacco Settlement Fund-This fund is used to account for assets of the tobacco settlement. The income from this fund is restricted for the purpose of improvement of the health of Wyoming's citizens.

Wyoming Military Assistance Trust Fund-This fund is used to account for appropriations for the military assistance. The income from this fund is restricted for the purpose to alleviate financial hardships faced by various military members and their families.

Wyoming Cultural Trust Fund- This fund is used to account for appropriations for the Wyoming Cultural Trust Fund. The income from this fund is restricted for the purposes to preserve, promote and enhance the unique cultural heritage of the Wyoming citizens.

Sundry Trust Funds- This fund is used to account for appropriations for various trust funds. The income from this fund is restricted for the purposes of the trust funds.

Wyoming Excellence In Higher Education Endowment Funds- This fund is used to account appropriations for higher education endowments. The income from this fund is restricted for the purpose of faculty recruitment and retention, other educational needs, funding for future scholarships, imposing reporting requirements, directing legislative committees to determine higher education accomplishments, and provides for committees to study and prepare plans of implementation as specified.

PROPRIETARY FUNDS

NON-MAJOR ENTERPRISE FUNDS

Enterprise funds are used to account for operations: (a) that are financed and operated in a manner similar to private business enterprise, where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, public policy, management control, accountability or other purposes.

Liquor Commission Fund-This fund is used to account for the operation of the State Liquor Commission, which purchases and sells alcohol products to businesses throughout the State.

Canteen Fund-This fund is used to account for the purchase and sale of consumable goods to residents at the State institutions.

Subsidence Insurance Fund-This fund is used to account for insurance premiums received and claims payments made for house and land subsidence in subsurface mining areas. (Note that claims payments are currently being made from a federal grant in another fund. This fund is currently only receiving premiums, but it is the goal of the federal program to eventually make this program self sufficient.)

Honor Farm Agricultural Sales Fund-This fund is used to account for the revenues and expenses of producing and selling agricultural products to State institutions and other consumers by the Honor Farm.

Wyoming Health Insurance Fund-This fund is used to account for premiums received from residents unable to obtain health insurance and the expense of purchasing insurance for these residents.

Unemployment Compensation Fund-This fund is used to account for premiums and claims payments made for the State's unemployment program.

INTERNAL SERVICE FUNDS

The internal service funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the governmental unit, or to other governmental units, on a cost-reimbursement basis.

Computer Technology Fund-This fund is used to account for the activities of the Computer Technology Division, which provides computer services to State agencies.

Motor Vehicle Fund-This fund is used to account for the activities of the Motor Vehicle Division, which provides transportation services to State agencies.

Central Duplicating Fund-This fund is used to account for the activities of the Central Duplicating Division, which provides printing, duplicating service as well as copier rental to State agencies.

Telecommunications Fund-This fund is used to account for activities of the Telecommunications Division, which provides telecommunication services to State agencies.

Group Insurance Fund-This fund is used to account for the activities of the Group Insurance Board, which provides insurance coverage to State employees.

Wyoming Surplus Property Fund-This fund is used to account for the activities of the Surplus Property Division, which collects, distributes, and sells surplus property to federal, state and local governments.

Personnel/Training Fund-This fund is used to account for the training classes and services provided by the State's Personnel Division.

State Self Insurance Fund-This fund is used to account for the activities of the State's Self Insurance Pool which insures agency property against theft and damage.

Wyoming Building Corporation-This fund is used to account for the activities of the Wyoming Building Corporation, a blended component unit of the State, which finances, owns and operates real and personal property used by the State.

FIDUCIARY FUNDS

PENSION TRUST FUNDS

Pension trust funds are used to account for the assets held by a government as trustee for employee retirement systems.

Public Employees Pension Plan-This fund is used to account for the activities of the Wyoming Public Employee Retirement System.

Wyoming State Highway Patrol, Game and Fish Warden, and Criminal Investigator Retirement Plan-This fund is used to account for the activities of the Wyoming State Highway Patrol, Game and Fish Warden, and Criminal Investigator Retirement System.

Volunteer Firemen's Pension Plan-This fund is used to account for the activities of the Volunteer Firemen's Retirement System.

Paid Firemen's Pension Plan A-This fund is used to account for the activities of the Paid Firemen's Retirement System for firemen hired prior to July 1, 1981.

Paid Firemen's Pension Plan B-This fund is used to account for the activities of the Paid Firemen's Retirement System for firemen hired after July 1, 1981.

Wyoming Judicial Retirement Plan-This fund is used to account for the activities of the Judge's Retirement System.

Wyoming Law Enforcement Retirement Plan-This fund is used to account for the activities of the Wyoming Law Enforcement Retirement Plan.

457 Plan-This fund is used to account for administration of an IRC457 Deferred Compensation Plan.

PRIVATE-PURPOSE TRUST FUND

Private-purpose trust fund is used to report any trust agreement not properly reported in a pension trust fund or investment trust fund.

Unclaimed Property Fund-This fund is used to account for property for which the owner is unknown. The State is obligated to maintain possession of the property until claimed.

AGENCY FUNDS

Agency funds are used to account for assets that a government holds on behalf of others as their agent.

Treasurer's Agency Fund-This fund is used to account for funds held by the Treasurer's Office on behalf of citizens, counties and other municipalities.

Department of Revenue Fund-This fund is used to account for the receipt of the different taxes and the related disbursement to municipalities of these taxes.

Funds Held for Individuals-This fund is used to account for the various State agencies holding assets on behalf of individuals.

State Lands Fund-This fund is used to account for assurance deposits place for the use of public lands and funds held for other entities.

Other Agency Funds- This fund is used to account for the activity within the County Predatory Control Fund, State Park Damage Deposit Fund, Adjutant General Fund, and the Environmental Cash Bond Fund.

Statistical Section

(Unaudited)

Left: Crown fire along Dunraven Pass (photographer Kathy Peterson; September 1988)

Right: Night view of North Fork fire (photographer Jeff Henry; September 1988)

Above: Distant view of crown fire at Africa Lake (photographer Jim Peaco; September 10, 1988)

Left: Tree torching near Africa Lake (photographer Jim Peaco; September 10, 1988)

Right: Nighttime silhouette of lodgepole pine against flames near Antelope Creek (photographer Jim Peaco; September 10, 1988)

August 20, 1988 was the single worst day of the fires and was later dubbed "Black Saturday" due to the huge amount of land that was burned as well as the dense smoke that turned daytime into night in some places. On this single day, more than 150,000 acres of Yellowstone land burned which was more land than in all other fires combined since the establishment of the park. Statistical Section Index

This part of the State of Wyoming's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the primary government's overall financial health.

Financial Trends – These schedules contain trend information to help the reader understand how the government's financial performance and well-being have changed over time.

Schedule 1 – Changes in Net Assets	184
Schedule 2 – Net Assets by Component	185
Schedule 3 – Fund Balances of Governmental Funds.....	186
Schedule 4 – Changes in Fund Balances of Governmental Funds	188

Revenue Capacity Information – These schedules contain information to help the reader assess the government's most significant own-source revenues. The three most significant own-source revenues for the State of Wyoming include: sales and use tax, mineral severance taxes and property tax collected and designated for the state's School Foundation Program.

Major Own-Source Revenue:

Schedule 5 – Governmental Activities Tax - Revenues by Source	190
Schedule 6 – General Governmental Tax - Revenues by Source	190
Schedule 7 – Revenue Capacity	191
Schedule 8 – Major Own-Source Revenue – Mineral Severance Taxes	192

Revenue Rates:

Schedule 9 – Revenue Rates	193
Schedule 10 – Revenue Rates for Mineral Severance Tax.....	194

Revenue Base:

Schedule 11 – Sales Tax Collections by Industry	196
Schedule 12 – Sales Tax Collections for Retail, Accommodation and Food Service Sectors	198
Schedule 13 – Use Tax Collections by Industry.....	200
Schedule 14 – Revenue Base-Assessed Value of Property	202
Schedule 15 – Locally Assessed Value and Estimated Actual Value of Taxable Property	204
Schedule 16 – State Assessed Value and Estimated Actual Value of Taxable Property	206
Schedule 17 – School Foundation 12-mill Property Tax Collections	208

Principal Tax Payers:

Schedule 18 – Principal Mineral Production Tax Payers	209
Schedule 19 – Principal Non-Mineral Tax Payers	210

Debt Capacity Information – These schedules present information to help the reader assess the affordability of the government’s current levels of outstanding debt and the government’s ability to issue additional debt in the future.

Schedule 20 – Revenue Bond Coverage	212
Schedule 21 – Legal Debt Margin	214
Schedule 22 – Ratios of Outstanding Debt by Type	216

Demographic and Economic Information – These schedules offer demographic and economic indicators to help the reader understand the environment within which the government’s financial activities take place.

Schedule 23 – Demographic and Economic Statistics	218
Schedule 24 – Personal Income by Major Source	220
Schedule 25 – Principal Employers by Industry	222

Operating Information – These schedules contain service and infrastructure data to help the reader understand how the information in the government’s financial report relates to the services the government provides and the activities it performs.

Schedule 26 – Capital Asset Statistics by Functional Category and by Fund Class.....	224
Schedule 27 – State Government Authorized Full-Time Positions and Number of Active Employees	226
Schedule 28 – Operating Indicators by Function/Program	228
Schedule 29 – Department of Employment Workers’ Compensation Division	229
Schedule 30 – Department of Employment Workers’ Compensation Division	230
Schedule 31 – Trends in AFDC/TANF and Food Stamp Caseloads and Expenditures	231
Other Wyoming Facts	232

Notes:

Taxes do not directly coincide with the entity wide statements due to the amounts including cities, towns, counties and component units' portions.

¹ The drop in revenues which occurred in Fiscal Year 1999 was due, in part, to the reduced taxation rates put in place by Chapter 168 of the 1999 Session Laws, "Oil Producers Recovery-2."

² Fiscal Years 2006 and 2007 natural gas revenues include \$19.5 million and \$13.3 million respectively in previously protested severance taxes from prior production years.

³ Actual property tax information was not available. The property tax figures listed are estimates based on property assessment values. Estimated property taxes for Fiscal Year 2009 is \$262,779,975.

Source: Department of Revenue; Annual Reports

Notes:

All rates are set by the Legislature.

¹The State of Wyoming does not levy a corporate income tax.

²The State of Wyoming does not impose or levy income taxes, earning taxes or any other form of tax based on wages or other income.

³Beginning July 1, 1993, the sales and use tax rate was increased by one percent. Counties could levy up to 2% in additional sales and use tax upon voter approval. Beginning July 1, 2007, counties may levy up to 3% in additional sales and use tax upon voter approval.

⁴A temporary sales and use tax exemption for food for domestic home consumption commenced on July 1, 2006 and ends on June 30, 2008.

⁵The Legislature passed an increase tax rate for cigarettes effective July 1, 2003. A discount of 6% is given to wholesalers on purchases of stamps or metering machine settings.

⁶One percent of tax equals 10 mills. Therefore, the Foundation Program Fund mill levy of 12.000 is equal to 1.2000% of the assessed real property value is due as to Estate Taxes are set under the United States laws governing federal estate taxes and the IRS Code. Estate tax proceeds are deposited in the State General Fund.

Source: Department of Revenue; Annual Reports

Notes:

All rates are set by the Legislature.

¹Severance tax rate on 1998 uranium production was 0% pursuant to W.S. 39-14-505.

Tax levies are based on the assessed value of gross product of minerals or mine productions.

¹Standard Industrial Classification

²North American Industry Classification System

The SIC and NAICS coding was developed by the Federal Office of Management and Budget. Under the system, a business is classified by primary activity, determined by principal product, or group of products produced, distributed, and/or services rendered.

Since Fiscal Year 2004, data has been tabulated by NAICS code instead of by SIC, these two classifications are different and are not directly comparable.

Only the State-imposed 4% sales tax collections are included

Estimates of sales may be obtained by dividing the collection amount by the effective tax rate.

Penalty and interest funds are excluded in this table.

Sales tax collections do not directly coincide with the entity wide statements due to the amounts including portions distributed to cities, towns and counties.

Notes:

"Locally assessed" values represent property assessed by the county assessor.

"State assessed" values are those properties assessed by the Department of Revenue's Mineral Division or Property Tax Division.

"Real property" is land and appurtenances affixed thereto, including buildings.

"Personal property" is property not permanently affixed to the land.

The Non-Minerals classification 'Cable and Satellite' began being used in 2008.

Notes:

The Legislature requires that county assessors annually update property values. The county assesses property at approximately nine and one-half percent (9.5%) of actual value for agricultural land, residential and commercial property and eleven and one-half percent (11.5%) for industrial property. Estimated actual value is calculated by dividing assessed value by those percentages.

^a Includes tax-exempt property.

Notes:

A detailed listing of non-mineral and mineral property is stated in Schedule #14, Assessed Value of Property.

The State assesses property annually and assessment of minerals are annually following the year of production. The State assesses non-mineral property at approximately eleven and one-half percent (11.5%) of actual value. Mineral property is assessed as gross product of minerals or mine productions at actual value or one hundred percent (100%). Estimated actual value is calculated by dividing assessed value by those percentages.

Note:

¹The assessed valuation is the total locally & state-assessed valuation calculations obtained from Schedule #14, Revenue Base - Assessed Value of Property.

²The statutory State debt limit is one percent (1%) of the assessed value of all taxable property in the State, as set forth in Chapter 97-16-001 of the State of Wyoming Constitution.

³The legal debt margin is the State's available borrowing authority under state finance statutes and is calculated by subtracting the net debt applicable to the limit from the debt limit.

Source: Comprehensive Annual Financial Report

Notes:

GASB 34 reporting was implemented in 2002.

Details regarding the State's outstanding debt can be found in notes to the financial statements. These obligations constitute a long-term obligation of the State.

The Building Corporation bonds were limited obligations of the Wyoming Building Corporation. The bonds were secured with the newly constructed prison and repayments were made through lease payments by the State for the use of the prison. The decrease between 2004 and 2005 is attributable to the State purchasing its prison facility and the subsequent retirement of the \$63 million dollars of debt.

The inclusion of deferred interest payable in fiscal year 2006 is the result of interest on outstanding bonds being deferred until the bonds mature.

^a See Schedule #23, Demographics and Economic Statistics, for personal income and population data.

^b Debt as a percentage of personal income is based on prior year personal income.

^c Amount of debt per capita is based on prior year population.

Notes:

^a Total personal income is the income that is received by all persons from all sources. It is composed of wages and salaries, proprietors' income, personal interest and dividend income, rental income and personal current transfer receipts, less contributions for government social insurance.

^b Per capita personal income is calculated by dividing total personal income by population.

Differences between the Demographic and Economic Statistics schedule for Labor Force and Employment estimates and information contained in schedule, #24, Personal Income by major source, and #25, Principal Employers by Industry, are due to differences in survey information between the U.S. Department of Commerce and U.S. Department of Labor, including sample size, estimation procedures, coverage and definitions.

Notes:

¹North American Industry Classification System

* Amount does not state total to avoid disclosure of confidential information, but the estimates for the non-reported item(s) are included in the totals.

²Contributions for government social insurance are included in earnings by type and industry, but they are excluded from personal income.

³The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers: wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

⁴Rental income of persons includes the capital consumption adjustment.

⁵This component of personal income is payments to persons for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by federal, state, and local governments and by businesses. Government payments to individuals includes retirement and disability insurance benefits, medical payments (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance benefits, veterans' benefits, and federal grants and loans to students. Government payments to nonprofit institutions excludes payments by the federal government for work under research and development contracts. Business payments to persons consists primarily of liability payments for personal injury and of corporate gifts to nonprofit institutions.

Notes:

¹ Registered voter data is not available for some years due to an old voter registration system and information not being collected in non-election years.

² Purchasing card program was implemented in 2005.

³ Figures are based on October 1 enrollment.

⁴ The annual drop-out rate is calculated by taking one year's drop-out counts from grades 9 - 12, divided by an average enrollment using October 1 enrollments and completer figures. Information obtained from the Department of Education.

⁵ Starting in 2006-2007, the academic year definition was changed to more accurately reflect Banner's academic year definition of fall, spring and summer terms. Prior to 2006-2007, the academic year definition included summer, fall and spring terms. For example, academic year 2005-2006 includes August 2005, December 2005 and May 2006 while academic year 2006-2007 includes December 2006, May 2007 and August 2007.

⁶ Figures obtained by averaging end-of-semester data for fall and spring semesters, except for 2007 which only includes Fall 2007 enrollment figures. Data also includes all outreach enrollment.

⁷ The agency changed their data collection system in fiscal year 2007. Information prior to fiscal year 2007 is not comparable and is therefore, not provided.

⁸ Years 1998 through 2000 are based on the SIC Industries and years 2001 through 2007 are based on the NAICS Industries classifications.

N/A = Information is not available.
