

ADV4 Feature Set Announcement Bulletin December, 2024

New Year, New You?

As we move into a new year, we look back on all we've accomplished since Advantage 4 came online in the Spring of 2023. We've since completed five feature sets, numerous interim updates, and evaluated over 64 new features! The last twenty months have proven that the SAO and our user base are able to adapt to continuous transformation and implement new, exciting, and innovative features but stay true to our standards of maintaining stability and continuity for all users! Our team is looking forward to discovering more efficiencies in the future and sharing those with you.

This feature set will not impact users—not even visually! This feature set simply updates behind the scenes tax reporting requirements. Although this set could slip into the system undetected, we take pride on communicating all changes to our users in order to keep everyone informed and no one surprised. As we

continue to release new functionality, we will continue to release corresponding Education Bulletins as we go—but, we've decided to slim them down for the new year. It's a lot easier to cut the bulletin down in size than to stop snacking on holiday chocolates. So going forward you can catch up on some of our previous improvements on our website instead of skipping through to page 2 of this bulletin for updates. From now on, readers will see this notice: **New to this? Read the full recap on the [Feature Set Landing Page](#) of our site: sao.wyo.gov/feature-sets.**

The screenshot shows the 'Feature Sets' page on the Wyoming State Auditor's Office website. It includes a navigation bar with links like Home, About, Transparency, Publications, Stable Token, and Feature Sets. The main content area is titled 'Feature Sets' and contains sections for 'ADV4 Feature Sets' and 'Feature Set Deployment Schedule'. The 'ADV4 Feature Sets' section describes the upgrade of the Wyoming Enterprise Resource Planning (ERP) system. The 'Feature Set Deployment Schedule' table lists the following releases:

Feature Set	Release Date
FS2-2023	November 6, 2023
FS3-2023	January 5, 2024
FS1-2024	August 5, 2024
FS2-2024	October 27, 2024
FS3-2024	January 6, 2025

Below the table, there are sections for 'ADV4 Feature Set Communications' and 'ADV4 Feature Set Questions'.

What's New?

Feature Set 3-2024 will be delivered into Advantage on the evening of January 3, 2024. This feature set includes regulatory changes to tax forms that will not impact users. The biggest change this round is the shortening of the Education Bulletin now that we've progressed through a year of feature sets. New and new-to-feature-set employees can always review the recap of the Advantage 4 upgrade, the Feature Sets, and what to expect in our communications to users. All information is available online at our website:
